Xiaomi Communications Co., Ltd.

UNII Declaration Letter

(1) DFS Device	We	have declared below	w featured for FCC ed	quipment authorizatio	n, device FCC ID: 2A	AFZZRP89G		
Frequency Band (MHz)	(1)	DFS Device						
(MHz) (the device can transmit a probe (beacon)) (where the device capability capability (beacon)) (can listen only with no probes) 2412 – 2462 MHz	(2)	Active / Passive Sca	inning , adhoc mode a	access point capabilit	у			
S150 - 5250 MHz		(MHz)	(the device can transmit a probe (beacon))	(where the device is can listen only with no probes)	capability	capability		
S250 - 5350 MHz								
S725 - 5850 MHz		5250 – 5350 MHz	☐ Yes, ☒ No		☐ Yes, ☒ No	☐ Yes, ☒ No		
(3) Country code selection ability - Yes , No If no, pls explain how was implemented: use Microsoft network utility (4) Meet 15.202 requirement - Yes , No , pls check below: Amster device is defined as a device operating in a mode in which it has the capability to transmit without receiving an enabling signal. In this mode it is able to select a channel and initiate a network by sending enabling signals to other devices A client device is defined as a device operating in a mode in which the transmissions of the device are under control of the master. A device in client mode is not able to initiate a network. (5) For client devices that have software configuration control to operate in different modes (active scanning in some and passive scanning in others) in different bands (devices with multiple equipment classes or those that operate on non-DFS frequencies) or modular devices which configure the modes of operations through software, the application must provide software and operations description on how the software and / or hardware is implemented to ensure that proper operations modes can not be modified by end user or an installer. Apply No Apply. No Apply, No Apply. (If apply, pls help to provide explanation on how it was implement (By hardware or software, and how software was controlled) The active or passive mode was controlled by software. For non-DFS frequency used active scanning, for DFS frequency was switched to passive scanning by software Mechanism If you have any questions, please feel free to contact me at the address shown below. Yours sincerely, Signatory Contact Person: qingyaozeng						<u> </u>
