

## 1. Antenna test environment and procedure

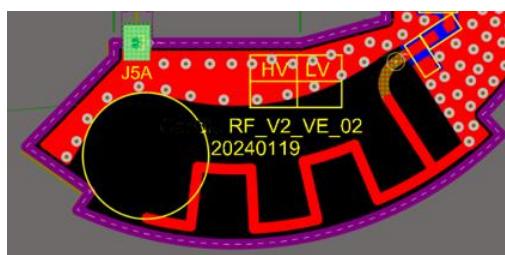

Test Block diagram

OTA Anechoic Chamber and Its control equipment

## 2. Antenna model

PIFA antenna

### 3. Antenna gain

The gain of horn antenna is tested, the Gain of antenna is calculated by comparing with tested horn antenna.

### 4. RF and antenna specification sheet

Frequency Range 频率范围: 2400MHz – 2483.5MHz	DATA Rate 传输速率 Zigbee:250kbps Bluetooth 5.1: 1Mbps, 2Mbps, 500kbps,125kbps
Channel No. 频道数: Zigbee: 11 channels (Mainly:2405MHz; 2425MHz; 2450MHz; 2475MHz; 2480MHz) Bluetooth: 40 channels (2402MHz-2480MHz, Channel spacing: 2MHz)	Modulation type 调制方式: Zigbee: 16-ary orthogonal modulation, O-QPSK PHY Bluetooth: GFSK PHY
Max. Output Power 最大输出功率: +10dBm (Chip max RF output power)	Operating Temperature 工作温度: -20 -- +100 °C ambient
Antenna Gain 天线增益: -0.17dBi(peak)	Antenna Brand & Model 天线商标&型号: PIFA antenna
