symbol

Into the editing interface, the default input method is "pinyin", press "*" key, the screen in the candidate symbol, press the direction key to move the cursor to select symbols, press "confirm" can select symbols.

5. Maintenance and maintenance

Battery maintenance

•This phone is a rechargeable battery as a power source. When power weak, please send the battery. To maintain battery life, the best will run out the battery before charging.

•When the battery charger is not used, please with the power supply source separation. Do not connect the charger with battery more than a week, over charge will shorten the battery life.

•Temperature affects the limits of the battery to charge. So, before charging the battery may need to be cool or warm. If the battery more than 40 degrees Celsius temperature, the battery can't charge.

• please put the battery on its original use, avoid to cause the battery to short circuit. When the conductive material is connected directly to battery cathode will cause a short-circuit.

•Do not use the damaged cells.

• put the battery in extremely cold or hot place can lead to shorten the battery life, battery exposed to cold or hot place may lead to can't normal mobile phone function, even if the battery is the electricity as well.

• please don't put battery in the fire! Please according to the local regulation to deal with waste batteries.

Mobile phone maintenance

The following Suggestions will help you to take care of your mobile phone:

•All mobile phones and accessories, far from where the children can touch.

•Please keep the body dry, liquid can cause metal corrosion circuit.

• please take the body away from high temperature, high temperature will shorten the service life of electronic devices, melt plastic and damage to the battery.

•please do not attempt to open the cabinet or cell phone, non-professional disassembly may cause damage of the body.

•do not use strong acid or alkaline detergent to clean the body.

Only use a mobile phone original accessories. Violation of these may lead to warranty.

6. The security information

When using your mobile phone, must abide by the environment and to protect the user from safety regulations.

The traffic safety

•unless there is an emergency, if not installed to ensure the safety and freedom of hands-free devices, please do not use cell phone when driving, to ensure that you concentrate on driving, please put the car to a safe place to use a mobile phone. Please abide by relevant laws and regulations.

•Without enough protection, car of some electronic system may be affected by your phone launch waves.

• it is recommended that you only use of mobile phones in cars with external antenna.

• only qualified technicians can install your cell phone in your car.

The safety of the flight

Before boarding the plane, please close your mobile phone, because it affect the operation of the flight and the cellular network. Aircraft on cell phone use is illegal, in violation of these safety regulations will be prosecuted or denial of service caused by GSM network.

Environmental safety

• remember that in any place to comply with the current specific rules and regulations, where the ban on the use of mobile phones, or may cause interference or danger, be sure to turn it off.

•the use of any wireless transmission equipment, including cellular phones, is likely to interfere with some improper protection of medical equipment. If you have any questions, in this regard can contact the doctor or medical equipment manufacturers.

• your mobile phone is likely to interfere with some hearing AIDS, pacemakers and other medical electronic equipment. Please comply with the doctor or medical equipment manufacturers to provide advice.

•Anywhere in the likely to cause explosion, such as gas stations, chemical plant, suggest users to turn off the phone.

To comply with the requirements of the limitations about the use of wireless devices.

7. The technical specification

The range of the network: GSM900MHz/DCS1800MHz

The actual situation of mobile phone use and the local network environment situation, SIM CARDS and users to use.

Instructions: if involves the version upgrade, without prior notice. The company has finally of this manual

The power of interpretation.

Warning: due to the user does not comply with the above Suggestions or consequences caused by the improper use of mobile phones, manufacturers disclaim all responsibility.

FCC Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

▢ FCC RF Exposure Information and Statement

This GSM DIGITAL MOBILE PHONE meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: X6 (FCC ID: 2AG3UXJDX6) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.180W/kg and when properly worn on the body is 1.399W/kg. This device was tested for typical body-worn operations with the back of the handset kept 0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
