 If you charging case has no power, the earphone will not power on. In charging case when charging case has no power.
 2 Make sure the earphones are properly placed in the charging case. Please try to clean the contact area between the charging case and the earphones with a dry cloth, keep the charging case clean and dry.

Q5: Why is the playtime not as described?
 A single charge can allow the earbuds to last 20 hours, 5 hours playtime per charge and another 4 recharges by charging case.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, which means that it is suitable for use in residential environments. This equipment generates, uses, and can radiate radio frequency energy and, if not properly installed and used, it may cause interference with other electronic equipment. It is recommended that you follow the installation instructions included in this equipment's manual to reduce the risk of such interference. If you are experiencing interference with other electronic equipment, you may need to consult a qualified technician for assistance. Turning off the equipment may reduce or eliminate the interference.

Caution: Changes to the configuration or software may affect the interference characteristics. This equipment is subject to the following two conditions:
 (1) This device may not cause harmful interference.
 (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Warning Statement:
 This device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restrictions.
