Dear users，

Thank you for using our M71GY2

Before using this product, please read the instructions carefully.

This "manual" intends to introduce you the basic characteristics of this product, in order to help you use it the best way. This manual describes the product's features and information in details, as well as recommendations and attentions to help you fully understand the technical characteristics of the product.

In the package, you will find "warranty card", which discusses relevant provisions and product maintenance, as well as some value added services that we provide to users. Please read it carefully in order to avoid some discomforts. The product has better features and high performance. It will greatly improve your online satisfaction and continually enjoy its features.

Special note:

All the information in this manual is correct at the time of publication. However, as we continue to update and improve the product, the software in your device may be described as slightly different in appearance and functions.

(We reserve the right to improve the products. Specifications and designs are subject to change without prior notice!)

FCC Notice

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types MID/(FCC ID: 2AGCDM71GY2) has also been tested against this SAR limit. SAR information on this and other pad can be viewed on ‐ line at http://www.fcc.gov/oet/ea/fccid/. Please use the device FCC ID number for search. This device was tested for typical body-worn operations with the device kept 0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0cm separation distance between the user's body and the device. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
