Download the Companion App

Scan the QR code as shown on the right (https://www.insta360.com/r/evo_download) or search "**Insta360 EVO**" in the App Store / Google Play to download the companion app.

WiFi Control

- 1 Turn on your smartphone's WiFi and Bluetooth.
- 2 Press and hold the round button on the top of the camera for **3 seconds** to turn on the camera.
- 3 Having successfully installed the app, tap the camera icon  at the bottom of the screen and select "**Connect via WiFi**". Then, follow the on-screen instructions to connect your device. (The name of the camera is "EVO * * * * * * by default", where * * * * * * is the last six digits of the camera's serial number, you can find the serial number on the box the EVO came in). The first time you connect to the camera via WiFi, please press the round button on the top of the camera to confirm your connection.

Note: The camera's effective Bluetooth range is 33 feet (10meters) in optimal conditions.

- 4 Having successfully connected to the camera, you can take photos or shoot videos via the app.

* There are 2 camera modes: 2D VR 360°, 3D VR 180°.

3D VR Glasses

After selecting **VR Preview** in the app, use the included 3D VR glasses as shown below to view 180° 3D photos or videos.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure

To maintain compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

Model No.: CINEVOX/A, CINEVOX
 Operation Frequency: 2412MHz~2472MHz for WIFI 2.4G
 5180MHz~5240MHz for WIFI 5G
 5745MHz ~ 5825MHz for WIFI 5.8G
 Maximum Power: WIFI 2.4G: 15.30dBm (E.I.R.P)
 WIFI 5G: 13.80dBm (E.I.R.P)
 WIFI 5.8G: 6.70dBm (E.I.R.P)
