1. Product Overview

1.1 Introduction

Baicells is a high-tech company dedicated in wireless broadband access solutions and service operation. With the advent of the Internet+ era, the development of WBB is imminent. Through continuous innovation, Baicells launches the world first mobile broadband system based on the Internet architecture and unlicensed spectrum. Baicells can provide series CPEs, include indoor and outdoor unit on different spectrums.

Baicells EG7035E-M1 is a high performance outdoor CPE. The EG7035E-M1 has the superior wireless access performance and comprehensive routing capabilities, which have the abilities to bring the end-users WBB services.

1.2 Features

The EG7035E-M1 is designed according to the simplicity principle, which can evolve in a short period and realize fast customization, delivery and deployment as well. The main features of the EG7035E-M1 is as follows:

- Support TD-LTE network according to the operator's choice.
- Support the 100Mbps Ethernet interface.
- Intuitionist and convenient Web-based management.
- Built-in LTE bipolar directional high gain antenna.
- Support TR069 and OMA-DM network management protocol.
- Support cell lock, SIM lock, and Pin lock.
- User-friendly design of LED indicator.
- Power supply with PoE.
- Support pole installation or wall mounting.

1.3 Appearance

The EG7035E-M1 appearance is shown in Figure 1-1.

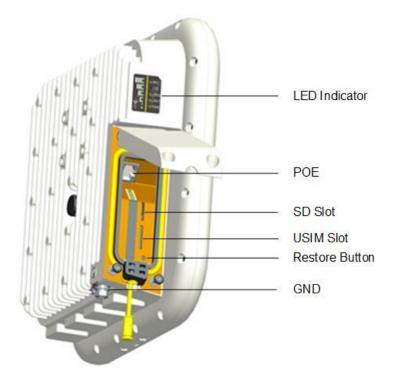

Figure 1-1 EG7035E-M1 Appearance

The EG7035E-M1 interfaces and buttons are shown in Figure 1-2.

Figure 1-2 Interface and Button of EG7035E-M1

The EG7035E-M1 interface and button description is given in Table 1-1.

Interface & Button	Description			
PoE	Connected to the PoE power adapter			
SD slot	Support SD card			
USIM Slot	Support 1.8V/3.0V USIM 2FF			
Restore Button	Long press over 10 seconds to restore the factory settings			

Table 1-1 Description	of EG7035E-M1	Interface and Button
Iable 1-1 Description	01 L070331-1011	Internace and Dutton

Interface & Button	Description
LED Indicator	LTE signal strength Indicator& status indicator
GND	Connected to Earth by conductor

The LED indicators are shown in Figure 1-3.

Figure 1-3 LED Indicators of EG7035E-M1

	●MIU
	OLTE
	●SIM
	●LAN
Ϋ́	●PWR

The description of LED indicators are given in Table 1-2.

Table 1-2 LED Indica	tor Description
----------------------	-----------------

Identity	Description	Color	Status	Description	
MIU		Yellow	OFF	Reserved.	
	-		Steady On	Reserved.	
			Blanking	Reserved.	
LTE	Network state		OFF	LTE disconnected.	
	Indicator	Blue	Steady On	LTE connected.	
SIM	SIM card status	Yellow	Steady On	The SIM card is normal.	
	indicator		Blanking	The SIM card is abnormal or not inserted.	
LAN	100Mbps Eth Indication	Yellow	OFF	Ethernet connection does not established.	
			Steady On	Ethernet connection is normal.	
			Blanking	Data is transmitting.	
PWR	Power Indicator	Yellow	OFF	No Power Supply	
			Steady On	Power On	

Identity	Description	Color	Status	Description	
LTE Signal	5 LTEs, Indicate	Green	All OFF	Signal is too	weak to attach.
	connection state and signal strength		Steady On	According to signal strength in turn light up	
			Blanking	0	Scanning the LTE network
				20	The CPE is authenticating.
				110 10 0	CPE is getting IP address from the LTE network.

2. Technical Specifications

2.1 Basic Specification

Table 2-1 Basic Specification					
Item	Description				
LTE Standard	3GPP Release 9				
Ethernet LAN Port	One RJ-45 port 10/100 auto-sensing, auto-MDX,				
	PoE				
LED Indicators	Power/LET Signal/LAN Indicator				
USIM	Support 1.8V/3V 2FF				
Restore Button	Tact Button				
	Long press over 10s to restore the factory settings				
Power Supply	Input: Universal range 100V~240V AC				
Dimension	About 248mm * 248mm * 80mm				
Weight	About 1800g				
Color	Pantone white C				

Table 2-1 Basic Specification

2.2 **RF Specification**

Item	Description
Mode	TDD LTE
Channel Bandwidth	5 MHz /10 MH z /15 MHz /20 MHz
MAX Output Power	23±2 dBm
LTE Standard	3GPP R9
Frequency	2496MHz~2690MHz for FCC
	2570MHz~2620MHz for IC
Antenna Gain	14 dBi

Table 2-2 RF Specification

2.3 SW Specification

Item	Description
Language Settings	English
Network Mode	Bridge / NAT

ltem	Description
SIM	PIN Management
	SIM Lock
Network Connection setup	Create, delete, and edit APNs
	Set up dial-up connection automatically
	Set up dial-up connection manual
LTE Scan Mode	Full Band
	Cell Lock
	Band / Frequency Preferred
VPN	Support VPN pass through
	Support PPTP tunnel mode
NAT	Port forwarding
	Port trigger
	• DMZ
	• UPnP
Statistics	LAN Link Status
	Transmit / Receive traffic
	Running Time

2.4 Device Management

Table 2-4 Device	Management
------------------	------------

ltem	Description				
Maintenance	Date & Time setting				
	Reset				
	Restore factory settings				
	Restore/Backup Configuration File				
	Local upgrade				
	FOTA upgrade				
TR069	Can enable or disable TR069 Management				
Port mirror	Can enable or disable the port mirror function				
Syslog	Support the syslog function can send the log to the				
	PC via LAN				
Diagnostics	Support the Ping and trace route				

2.5 Environment Specification

Table 2-5	Environment	Specification
	Linvinoriniterite	specification

Item	Description
Operating Temperature	-40°C ~ 55°C
Storage Temperature	-40°C ~ 70°C
Operating Humidity	5% ~ 95%

3. Installation Guide

3.1 Support Materials

Before installation, prepare the following support materials accordingly, as given in Table 3-1.

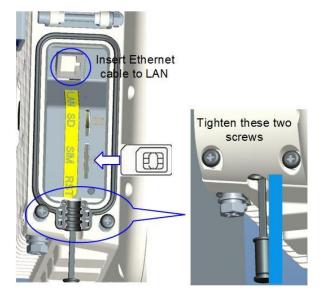

Item	Description
Ethernet cable	Outdoor Shield CAT5E
	Shorter than 330 feet
Ground wire	16mm ² yellow-green wire

Table 3-1 Support Materials for Installing

3.2 Install USIM Card and Ethernet Cable

- 1. Screw the two screws on the waterproof cover.
- 2. Open the waterproof cover, and connect the Ethernet cable to the Ethernet interface.
- 3. Insert the USIM card to the USIM slot. Note following the directions.
- 4. Close the waterproof cover and tighten the two screws on the cover, as shown in Figure 3-1.

Figure 3-1 Install Ethernet Cable and USIM Card

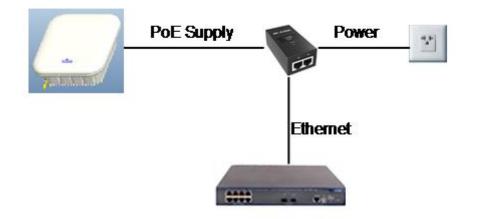

5. Connected Ethernet cable to the power adapter, as shown Figure 3-2.

Pay attention to the power adapter interface directions.

Figure 3-2 Connection Diagram

6. Power on, the LED indicator will light up.

3.3 Install on Pole

1. Tighten the screws at the bottom of the bracket, as shown in Figure 3-3.

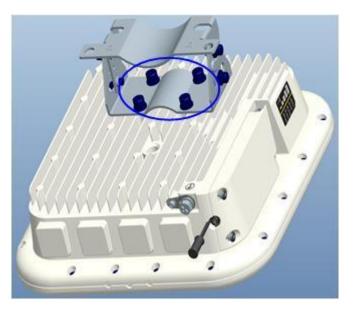

Figure 3-3 Install the Bracket

2. Install the bracket on pole as shown as Figure 3-4.

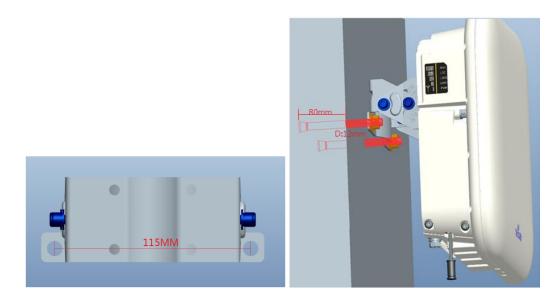

Figure 3-4 Install on Pole

3.4 Install on Wall

Install bracket on wall as show as Figure 3-5.

Figure 3-5 Install on Wall

3.5 Grounding

The EG7035E-M1 must be grounding, please contact professional person to operation.

Using grounding cable, connect the grounding screw to the ground row, as shown in Figure 3-6.

Figure 3-6 Grounding

3.6 Regulatory Compliance

FCC Compliance

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Warning

This equipment complies with FCC radiation exposure limits set forth for an

uncontrolled environment. This equipment should be installed and operated with minimum distance 40cm between the radiator & your body.

ISEDC Compliance

The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 40cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter, End-Users must be provided with transmitter operation conditions for satisfying RF exposure compliance.

Les antennes utilisées pour cet émetteur doivent être installées de façon à offrir une distance de séparation d'au moins 40cm entre toutes les personnes et ne doivent pas être colocalisées ou fonctionner conjointement avec d'autres antennes ou transmetteurs. pour satisfaire la conformité à l'exposition RF.

4. Configuration Guide

4.1 Log in

The EG7035E-M1 manages, configures, and maintains the device by web management page. The steps to log in are as follows:

1. In the address column of browser, type in http://192.168.150.1, then press "Enter",

Figure 4-1 Login Page				
4G Router				
4	Username			
P	Password			
	LOGIN			

login in page is shown in Figure 4-1.

2. Enter the user name and password, click "LOGIN". After password authentication,

you can log on to the web management page.

The default user name and password is admin.

For security, it is recommended that you open the firewall, and keep your login password, WLAN FTP passwords and password well.

4.2 View Status

In the overview area, you can view the device information and LTE status, such as Product name, Software version, PLMN, IMSI, RSRP, RSRQ, CINR, SINR, Tx Power, Cell ID, PCI, and so on, as shown in Figure 4-2.

Figure 4-2 View Status

4.3 Basic Configuration

4.3.1 LTE Setting

To set the LTE Network, perform the following steps:

- 1. Choose LTE.
- 2. In the LTE Setting area, configure the LTE network.

4.3.2 Set Connection Method

To set the LTE network connection method, perform the following steps:

 Choose "LTE>connection Method", enter the setting connection method page, as shown in Figure 4-3.

Figure 4-3 Set Connection Method

Baroono			
Status	LTE Cattings

Security		SAVE & APPLY	
VPN			

- 2. In the connection Method area, set the connection method
- There are two methods to connect the LTE network, it is needed to choose a method between Auto and Manual, if you want to auto connect to the LET network you should choose the Auto, otherwise you should choose Manual.
- 4. Click "SAVE & APPLY".

4.3.3 Set Scan Mode

To set the LTE network scan mode, perform the following steps:

1. Choose "LTE>Scan Method", enter the setting scan method page, as shown in Figure

4-4.

Figure 4-4 Set Scan Mode

VPN		SAVE & APPLY			
System					

- 2. In the Scan Method area, set the scan mode
- 3. You can choose full Band, Frequency Lock, or PCI Lock.

4.3.4 Lock Frequency (Earfcn)

To clock the frequency, perform the following steps:

- 1. Choose "LTE>Scan Method".
- 2. In the LTE Scan Method area, click Frequency Lock to lock the frequency.
- 3. Click **ADD LIST**, choose a band and frequency, and then click **Add** to add the band and frequency to the list, as shown in Figure 4-5.

Appendix A FAQs

The POWER indicator does not turn on.

- Make sure that the power cable is connected properly and the CPE is powered on.
- Make sure that the power adapter is compatible with the CPE.

Fails to Login to the web management page.

- Make sure that the CPE is started.
- Verify that the CPE is correctly connected to the computer through a network cable. If the problem persists, contact authorized local service suppliers.

The CPE fails to search for the wireless network.

- Check that the power adapter is connected properly.
- Check that the CPE is placed in an open area that is far away from obstructions, such as concrete or wooden walls.
- Check that the CPE is placed far away from household electrical appliances that generate strong electromagnetic field, such as microwave ovens, refrigerators, and satellite dishes.

If the problem persists, contact authorized local service suppliers.

The power adapter of the CPE is overheated.

- The CPE will be overheated after being used for a long time. Therefore, power off the CPE when you are not using it.
- Check that the CPE is properly ventilated and shielded from direct sunlight.

The parameters are restored to default values.

• If the CPE powers off unexpectedly while being configured, the parameters may be restored to the default settings.

After configuring the parameters, download the configuration file to quickly restore the CPE to the desired settings.
