AUTOMATE[™] V2 MOTOR PROGRAMMING INSTRUCTIONS

POWERED

• USE THIS DOCUMENT WITH THE FOLLOWING MOTORS:

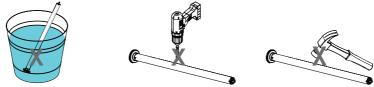

PART NUMBER	DESCRIPTION
MT01-1325-069001	AUTOMATE Li-ion 1.1Nm ARC Motor [Ø25/5V/20rpm] (Skyline Short)
MT01-1325-069002	AUTOMATE Li-ion 1.1Nm ARC Motor [Ø25/5V/20rpm] (Skyline)
MT01-1325-069003	AUTOMATE Li-ion 1.1Nm ARC Motor [Ø25/5V/20rpm] (S45)
MT01-1325-069005	AUTOMATE Li-ion 1.1Nm ARC Motor [Ø25/5V/20rpm] (S45 Short)
MT01-1328-069001	AUTOMATE Li-ion 2.0Nm ARC Motor [Ø28/5V/20rpm] (Skyline)
MT01-1328-069002	AUTOMATE Li-ion 2.0Nm ARC Motor [Ø28/5V/20rpm] (S45)
MT01-1335-069001	AUTOMATE Li-ion 3.0Nm ARC Motor [Ø35/5V/20rpm]
MT01-1345-069001	AUTOMATE Li-ion Q3.0Nm ARC Motor [Ø45/5V/20rpm]
MT01-1345-069002	AUTOMATE Li-ion 10.0Nm ARC Motor [Ø45/5V/9rpm]

SAFETY INSTRUCTIONS

WARNING: Important safety instructions to be read before installation.

Incorrect installation can lead to serious injury and will void manufacturer's liability and warranty.

WARNING: Important safety instructions to be read before installation and use.

Incorrect installation or use can lead to serious injury and will void manufacturer's liability and warranty. It is important for the safety of persons to follow the enclosed instructions. Save these instructions for future reference.

- Do not expose to water, moisture, humid and damp environments or extreme temperatures.
- Persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge should not be allowed to use this product.
- Use or modification outside the scope of this instruction manual will void warranty.
- Installation and programming to be performed by a suitably qualified installer.
- Follow installation instructions.
- For use with motorized shading devices.
- Keep away from children.
- Frequently inspect for improper operation. Do not use if repair or adjustment is necessary.
- Keep clear when in operation.
- Replace battery with correctly specified type.

Rollease Acmeda declares this equipment is in compliance with the essential requirements and other relevant provisions of RED \ Directive 2014/53/EU

∕& FC: (€

Statement Regarding FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver.

• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

•Consult the dealer or an experienced radio/TV technician for help.

Do not dispose of in general waste. Please recycle batteries and damaged electrical products appropriately. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Statement Regarding IC Compliance

 This device complies with Industry Canada RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

-French:

Leprésent appareil est conforme aux CNR d'Industrie Canada applicable aux appareils radio

Exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

(1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, meme si le brouillage est susceptible d'en compromettre le fonctionnement."

4 P1 BUTTON FUNCTIONS

4.1 Motor state test

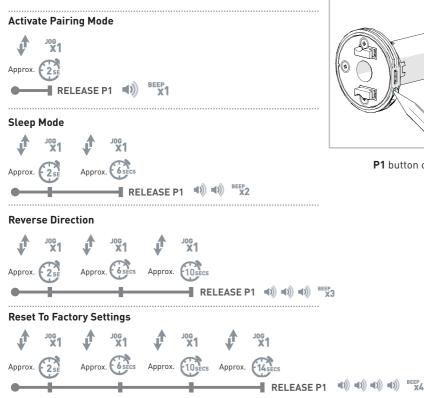

This table describes the function of a short **P1** Button press/release (<2 seconds) depending on current motor configuration.

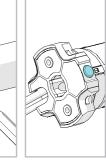

P1 Press	Condition	Function Achieved	Visual Feedback	Audible Feedback	Function Described
	If limit is NOT set	None	No Action	None	No Action
Short Press	If limits are set	Operational control of motor, run to limit. Stop if running	Motor Runs	None	Operational control of motor after pairing and limit setting is completed first time
	If motor is in "Sleep Mode" & limits are set	Wake and control	Motor wakes and runs in a direction	None	Motor is restored from Sleep Mode and RF control is active

4.2 Motor configuration options

The **P1** Button is utilized to administer motor configurations as described below.

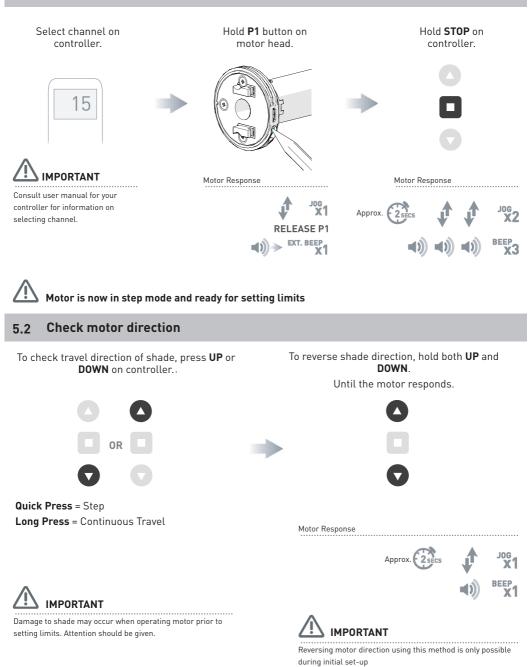

Hold **P1** button on motor head.

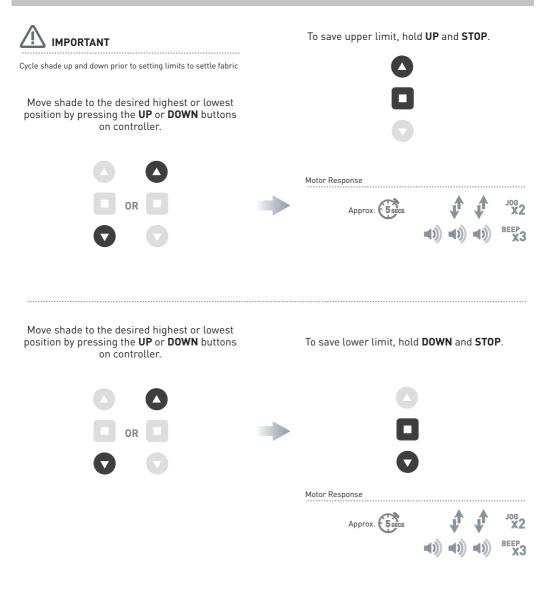

P1 button on motor head.

5.1 Pair motor with controller

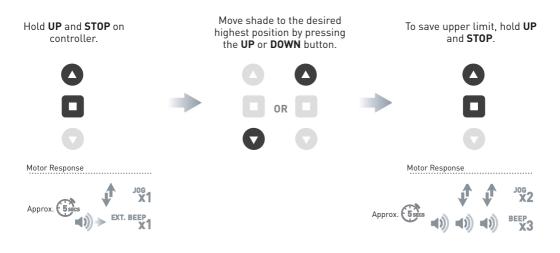

5.3 Set Limits

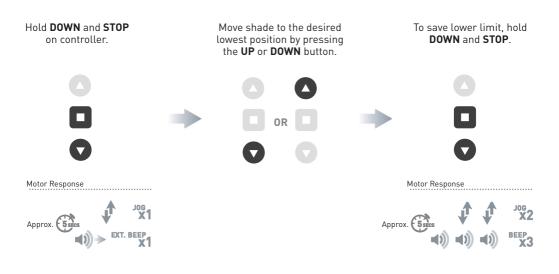

After setting limits, motor will automatically exit from initial set-up mode.

6.1 Adjust upper limit

6.2 Adjust lower limit

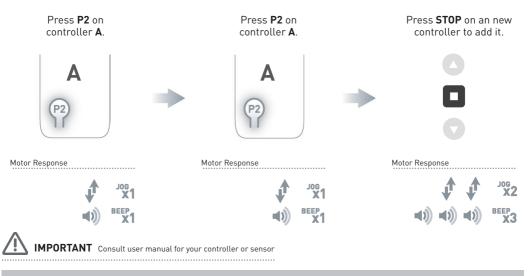

The bottom limit should be set ~ 1.38 in. (35mm) below the Ultra-Lock to disengage the auto lock mechanism when the shade is raised.

7 CONTROLLERS AND CHANNELS

7.1 Using P2 Button on existing controller to add a new controller or channel

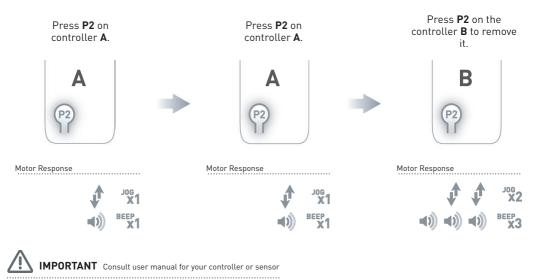

- A = Existing controller or channel (to keep)
- **B** = Controller or channel to add or remove

7.2 Using a pre-existing controller to add or delete a controller or channel

A = Existing controller or channel (to keep)

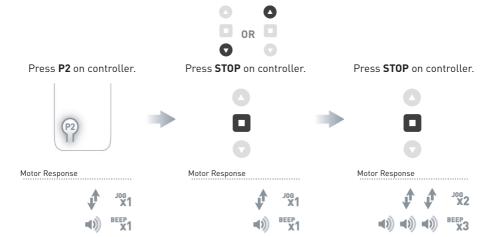

B = Controller or channel to add or remove

10 | Automate™ Programming Instructions | Li-ion Tubular Motors

8.1 Set a favorite position

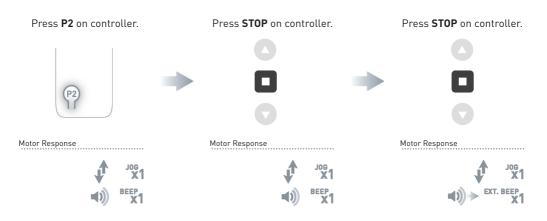

Move shade to the desired position by pressing the UP or DOWN button on the controller.

8.2 Send shade to favorite position

8.3 Delete favorite position

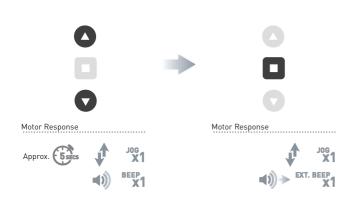

9 TILT & ROLLER MODE

9.1 Toggle motor to Tilt Mode

Hold UP & DOWN on controller.

Default motor mode is Roller after initial Limits have been set, use following steps to change to Roller Mode.

Press STOP on controller.

9.2 Toggle Motor to Roller Mode

If motor is in Tilt Mode, use following steps to change to Roller Mode.

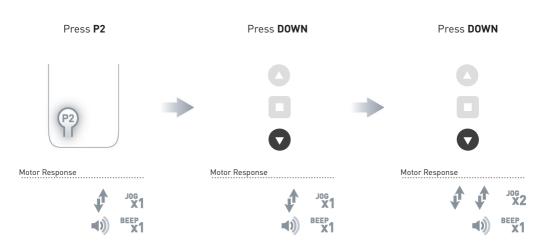

Hold UP & DOWN on controller. Press STOP on controller. Motor Response Approx. Approx. Motor Response Motor Response

10.1 Increase Motor Speed

Default motor mode is the slowest speed.

10.2 Decrease Motor Speed

11 SOFT STOP CONFIGURATION

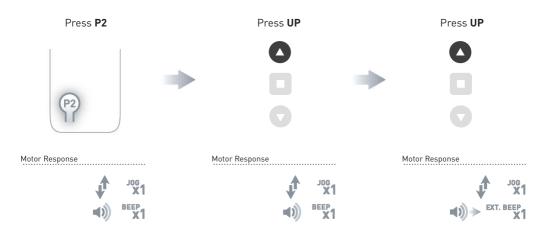

11.1 Turn Soft Stop OFF

Motor must be in slowest speed to turn Soft Stop OFF.

11.2 Turn Soft Stop ON

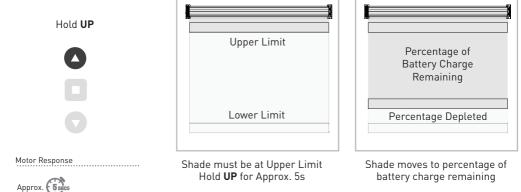

Motor must be in fastest speed to turn Soft Stop ON.

12 BATTERY CHECK FUNCTION

12.1 Send Shade to battery charge level

Shade must be at Upper Limit.

13 CHARGING LED

13.1 Turn Charging LED ON/OFF

Motor must be at Lower Limit.

Hold **DOWN** to toggle off Hold **DOWN** to toggle on Hold **DOWN** to toggle on Hold **DOWN** to toggle on Motor Response Approx. Contemporate Red LED flashes x3 Approx. Contemporate Red LED flashes x3

SLEEP MODE 14

If multiple motors are grouped on a single channel, Sleep Mode may be used to put all but 1 motor to sleep, allowing programming of just the one motor that remains "Awake". See page 6 for detailed P1 functions.

Enter Sleep Mode

Sleep mode is utilized to prevent a motor from incorrect configuration during other motor setup.

Hold P1 button on the motor head

Motor Response

15

Problem

TROUBLE SHOOTING

Exit Sleep Mode: Method 1

Exit sleep mode once the shade is ready.

Press and release P1 button on the motor head

Motor Response

Cause

JOG **x1** BEEP **x**1

Remedy

Exit Sleep Mode: Method 2

Remove power and then re-power the motor.

Motor is no	Motor is not responding	Battery in motor is depleted	Recharge with a compatible charger
		Insufficient charging from solar PV panel	Check connection and orientation of PV panel
		Transmitter battery is discharged	Replace battery
		Battery is inserted incorrectly into transmitter	Check battery polarity
		Radio interference/shielding	Ensure transmitter is positioned away from metal objects and the aerial on motor or receiver is kept straight and away from metal
		Receiver distance is too far from transmitter	Move transmitter to a closer position
		Charging failure	Check power supply to motor is connected and active
	Motor beeps x10 when in use	Battery voltage is low	Recharge with a compatible charger
	Cannot program a single motor (multiple motors respond)	Multiple motors are paired to the same channel	Always reserve an individual channel for programming functions. Use Sleep Mode to program individual motors.
