Let's Start

The Health-Key arrives to you fully charged and ready to go. The Health-Key keyboard can be connected any of 3 ways (USB Cable, or Bluetooth).

- USB Cable (Cable included):** If deploying by USB cable, just plug it in, press the "USB" key, (), and start typing. Connection is confirmed by the LED indicator.
- Wireless Dongle (Dongle included):** If connecting wirelessly, you must choose between  and Bluetooth wireless. The Health-Key "Device 1" is pre-programmed for the included  Dongle. Just plug in the Dongle to any USB port on your TV, PC or other devices; press the "Device 1" key (), and start typing. Connection is confirmed by the LED indicator.
- The Health-Key keyboard has 3 built-in Bluetooth channels. To connect the keyboard to a Bluetooth device, please view the Instruction Manual here: [Instruction Manual](#)

Where's the Touchpad:

- Uniquely, the Health-Key keyboard has 2 Touchpads built-in. BOTH the Alphabetic area and the Numeric area are Touchpads.
- To enable the alphabetic area touchpad, press the button marked:  
- To enable the numeric area touchpad, press the button marked:  

Sleep mode

- To maximize battery life, Health-Key keyboard will enter sleep mode after 10 minutes of not being in use.
- The keyboard will awake from sleep mode by gesturing left or right on the "Slide to Wake" area.

← Slide To Wake →

Charging Keyboard

- Plug the USB cable (included) into the USB Type C port and then into the USB outlet.
- The Charging LED will illuminate red during charging. The battery is fully charged once the battery LED light turns green.
- The keyboard takes approximately 4 hours to be fully charged.

Bluetooth Audio

- Press Bluetooth audio key  : enter Bluetooth pairing mode, then LED light will flash.
- Select pairing name "Health-Key Audio" in your device to connect. The LED light will remain illuminated after connected.

Cleaning

- To start cleaning the keyboard press  for 5 seconds. This will pause the keyboard and prevent unwanted typing during cleaning.
- The Health-Key Keyboard has a feature built-in that will notify the user on when the device needs to be cleaned. This is dependent on the amount of maximum touches the user sets up for the keyboard.
- Download the Health-Key Cleaning Software here: [Cleaning Software](#)

- Less than 20%:** Red LED flash.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
