

## IFETEL

"la operación de este equipo está sujeta a las siguientes dos condiciones: (1) es posible que este equipo o dispositivo no cause interferencia perjudicial y (2), este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada."

---

SE RECOMIENDA LEER SU GUIA DE USUARIO ANTES DE OPERAR SU EQUIPO Y GUARDELO PARA FUTURAS REFERENCIAS

---

### ALIMENTACION:

TELEFONO REDMI 2 PRO: 5 Vcc

BATERIA RECARGABLE: 3.8 Vcc

ADAPTADOR ca/cc:

ENTRADA: 100-240 Vca 50/60 Hz 0.2A

SALIDA: 5 Vcc 1000mA

---

### Precauciones / Medidas de Seguridad:

- Seguridad al conducir: Utilizar el teléfono celular mientras conduce es peligroso y debe evitarse a toda costa. Si necesita hacer o recibir una llamada urgente, estacione su vehículo en la calle y espere a que se detenga completamente antes de utilizar su teléfono.
  - Apagar en ambientes potencialmente peligrosos: Los teléfonos inalámbricos pueden interferir en el funcionamiento de aeronaves, bombas de combustible, equipamientos médicos en hospitales y cerca de locales propensos a explosiones. Es extremadamente importante que no utilice el teléfono celular mientras esté en cualquiera de los locales indicados anteriormente.
  - Interferencia: Todos los teléfonos están sujetos a interferencia, que afectará su funcionamiento.
  - Uso consciente: Use el teléfono solamente en su posición normal. No toque el área de la antena a menos que sea necesario.
  - Uso de servicios calificados: Solamente el personal de mantenimiento calificado puede montar o reparar el equipo.
- Impermeabilidad: Su teléfono no es impermeable, manténgalo seco.**
- Batería: Para evitar peligros, no arroje la batería al fuego y mantenga la batería alejada del fuego. No arroje la batería usada a la basura, debe enviarlas al centro de reciclaje designado.
  - Precauciones para niños: Mantenga el teléfono fuera del alcance de los niños, para que no lo usen como un juguete, y así evitar que se lastimen.

## FCC Regulations:

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### FCC Note:

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## RF Exposure Information (SAR)

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 10 mm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless devices employing a unit of measurement is known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg.

This device is complied with SAR for general population / uncontrolled exposure limits in ANSI/IEEE C95.1-1992 and had been tested in accordance with the measurement methods and procedures specified in IEEE1528.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of [www.fcc.gov/oet/ea/fccid](http://www.fcc.gov/oet/ea/fccid) after searching on FCC ID: 2AFZZ-H2X819.

For this device, the highest reported SAR value for usage against the head is **0.79 W/kg**, for usage near the body is **1.19 W/kg**.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirements.

SAR compliance for body-worn operation is based on a separation distance of 10 mm between the unit and the human body. Carry this device at least 10 mm away from your body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 10 mm between this device and your body.

RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and use such body-worn accessory should be avoided.
