Hardware Version: 2.0  
Firmware Version: 1.0.1  
NFC Frequency Range: 13.56MHz  
NFC max power: 42 dBμA/m  
GPRS: 900/1800MHz  
OutputPower: 29dBm

### Data Connectivity 2

GPRS

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC SAR Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA). These requirements set a SAR limit of 1.6 W/kg averaged over one gram of tissue. The highest SAR value reported under this standard during product certification for use with minimum distance 5mm when properly worn on the body

### Power on/off 3

LED indicator

Power on/off

**LED indicator**  
Power indicator will light up

**Power on/off**  
Press this key for 3 seconds

**Caution**  
Risk of explosion if battery is replaced by an incorrect type.  
Dispose of used batteries according to the instructions

### Transaction & Payment 1 4

**Scan barcode**  
You can scan the barcode to pay your bill.
