Questions

Q: When my headset can be connected to the mobile phone normally, but it cannot be connected to the computer or another mobile phone.

A: Please turn off the bluetooth of the mobile phone that can be connected normally, and then take out the headset to connect with other devices. (Note: The headset has an automatic pairing function, it will automatically connect to the previously connected device, so the second device cannot be connected.)

Q: Is this headset waterproof?

A: The earphones have a nano-coating, which can be applied to daily waterproofing, such as sweat and rain. But it is not suitable for swimming.

If you have any problems with your headset, you can contact our after-sales email: support@forteclear.net. We'd be more than happy to fix your problem, and if we can't, we'd love to send you a new headset.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note:

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and

can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
