Notes:

Multiple Model - Has the same appearance, structure, PCB, Material and function to the tested model

The only difference is the firmware loaded onto the unit (AVI-B-LVFA-12-24VDC-(x)CH) & BOM Population along with different attached Battery.

AVI-B-NTM-12-24VDC

AVI-B-LVFA-12-24VDC-(x)CH

-1CH / -2CH: The Main Model is a Single CH Firmware (CH refers to Channel which is the # of 0-10V Output Lines available for Dimming & CCT Control) so if show as -1CH it's a Single Channel, and if it's Dual Channel it's specified -2CH in MPN. Both models have the same Connector and have slots for +CH1, +CH2 & -CH (GND), if Single Channel then the +2CH Slot is unused.

AVI-B-NTM-12-24VDC

The main difference other than Firmware & BOM population options. The larger case is to allow a Battery Pack to be attached to the main Header of the PCB.

For all Models the AVI-B-LVFA-12-24VDC-2CH, AVI-B-NTM-12-24VDC Module is identical, the PCB is identical, Voltage & Power requirements are identical.

Besides the differences in the table above, we declare the products are identical.

We guarantee all the information provided above is true, and notice that we'll bear all the consequences caused by any false information or concealing.
