S-TAG Datasheet

S-Label (Electronic Label System)

REV1.0

SoluM

2018-12-19

Summary

This datasheet presents the general performance and specifications of S-Tag for S-Label ESL (Electronic Shelf Label) system, which is based on IEEE 802.15.4.

1 General Description

This S-Tag product is a part of Samsung S-Label (Electronic Shelf Label) system as well as S-Label Gateway (S-Gate), Remote controller (S-RC). S-Label system make up a system that electronically displays price and other product information on S-Tags, which has been traditionally printed or written on paper in places like retail markets.

S-Tag receives product price/information updates from S-Gate and updates or changesits display of price and other information.

S-Tag is the product based on IEEE standard 802.15.4 for low power wireless communication applications. S-Tag consists of RF transceiver, RF circuitry and ARM Cortex M3 MCU offering IEEE 802.15.4 based network protocol and MAC protocol and other peripheral devices.

Figure 1ESL System

1.1 Features

- Display : E-Paper Display (EPD)(active type)(30.7mm x 105.44 mm)
- Display Color : Black, White, Red
- Display Resolution 152X522 pixel (125dpi)
- Communication : Wireless communication based on IEEE 802.15.4
- Operating on 2.4GHz Unlicensed ISM band for ZigBee
- Low Power Consumption
- External Wakeup : RF Wakeup (using ISM Band[2.4GHz])
- Outline Dimension : 129.39mm x 41.12mm x 12.73mm
- Case Color : White
- Working condition: Indoor where wireless communication is available.

1.2 Typical Applications

- Retail industry with electronic displays, platforms, solutions and services.
- Intelligently communicating, managing, and optimizing price and product informations.

1.3 Appearance

Figure 2 Appearance

2 Specification

2.1 Product Specification

Item	Description
Size	129.39mm x 41.12mm x 12.73mm
Battery(Life Time)	CR2450 Lithium Battery (3V) 2.4 ~ 3.3Vdc(condition : In active status) 5 years available for 1 updates in a day at room temperature (The Battery Life time is dependent on the operating conditions for ESL [temperature, etc...])
Display	Electrical paper display (active type) (30.7mm x 105.44 mm) Display Resolution : 152X522 pixel (125dpi)
Housing Color	White
Information display	Price, Unit, Symbol, Product Information etc.
Communication	Wireless communication based on IEEE 802.15.4
Communication Distance	Radius 20m (Line of Sight)
Operation Temp.	0 ~ 40 °C
Storage Temp.	-25 ~ 60 °C
Humidity	35 ~ 70% RH

2.2 Radio (RF)¹ Specification

Item	Parameter	SPEC			Unit	Condition
		Min	Typ	Max		
TX	Transmit Power	-5	0	8	dBm	
	Error Vector Magnitude	-	10	30	%	When measured for 100 chips
	Tx Current		-	35	mA	Total current at max Tx Power
RX	Receiver Sensitivity	-70	-	-	dBm	PER < 1%

¹Test Channel : 2480MHz

2.4 Labels

2.4.1 Serial Number Information

*Serial1,2CodeValue

133GSAA2JW

①②③④⑤⑥⑦

① Year: Last two digits of manufacturing year.

(00~99, example: 2013 is '13')

② Month: Manufacturing month

(1~9, X(10), Y(11), Z(12))

③ Date: Manufacturing date

(1~9, A(10)~V(31))

④ Vendor: One character of manufacturing vendor

((D : Dongguan Solu-M, V : Solu-M Vina., T : TSEM,etc))

⑤ Linenumber: One character of Manufacturing Linenumber

('A', 'B', 'C', etc)

⑥ Revision: Product revision number

(A: First, B: Second, C: Third, etc)

⑦ ZigBee ICLotNumber: Last 3 characters

(032 : SEM9110 1532(15 : Year, 32 : Week))

①		②		③	
년	CODE	월	CODE	일	CODE
2009	09	1	1	1	1

Product and Mac Label Drawings

Figure 5 Product and Mac Labels

Product information is indicated in a printed sticker label. The information consists of MODEL (model name), MFD (manufacturing date), S/N (serial number), MAC (MAC address), CE certification mark, FCC ID and Manufacture (SoluM).

- 1)ModelName:EL043C2WRC
- 2)MFD:(month).(date).(year)ex)MAY.16.2016
- 3)S/N:DailyProductionQuantity(6digits)&SerialNumberInformation
(hexadecimal10digits)

2.5 Barcode Scanning

2.5.1 Barcode Scanning Condition

Typically Scan distance is 8 ~ 9cm and angle is horizontality

Example)

Item	MODEL	Distance	Angle
Scanner	SYMBOL (DS6708-SR20007ZZR)	8~9cm	Horizontality
	DATALOGIC (QUICKSCAN QD2430)	8~9cm	Horizontality
	Motorola (MC3190-SI2H04E0A)	8~9cm	Horizontality
PDA	Motorola (MC17T-00)	6cm	30°
	Motorola (MC4597-BAPBA0000)	8~9cm	Horizontality
	M3 (NA8NWCNMH40078)	8~9cm	Horizontality

<Horizontality> <30°>

3 Operation Test

- Equipments : ESL Tag, Gateway, R/C

Figure 6 Operation Test

- Test Scenario**

- ① Ready to Gateway and R/C
- ② Wake up Tag with R/C
- ③ Tag start to communicate with Gateway
- ④ Tag display the numeric information received from Gateway
- ⑤ Check Tag(EPD display status & MAC address value)
- ⑥ Wake up Tag with R/C
- ⑦ Check Tag(EPD display(blank display))

- Criterion** (Below both two conditions should be all satisfied)

- ① Good :You can see 'Black' →'White' display
- ② Compare MAC address with that of label attached to Front or Back plane.

- Wake up area

Figure 7 Wake up Area

4 ESL Operation by display

It will be updated before 2nd release. Below is just a sample.

Display	State	User Action
	<p>STATE: 0</p> <p>Initial display when shipped from the manufacturer (All white).</p>	<p>None</p>
	<p>STATE: 1</p> <p>No change.</p>	<p>To assign a tag using a PDA</p>
	<p>STATE 1 → 2</p> <p>Searching for GWs (Tag version, MAC address and triangle).</p>	<p>Assign Process</p> <p>→ Remove tape on the tag and then Tag can start to search the gateway automatically w/o beeper</p>

 <p>WAL G MUCUS REL PETABLETS BUY 2 FOR 19.99 OR \$15 EA 60CT Model#</p>	<p>STATE 2 → 4</p> <p>A tag is connected to a GW and received price (Price)</p>	<p>None</p>
 <p>ZZZ XXXXXXXXXXXXXXXX</p>	<p>STATE 2 → 3</p> <p>A tag failed to locate a GW (Tag version, MAC address).</p>	<p>Lost Status</p>
 <p>WAL G MUCUS REL PETABLETS BUY 2 FOR 19.99 OR \$15 EA 60CT Model#</p>	<p>STATE 4 → 5</p> <p>Connection to a GW is lost (price and Rectangle on upper right corner)</p>	<p>Lost Status</p> <p>→ Even Tag lost GW, price and other information keep to be displayed with lost symbol'◆'</p>
 <p>WAL G MUCUS REL PETABLETS BUY 2 FOR 19.99 OR \$15 EA 60CT Model#</p>	<p>STATE 5 → 6</p> <p>When connection is lost and woken up by an RC (blinks with the price and Rectangle) Starts to search GWs.</p>	<p>Woken up by abeeper</p>

 A rectangular box representing a display screen. Inside the box, the text 'ZZZ' is centered on the top line, and 'XXXXXXXXXXXXX' is centered on the bottom line.	<p>STATE 4→ 1 Initial display (Tag version, MAC address).</p>	<p>To clear an assigned tag using a PDA</p>

6 Cautions for Treatment

Provisions should be made to protect against any damage to the product caused by improper handling.

It is highly recommended that the product should be installed within 3 months from the date of arrival in the logistics hub. Recommended storage condition is in 0-40 Celsius degree, 35-70% RH environment.

This RF device operates on the 2.4GHz frequency band and can produce radio interference. The device, therefore, may not be used for applications where safety of human lives is concerned.

6.1 Usage Environment

Take extra cautions when using this RF device in the vicinity of other electronic devices and appliances. Most electronic devices and appliances use electromagnetic waves. Electromagnetic waves emitted by this RF device can affect other electronic devices and appliances.

If using the device in an explosion hazard area, follow all safety regulations, instructions, and signals.

6.2 Storage and Use

- Moisture and liquids can damage internal parts and circuit boards if allowed to enter into the device itself.
- Do not place or store the product on a sloped surface. The product may slide and fall off the surface and damaged.
- Use the product in temperatures ranging from 0°C to +40°C. Parts and circuits may be damaged if used or stored under temperature extremes.
- The display panel needs extra care when handling.
 - Do not apply any impacts on outside since e-Paper display is fragile.
 - Continuous exposure to excessive moisture (over 60% RH) or UV makes display lifetimeshortened.
 - Ghosting image may be appeared in temperature conditions of less than 15 Celsius degree.
- Avoid areas with strong magnetism or subject to magnetism.

Contact between the device and a magnetic object can lead to malfunctions.
- Do not place the product near heat-producing kitchen appliances like a stove or a microwave or in the vicinity of highly pressurized containers.

- External impact to the product, such as from being dropped, can damage the product battery casing can be separated.
- Twisting and bending the product can damage the exterior casing and the internal components.
- If this product operates abnormally in eliminating battery vinyl or replacing battery, you should discharge it by contacting battery terminal (+) and (-).
- This product uses 2.4GHz frequency band for wireless communication network. Radio communications can be limited or affected by other applications which share same frequency band, such as WiFi, Bluetooth, Zigbee, etc.
- Frequent communications, updates and screen renewals may reduce battery life time

6.3 Battery Replacement

Audience

Authorized persons with the following knowledge are allowed to replace the battery.

- . Battery / -. Electronic assemblies like circuit board / -. Compliance of the instruction

- ※ Note : If not authorized person, it will not give any warranty.

(When need to replace the battery. Please contact authorized person and get instructions.)

Instructions

- Risk of short circuit if battery is incorrectly installed/stored.
- Keep attention that your hands are dry before you start with replacement
- Keep away batteries from children and infants.
- Don't heat, charge, bend, drop, short-circuit and disassemble battery.
- Don't mix the used battery together with the new battery or different type of batteries.

※ Note : Battery rarely has a little stain or leak.

■ Battery directional

Steps

- ① Open the battery cover.
- ② Take out the batteries.
- ③ Put in the new batteries.
- ④ Check the batteries direction.
- ⑤ Put the battery cover.

[View] Top : (+)Positive
Bottom :(-)Negative

6.4 How to cleaning

For Spray Cleaning:

- Stand Tags not to lay down tags
- Lightly spray surfaces and wait few second
- Wipe dry using cloth or tissues.
- Dry out tags

Note:

- When spray the tags, make sure not to flow any liquid into inside tags
- It may damage tags directly, circuit and battery.
- You can use mild, non-alcoholic detergents or glass cleaner.
- Recommend non-abrasive cloths: Microfiber, Cotton T-shirt ,Cotton handkerchief, Cotton tea towel

For Wet Tissue Cleaning:

- Lay down tags or stand tags
- Wipe using wet tissues
- Dry out tags

We do not guarantee any water damaged tags

WARNING : This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1)

This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE :

Compliance information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

(1) This device may not cause interference.

(2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Caution: Exposure to Radio Frequency Radiation.

To comply with FCC RF exposure compliance requirements, a separation distance of at least 20 cm must be maintained between the antenna of this device and all persons.

Attention: exposition aux radiations de fréquence radio.

Pour être conforme aux exigences de la FCC en matière d'exposition RF, une distance de séparation d'au moins 20 cm doit être respectée entre l'antenne de cet appareil et toutes les personnes.

Caution: Any Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

Attention: Tout changement ou modification non expressément approuvé par le fabricant peut annuler le droit de l'utilisateur à utiliser l'équipement.

Class A Digital Device : Wired Device

This Apparatus complies with class "A" limits for radio interference as specified in the Canadian department of communications radio interference regulations.

Appareil numérique de classe A: appareil filaire

Cet appareil est conforme aux normes class "A" d'interférence radio tel que spécifier par ministre canadien des communications dans les règlements d'interférence radio

This Class A digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.
