Warning and precautions in use

- a. Please select the standard USB cable when using this product. If you use others, it might be appeared that it can not charge or charge unstable, small current phenomenon, please use this machine default with dedicated micro power cord.
- b. This product has over-current protection, please check whether the equipment is abnormal or other improper use.
- c. Do not put the product in water, fire, excessive temperature ($> 45^{\circ}\text{C}$) and low temperature ($< -20^{\circ}\text{C}$) environment, do not play for children, in particular, do not let children contact accessories, do not disassemble, modified products, so as not to damage the product protection device, resulting in battery fever. Fire or explosion do not throw the product violently, impact, friction and so on, resulting in product sag, perforation, cracking, deformity, corrosion and other abnormal phenomena, please stop using immediately; products appear sunken, perforation, cracking, deformity, corrosion and other abnormal phenomena, please stop using and contact the seller or manufacturer.
- d. Clean the surface with a dry, soft cloth, and do not use chemicals, soaps or detergents for cleaning. Improper use of the user or improper placement of this product may lead to shorten or damage the life of this product, so that the responsibility, is not a warranty liability or manufacturer responsibility, please understand.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
