

Titan37AX 40GHz Primary Antenna Gain

Polarity	Frequency [GHz]	Maximum Array Gain (w/ Radome Loss) [dBi]
H	37.1	21.44
H	38.5	22.72
H	39.9	20.35
V	37.1	20.37
V	38.5	21.91
V	39.9	21.41

This is the total array gain (summation of 4 paths per polarization) as shown with CST simulations.
