Mining depends on precision, accuracy, and safety. Mines must find ways to integrate, automate, and optimize critical workflows for a competitive edge. Hexagon Mining is the only company to solve surface and underground challenges by integrating design, planning, and operations technologies for safer, more productive mines.

Headquartered in Tucson, Arizona, with more than 30 offices across five continents, the company is a dynamic network of talented mining professionals delivering technology, service, and support.

Hexagon Mining seamlessly links mine planning, design, fleet and production management, optimization, and collision avoidance software for a comprehensive flow of data across all operations.

Hexagon Mining is built on more than a century of expertise and innovation. Driven by professionals for professionals, our solutions are tailored to your needs and delivered on your terms – short term, long term, for the life of your mine.

Hexagon Mining is part of Hexagon (Nasdaq Stockholm: HEXA B), a leading global provider of information technologies that drive quality and productivity improvements across geospatial and industrial enterprise applications.
