# Instructions

1. This test report shall not be partially reproduced without the written consent of the laboratory.

2. The test results in this test report are only responsible for the samples submitted

3. This test report is invalid without the seal and signature of the laboratory.

4. This test report is invalid if transferred, altered, or tampered with in any form without authorization.

Any objection to this test report shall be submitted to the laboratory within
 15 days from the date of receipt of the report.

# 1 General Description

# 1.1 Description of the EUT

| Product name:        | 3 in 1 Wireless Charging Station  |  |  |  |
|----------------------|---|--|--|--|
| Model name:          | LM10  |  |  |  |
| Series Model:        | N/A   |  |  |  |
| Model difference:    | N/A   |  |  |  |
| Electrical rating:   | Input: 5V 3A, 9V 3A, 12V 3A<br>Wireless Output: phone: 5W/7.5W/15W, AirPods: 5W, Watch: 3W    |  |  |  |
| Accessories:         | Cable: USB-C to USB-C cable 1.5m  |  |  |  |
| Hardware version:    | PQ-LM10-L15-V10   |  |  |  |
| Software version:    | B1A6  |  |  |  |
| RF specification:    |   |  |  |  |
| Operation frequency: | Transmitter1: 115 kHz – 205 kHz<br>Transmitter2: 115 kHz – 205 kHz<br>Transmitter3: 326.5 kHz |  |  |  |
| Modulation type:     | ASK   |  |  |  |
| Antenna type:        | Coil Antenna  |  |  |  |

#### **1.2 Description of test modes**

All the test modes were carried out with the EUT in normal operation, the final test mode of the EUT was the worst test mode for emission test, which was shown in this report and defined as:

| No.     | Emission test modes                 |  |
|---------|-------------------------------------|--|
| Mode 1  | Wireless Output(5W)                 |  |
| Mode 2  | Wireless Output(7.5W)               |  |
| Mode 3  | Wireless Output(15W)                |  |
| Mode 4  | AirPods                             |  |
| Mode 5  | Watch                               |  |
| Mode 6  | Wireless Output(5W)+ AirPods        |  |
| Mode 7  | Wireless Output(7.5W)+ AirPods      |  |
| Mode 8  | Wireless Output(15W)+ AirPods       |  |
| Mode 9  | Wireless Output(5W)+ Watch          |  |
| Mode 10 | Wireless Output(7.5W)+ Watch        |  |
| Mode 11 | Wireless Output(15W)+ Watch         |  |
| Mode 12 | AirPods + Watch                     |  |
| Mode 13 | Wireless Output(5W)+ AirPods +Watch |  |

| The test data only show worst test mode: Mode 15 |                                       |  |  |  |  |
|--|---------------------------------------|--|--|--|--|
| Mode 16 Stand-by                                 |                                       |  |  |  |  |
| Mode 15  | Wireless Output(15W)+ AirPods +Watch  |  |  |  |  |
| Mode 14  | Wireless Output(7.5W)+ AirPods +Watch |  |  |  |  |

#### **1.3 Description of support units**

The EUT has been tested as an independent unit together with other necessary accessories or support units. The following support units or accessories were used to form a representative test configuration during the tests.

| Support equipment list |                    |            |                                      |  |  |  |  |  |
|------------------------|--------------------|------------|--------------------------------------|--|--|--|--|--|
| Description            | Model              | Serial No. | Manufacturer                         |  |  |  |  |  |

## 4 Test result

#### 4.1.1 Requirement

§1.1310: The criteria listed in the following table shall be used to evaluate the environment impact of human exposure to radio frequency (RF) radiation as specified in §1.1307(b), except in the case of portable devices which shall be evaluated according to the provisions of FCC part 2.1093 of this chapter.

| Frequency range<br>(MHz)                        | Electric field strength<br>(V/m) | Magnetic field strength<br>(A/m) | Power density<br>(mW/cm <sup>2</sup> ) | <pre>v Averaging time   (minutes)</pre> |  |  |  |  |
|---|----------------------------------|----------------------------------|--|---|--|--|--|--|
| (i) Limits for Occupational/Controlled Exposure |                                  |                                  |  |   |  |  |  |  |
| 0.3-3.0   | 614                              | 1.63                             | *(100)                                 | ≪6                                      |  |  |  |  |
| 3.0-30  | 1842/f                           | 4.89/f                           | *(900/f <sup>2</sup> )                 | <6                                      |  |  |  |  |
| 30-300  | 61.4                             | 0.163                            | 1.0                                    | <6                                      |  |  |  |  |
| 300-1500  |                                  |                                  | f/300                                  | <6                                      |  |  |  |  |
| 1500-100000                                     |                                  |                                  | 5                                      | <6                                      |  |  |  |  |
|   | (ii) Limits for Genera           | I Population/Uncontrolled        | Exposure                               |   |  |  |  |  |
| 0.3-1.34  | 614                              | 1.63                             | *(100)                                 | <30                                     |  |  |  |  |
| 1.34-30   | 824/f                            | 2.19/f                           | *(180/f²)                              | <30                                     |  |  |  |  |

| 300-1500  |                                  |                                  | f/1500                                 | <30                                     |  |  |  |  |
| 1500-100000                                     |                                  |                                  | 1.0                                    | <30                                     |  |  |  |  |

Table 1 to §1.1310(e)(1) - Limits for Maximum Permissible Exposure (MPE)

f = frequency in MHz

\* = Plane-wave equivalent power density

**Note 1:** Occupational/controlled exposure limits apply in situations in which persons are exposed as a consequence of their employment provided those persons are fully aware of the potential for exposure and can exercise control over their exposure.

**Note 2:** General population/uncontrolled exposure limits apply in situations in which the general public may be exposed, or in which persons who are exposed as a consequence of their employment may not be fully aware of the potential for exposure or cannot exercise control over their exposure.

#### 4.2 Test setup

#### **4.3 Test Procedures**

a. The RF exposure test was performed in anechoic chamber.

b. E and H-field measurements should be made with the center of the probe at a distance of 15 cm surrounding the device and 20 cm above the top surface of the primary/client pair.

c. The highest emission level was recorded and compared with limit.

d. The EUT was measured according to the dictates of KDB 680106 v03r01.

### 4.4 Equipment Approval Considerations item 5 b) of KDB 680106 D01 v03r01

| Requirement  | Device   |
|--|--|
| 1. Power transfer frequency is less than 1 MHz.  | Yes. The operating frequencies are:<br>Transmitter1: 115 kHz – 205 kHz<br>Transmitter2: 115 kHz – 205 kHz<br>Transmitter3: 326.5 kHz |
| 2. Output power from each primary coil is less than or equal to 15 watts   | Yes. The maximum output power is:<br>Transmitter1: 15W<br>Transmitter2: 5W<br>Transmitter3: 3W                                       |
| 3. The system may consist of more than one source<br>primary coils, charging one or more clients. If more<br>than one primary coil is present, the coil pairs may<br>be powered on at the same time.   | Yes. The EUT has three source primary coils.   |
| 4. Client device is placed directly in contact with the transmitter.   | Yes. The client device is placed directly in contact with the transmitter.   |
| 5. Mobile exposure conditions only (portable exposure conditions are not covered by this exclusion).   | Yes. Mobile exposure conditions only.  |
| 6. The aggregate H-field strengths anywhere at or<br>beyond 15 cm surrounding the device, and 20 cm<br>away from the surface from all coils that by design<br>can simultaneously transmit, and while those coils<br>are simultaneously energized, are demonstrated to<br>be less than 50% of the applicable MPE limit. | Yes.<br>See the test result in item 4.5.   |

#### 4.5 Test results
