

**RE FCC ID: 2AFJJGWLE1010B**

**To the certification reviewer:**

We are hereby applying for single modular approval of the above-referenced FCC ID, based on compliance with part of the criteria as detailed below.

Sincerely,

---

Thomas Wei  
Manager

**Part 15 Unlicensed Single Modular Transmitter Approval Justification per 15.212**

<b>Requirement per 15.212</b>	<b>reference</b>
(i) The radio elements of the modular transmitter must have their own RF shielding.	Yes. The metal shielding as shown on external photo.
(ii) The modular transmitter must have buffered modulation/data inputs (if such inputs are provided).	Yes. The modular data inputs are buffered through log or microcontroller connections. All modulation and data inputs are buffered by circuitry on the transmitter chip.
(iii) The modular transmitter must have its own power supply regulation.	Yes. Power supply regulation is provided by circuitry on the transmitter chip.
(iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c).	Yes The modular with permanently antenna. The antenna is integral antenna.
(v) The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing for compliance with Part 15 parameters.	Yes. Referring to the test setup photos. The modular transmitter was tested with a control board and PC which will be unmodified and commercially available equipment.
(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. If the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	Yes.

(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	Yes. Please refer to the modular installation manual.
(viii) The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	Yes.
