## 1 Basic knowledge

### 1.1 Safety warnings and precautions

Before you use your mobile phone please read these notes carefully to ensure that you are using your mobile phone safely and correctly.

### 1.2 General considerations

#### Mobile phone

- ✧ Please - 55 DEG C to 35% ~ 85% of the temperature and humidity environment using a mobile phone.
- ✧ Please as far as possible away from ordinary telephone, TV, radio and office automation equipment in place to use the phone, so as not to affect the use of these devices and mobile phones.
- ✧ SIM card can be removed, please pay attention to avoid the child swallowed such a small part.

#### Battery

- ✧ Please place the battery in a place that is not under direct sunlight, cool and ventilated place.
- ✧ Cell phone battery life is limited, the battery's use of time in the frequent charging gradually shorten. Multiple charging is invalid, that the battery life has been done, it should be replaced by the specified model of the new battery.
- ✧ Do not throw old batteries in the general life garbage. Please do it in accordance with the regulations where there are clearly defined requirements for the disposal of waste batteries.

#### Charger

Please don't in the following places charge: direct sunlight; the outside temperature lower than - 10 DEG C or above the 45 DEG C; damp, dusty place or vibration of place (caused by fault); television, radio and other electrical appliances near (will affect the image, sound effects).

### 1.3 Note on the use of mobile phones

In the plane, a hospital at the prohibition of the

use of mobile phones, please turn off the phone. Mobile phones will be the normal work of the electronic equipment and medical instruments, in these places use mobile phones, please follow the relevant provisions of the. Mobile phone has timing and automatic starting and alarm clock function, please check the phone settings, to confirm in the flight process does not automatically boot. At any time aboard the aircraft must be shut down, so the phone jamming system, causing the accident aircraft.

Please do not use mobile phones in the vicinity of the weak signal or high precision electronic equipment. Radio interference may cause electronic equipment malfunction and other problems. Especially in the following equipment near the need to pay particular attention to: hearing aids, pacemakers and other medical electronic equipment, fire detector, automatic doors and other automatic control device. The impact of pacemakers and other medical electronic equipment, please consult the manufacturer of the device or local vendors. Mobile phones may interfere with television, radio, or personal computers electrical equipment

The risk of not on liquid crystal display force or hitting other things with it, otherwise it will causes the liquid crystal plate breakage and LCD liquid leakage. Liquid crystal into the eyes will be blind, then please immediately flush with plenty of water for eye (do not rub the eye) and to the hospital.

Do not remove or modify the phone, otherwise it will cause damage to the phone, leakage and circuit failure.

In very few cases, the phone in some models of the car when it may have a bad effect on the car's electronic equipment, please do not use the phone to avoid losing the security assurance.

Do not use needles, etc. written something sharp button, otherwise it will damage the mobile phone or misoperation.

If the antenna is damaged, please do not use the phone, otherwise it may cause harm to the human body.

When refueling should be shut down, in the gas station, near the chemical plant or explosive job do not use the phone, and do not remove the battery, because the phone will affect the technical installation operation.

Avoid mobile phones with damp, water or other liquids into the phone will cause the phone overheating, leakage and failure.

## 1.4 Battery safety instructions

### Note on the use of batteries

- ✧ Do not throw the battery into the fire, or it will cause the battery to fire and burst.
- ✧ When the battery is installed, do not force the pressure, otherwise it will cause the battery leakage, overheating, burst and fire.
- ✧ Do not use wires, needles and other metal objects will short-circuit the battery, nor will the battery with necklaces and other metal objects together, otherwise it will cause battery leakage, overheating, and burst into flames. Not in excess of the power system voltage is specified, and please using the provided external devices.
- ✧ Do not solder the battery head, otherwise it will lead to leakage, overheating, burst and fire.
- ✧ If the battery liquid into the eyes, there will be the risk of blindness, then please do not rub your eyes, rinse with water, and then immediately to the hospital for treatment.
- ✧ To ensure safety, do not put the battery into the mouth or use the damaged battery.
- ✧ Do not remove or modify the battery, otherwise it will cause the battery leakage, overheating, burst and fire.
- ✧ Do not use or place the battery at a high temperature, such as the side of the fire or the heater, otherwise it will cause the battery to leak, overheat, burst and burst into flames.
- ✧ If the battery is in use, charge or save the process of heating up, discoloration, deformation and other abnormal phenomena, please stop using and replacing the new battery.
- ✧ If the battery liquid touches the skin, clothing, which may cause skin burns, should immediately rinse with water, if necessary, please consult a doctor immediately.
- ✧ If the battery leakage liquid or a strange smell, please immediately put it away from the open fire, to avoid the fire and burst.
- ✧ Do not allow the battery to be affected with damp, otherwise it will cause the battery to overheat, smoke and corrosion.
- ✧ Do not in direct sunlight or near a car hot place to use or placed in the battery, otherwise it will

lead to leakage of liquid and overheating, may reduce performance, shorten service life. Only use the approved accessories and batteries do not connect the matching products.

- ✧ Do not charge more than 24 hours in a row. In any case, you can not open the phone or battery, and it is strictly prohibited to change these devices.

Battery performance

- ✧ Make a call, turn on the background light, use the game function will consume more power, with the longer call time, standby time will be shortened.
- ✧ Standby time in a non service area is shorter than the standard standby time.
- ✧ The performance of the battery with the state of charge, temperature, local network signals and the status of the background lights change.

### 1.5 Treatment of waste battery

Waste batteries in MSW is negligible, but the harm is very great, battery containing mercury, cadmium, lead and other heavy metals, harm human health. If the battery waste mixed with garbage landfill together, with the passage of time, the leaching may pollute the groundwater and soil. So to rationally deal with the scrap mobile phone battery.

Do not landfill, because the heavy metal of the used battery can pollute water and soil through the osmosis.

It is not to be burned, because if the steam is formed by incineration, it may be used to catalyze the formation of harmful gas, which will cause the pollution of the atmosphere.

Non composting. May lead to excessive levels of heavy metals in the material.

Do not discard the waste battery, so as not to pollute the environment.

As far as possible, the waste battery is separated from the domestic waste to reduce the pollution to the environment.

### 1.6 Note on the use of the charger

Use the charger can quickly charge for mobile phone battery. Before charging, please confirm that the battery has been properly installed on the phone,

do not remove or mobile phone battery charger. Please use the AC power provided by the charger. The use of other voltage will cause leakage, fire and damage to the phone and charger.

After the end of the charge, if the charger is still plugged in the phone, the phone will automatically check the battery status, if the battery is still below the full capacity of the test, it will automatically charge again.

Please put your mobile phone in a place where children can't touch.

Short circuit of the charger, otherwise it will cause electric shock, smoke and damage to the charger.

Please do not use the power cable in the case of the use of the charger, otherwise it will lead to fire and electric shock.

Please do not put containers of water on the charger next to the water to avoid spills caused the charger to overheat, leakage and fault.

If the charger comes into contact with water or other liquid, immediately pull the power off the socket to prevent overheating, fire, electric shock and charger failure.

Please do not remove or modify the charger, otherwise it will lead to personal injury, electric shock, fire and charger damage.

Please do not use the charger in the bathroom, such as high humidity, otherwise it will lead to electric shock, fire and charger damage.

Please do not use wet hands to touch the charger, wire and power outlets, otherwise it will lead to electric shock.

Do not put heavy objects on the power line or modify the wire, otherwise it will cause electric shock and fire.

Unplug the power plug from the outlet before cleaning and maintenance.

Pull the plug to seize the charger, pull the power cord will damage the wire, causing electric shock and fire.

## 1.7 Cleaning and maintenance

Mobile phone, battery and charger is not waterproof, do not use the high humidity in the bathroom, and also to avoid the rain.

Clean mobile phone, battery and charger with a soft dry cloth.

Do not use alcohol, thinner or benzene solution to wipe the phone.

- A dirt socket can lead to poor contact, power off, and can not be charged, please clean regularly. If the content of this manual is not in conformity with your phone, please refer to the phone as the right to the final interpretation of this manual.

## 2 Mobile phone appearance and press key

Right soft key

- ✧ Right soft key button for the mobile phone into the phone book and return key function
- ✧ Enter the phone number to dial the user interface or phone book, SMS and other editing state, press the return key, can clear the character of the input.
- ✧ After entering the multi-level operation menu, press the return key and return to the first level menu.

### 2.1 Left soft key

- ✧ The left soft key to determine the key, select and determine the function

### 2.2 Shutdown key

- ✧ Press the hang up button to achieve mobile phone on / off / return

### 2.3 Navigation key

- ✧ Up key : Specify function keys                      Down key : alarm

## 4 instructions for use

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## **Specific Absorption Rate (SAR) information**

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC. Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 5 mm from the body. Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
