Model Differences Letter

The TR-2IN-1REL is the low end module. The KP-8IN-1REL is the high end module. The TR-2IN-1REL has only two sensors inputs. The KP-8IN-1REL has only eight sensors inputs. The KP-8IN-1REL has a user interface (OLED screen and keypad membrane). The TR-2IN-1REL does not have a user interface. At the point of view of telecommunication, both are identical: RFID function. Both products used the same printed circuit boards.

Each external module is defined below:

Item	Description
KP-8IN-1REL	Remote keypad displaying data from the main system that allows the addition of 8 sensors inputs and a programmable relay output
TR-2IN-1REL	Remote expansion module that allows the addition of 2 sensors inputs and a programmable relay output

The difference between external modules (KP-8IN-1REL, TR-2IN-1REL) is given below:

Product Name	Features					
	RS-485 port	Configurable input	Relay output with current reading (5A)	OLED display	RFID Reader	Keypad
KP-8IN-1REL	2	8	1	1	1	1
TR-2IN-1REL	2	2	1		1	

Dated this 07 Day of March 20 16
