

Activbody Inc completed a minor improvement change for the device, to replace one internal plastic material:
The new frame plastic material has improved elasticity, to allow easier opening of the device upper case. This improves user experience when opening the device, and makes the plastic snaps more flexible. The change is as follows:

Change from: Glass Filled (GF) ABS plastic with 20% glass content,
To: Glass Filled (GF) Polycarbonate (PC) plastic with 10% glass content
