STATEMENT: Our Company reserves the right to revise this manual content without prior notice.

2 Your Phone

The pictures in this manual are only for reference, If individual picture does not match with the product in kind. Please refer to the customer care..

Get Started

! Important: This device is designed to be used with a SIM card, use of incompatible SIM cards may result in the device not working and could cause damage to the device or SIM card. Make sure the phone is properly switched off when removing battery and inserting the SIM

2.1 Battery charging

Before using the device for the first time or when the battery has been unused for an extended period, you must charge the battery. You can charge the battery with a travel adapter or by connecting the device to a computer with a USB cable.

- Use only our approved chargers and cables. Unapproved chargers or cables may cause batteries to explode or damage your device.

When your battery is low, the device will emit a warning tone and show a low battery message. Recharge your battery to continue using your device.

- If the battery is completely discharged, you cannot turn on the device, even with the travel adapter connected. Allow a depleted battery to charge for a while before you try to turn on the device.

ATTENTION:

- Charging must be performed in a well-ventilated area with a temperature between -10°C and +45°C. The factory-supplied charger must be used. Using an unapproved charger could cause damage to the battery and void warranty.

2.2 Connect network

2.2.1 Insert the SIM or USIM card

Insert the SIM or USIM card when you need a cellular service. Do not insert a memory

card into the SIM card slot.

2.2.2 Insertion of the Memory Card

Your device accepts microSD. or microSDHC. Memory cards with maximum capacities of 32 GB(depending on the memory card manufacturer and type).

When you insert a memory card into your device, the memory card's file directory will appear in the SdCard2 folder. device.

2.2.3 Turn on or off your device

Press and hold the Power key.

2.2.4 Lock or unlock the touch screen and the keys

When you do not use the device for a specified period, your device turns off the touch screen and locks the touch screen and the keys automatically to prevent unintended operations.

To lock the touch screen and the keys manually, press the Power key. To unlock them, turn on the screen by pressing the Power key , and then flick your finger.

2.3 Home screen

2.3.1 Use the touch screen

Your device's touch screen lets you easily select items or perform functions. Learn basic actions for using the touch screen.

- Do not press the touch screen with your fingertips, or use sharp tools on the touch screen. Doing so may damage the touch screen or cause it to malfunction.
- Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause the touch screen to malfunction.
- Do not allow the touch screen to come into contact with liquids. The touch screen may malfunction in humid conditions or when exposed to liquids.
- For optimal use of the touch screen, remove the screen protection film before using your device.
- Your touch screen has a layer that detects small electrical charges emitted by the human body. For best performance, tap the touch screen with your fingertip. The touch screen will not react to touches from sharp objects, such as a stylus or pen.

Control your touch screen with the following actions:

Tap

Touch once to select or launch a menu, option, or application.

Tap and hold

Tap an item and hold it for more than 2 seconds.

Drag

Tap an item and move it to a new location.

2. Play interface click " " stop playing video, click on the " " Play video; Click on the

" " choose showing the way.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ▶ -Reorient or relocate the receiving antenna.
- ▶ -Increase the separation between the equipment and receiver.
- ▶ -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ▶ -Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This Smart phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: X4L (FCC ID: 2AGAK-X4L) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.369W/kg and when properly worn on the body is 0.899W/kg. This device was tested for typical body-worn operations with the back of the handset kept 0mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
