

Attn: Director of Certification

Cover letter regarding Class II Permissive Change application for FCC ID: 2AG3J-RF2150

The applicant is seeking approval for a Class II Permissive Change allowing the use of the limited radio module with FCC ID: 2AG3J-RF2150 in a new host product. The new host is called Embedded Module and has a model number WR-5200. This new host will use the same antennas as specified for use with the original host. However, the new host will not be used in a portable configuration, but only in mobile configurations. Also, the path loss between the radio module and the antennas will be greater than or equal to that of the original host. Therefore, the conducted data from the original filing still applies with the new host product. A test report showing radiated spurious emissions data measured with the radio module installed in the new host is included in this filing.

Sincerely,

A handwritten signature in blue ink that reads 'Martin Taylor'.
