

## Wireless Controlled 0 -10V Dual Channel Dimming DC Device

**WCD2CS** is a wireless controlled dual channel dimming module powered by 12- 24V DC and controlled or monitored via mobile device or cloud platform.

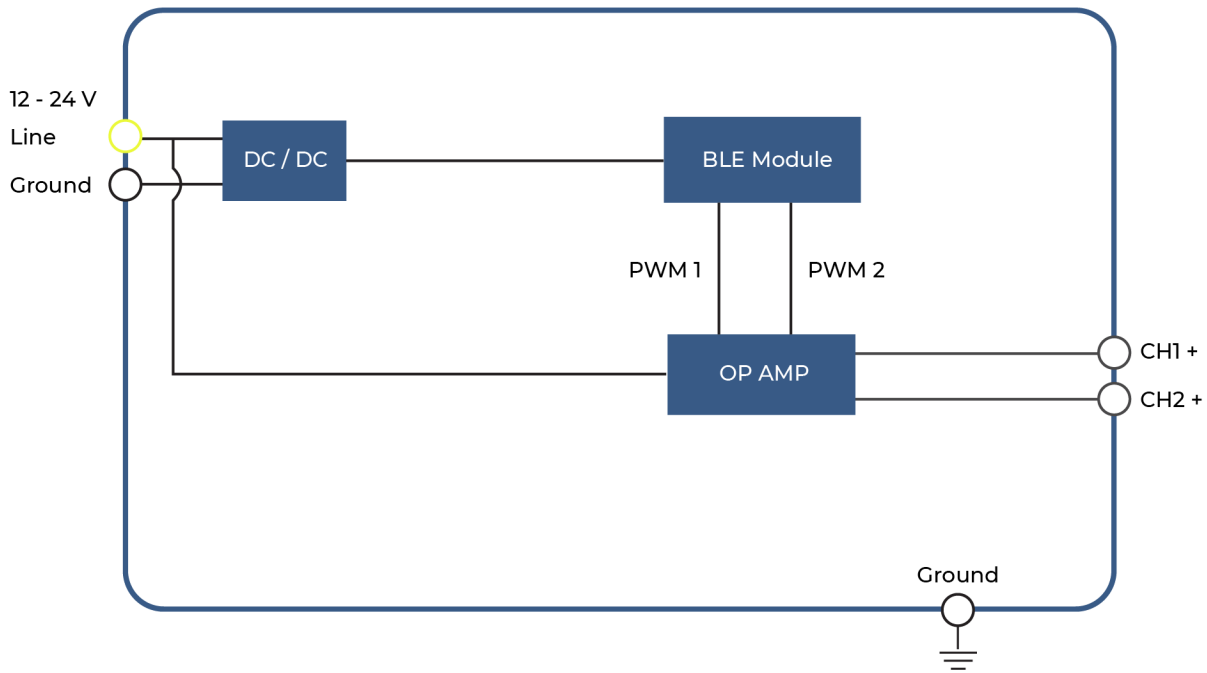

### Key Features

- **Analog 2Channel** (0-10V) independent **output** to control intensity and color
- **BLE4.2** based non-flooding intelligent **Mesh**
- Zero downtime Over the Air firmware (**OTA**) updates

## 1. Block Diagram

## 2. Specifications

Electrical	Symbol	Min	Typ.	Max.	Unit.	Remarks
Input Voltage	V <sub>in</sub>	12		24	Vdc	Rated Input voltage
Input Current	I <sub>in1</sub>		10	15	mA	@24Vdc, Max RF transmitting
<b>Analogue Dimming Output</b>						
Dimming Output1	V <sub>adimo1</sub>	0		10	V	Max output tolerance ±5%
Dimming Output2	V <sub>adimo2</sub>	0		10	V	Max output tolerance ±5%
Output Current				15	mA	For dimming max output
Dimming Range		0		100	%	
Dimming Resolution			8		bit	100 steps
Dimming Curve			Linear			
Cut Off Voltage			1		V	Programmable

### Bluetooth

Frequency Range	2400	2483.5	MHz	
TX Power	6	8	dBm	Conductive
Frequency Drift(Max)	-25	25	kHz	dF2
Frequency Deviation	±225	±275	kHz	
Carrier Frequency offset		30	150	kHz
TX current			48	mA Total current@ Max Tx power
Receive Frequency	2400	2483	kHz	
Rx Current			-37	mA Total Current @Rx Mode
Receiver Sensitivity	-86	-75	dBm	

Environmental	Symbol	Min	Typ.	Max.	Unit.	Remarks
Ambient Temperature	t <sub>a</sub>	-20		50	°C	
Storage Temperature	t <sub>s</sub>	-20		70	°C	
Relative Humidity				85	%	
IP Rating			IP20		-	Indoor use only
Dimensions			66*47*29		mm	L x W x H (mm)
Net Weight		80	90	100	g	T.B.D

Dimming	Type	Note
Dimming Control 1	0 – 10V	Analog

### 3. Device Dimensions (mm)

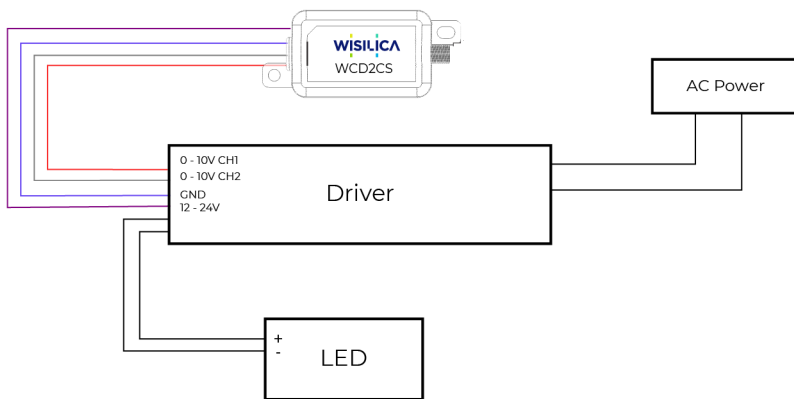

Case Material : 5VA

## 4. Wire Description

PIN	SYMBOL	COLOR	DESCRIPTION
1	CH1+	Purple	CH1 0 to 10V Analog Output
2	CH2+	Blue	CH2 0 to 10V Analog Output
3	GND	Grey	12V Ground
4	12V	Red	12V(Input)

## 5. Wiring Diagram

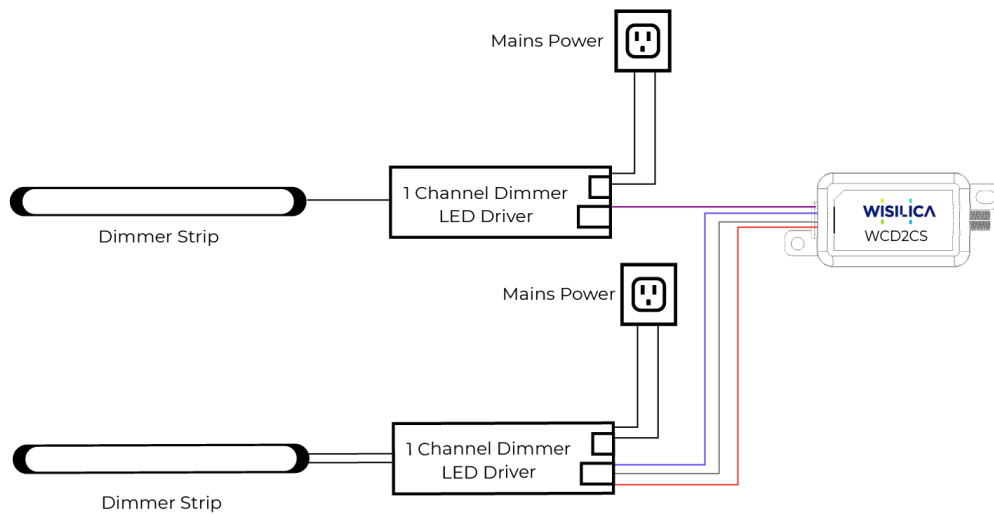

## 6. Use Cases

1. Controlling Intensity and CCT of LED bulb

## 2. Controlling LED bulb with Sensor Inputs

## 7. User Precautions

- Observe the correct polarity of output terminal.
- Avoid input voltage exceeds the maximum rating, which will cause damage to the circuit and result in malfunction
- Static electricity or surge voltage may damage the components inside LED Driver, to avoid this please follow the proper anti-electrostatic working process.

## 8. FCC Statement

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- 
- RF Exposure Information
- The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
