

# TAKING PHOTOS AND VIDEOS:

- Make sure the 3 pin plug is neerted into the drone
- Turn on the Drone following the instructions above

# Videos: See Page 9 APP CONTROL SPECIFICATIONS press button 3

### **AUTO HOVER FUNCTION:**

- Place the drone with the front side facing away from the controllar
  At the same time, pull the left throttle lever to the furthest back
  left corner while pulling the rudder lever to the furthest back right corner then release both levers to return to canter
- hovering while in flight.

#### ONE KEY RETURN FUNCTION:

- Before using one key return mode, it is necessary to activate the mode.

  Press the "one key return" button on the remote one time as the anow. on the diagram indicates. The controller will beep indicating it is in one
- (To cancel this mode, press the button again.)
- While flying Drone in One Key Return mode, the button can be
- pressed et any time to return the drone to It's launching location.

  Once the Drone is on the return route, press the button again or press the right lever up to end the return function.

#### **HEADLESS FUNCTION:**

- Place the Drone in a horizontal position or while hovering in the air, position the Drone so that the front (ted LEDs involcate the front side) faces away from the remote.
- Once connected push the Headless Mode button down.
  Headless Mode ean be activated at any time Including mid-flight. (To cancel Headless Mode, press the button again, While the drone in Headless Mode, each direction can be regarded as the front of drone.)

## **RECALIBRATING:**

- Recallbratting Directions ity.

  Place the dione with the front side facing away from the controller

  Pull both levers to the furtheat back eft comer

  The LED Indicator will begin flashing

  Once the remote controller beeps, release both levers to allow them to return to the center position
- Indicator will stop flashing, but remains it to indicate the reset was successful.
- Recallbrating Horizontal Navigation:
  Place the drone with the front side facing away from the controlle
- Pull both levers to the furtheat back right comer. The LED Indicator will begin flashing.

  Once the remote controller beeps, release both levers to allow them to return to the center position.
- The LED indicator will stop flashing, but remains lit to indicate

#### WIFI CONNECTION:

Enter Goog eTM Play or the | Tunes App Store and search for HT UFO. Once selected, download and inetall the app or scan the QR code that complies with your device.

### Turn on the drone, and when the Red LED nd cator ights this signifies the drone is ready to

connect via WiFi.

Enter WiFi settingson the selected mobile device. Select "HT-\*\*\*\* & FH8610-\*\*\*\*

from the list of eveilable connections. Note: the four "\*" will be different for every use

SAFETY CHECK BEFORE FLYING Carefully inspect the Drope before every flight

- Before operations, check the batteries of the transmitter and Drone are charged for the flight.
- Cerefully check the Willi Drone and propellers. Broken parts will pose risk of njury and hazard.
- Check the battery and power plug are securely fastened. Savere vibration during flight may letach the pug and result in loss of control.
- When turning on the until always turn on the remote first, and then turn on the Wifi Drone. To

#### CHARGING THE LI-PO BATTERY

- Use the provided charging cable, if the cable is damaged do not attempt to use.
- Do not charge the battery if swollen, eaking, or seem ngly damaged
- Do not charge on the flammab e or combustible surface (such ea carpet, wooden floor, sol d wood furniture, etc.) or on electric-conductive surface.

Remove end detech the battery from the bottom of the Drone

- Connect the battery with USB charger, then connect the USB charger to a computer or AC
- wall eoedler:
   An LED light indicator will light while charging and turn off when charging is complete.

#### which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is

Changes or modifications not expressly approved by the party responsible for compliance could

# **SAFETY NOTES**

Important Notes: Ages +14

This drone is not a toy, it can be fun but must be taken seriously.

Any improper use of this product will result in serious injury. Be aware of your personel safety, safety of othera and your surrounding environment

We recommend beginners learn to fly with more experienced plots playing nearby before attempting to fly the Remote Control WIR Drone with Camerain the same environment.

This Wifi Drone has parte the move at high speed, which poses a cartain degree of danger.

Choose a wide open space without obstacles. Do not operate this Will Drone near buildings. crowds of people, high voltage cables, or trees to ensure the safety of yourself, others end your

Keep small parts out of reach of children, to avoid choking hazards. Adult supervision is advised

UPo Battery Safety Notes:

This Wifi Drone s powared by a Lithium-Polymer (LIPo) bettery.

To avoid risk of fire or damage, never recharge your battery while it is inserted in the Drone. If you do not plan to fly the Wifi Drone for a week or more, store the battery approximately 50% charged to maintain battery performance and lile.

This Wifi Drone contains many precise e ectrical components

Store the battery and the Wifi Drone in a dry areast roomter operature. Exposure to water or nay cause malfunction resulting in loss of responsiveness, or a crast

For safety only use the included spere parts for replacements

Always be aware of the Rotating Blades:

When in operation, the main and tail rotor bledes will be spinning at high speed. The biedes are capable of inflicting serious body injury or property damage

Be careful to keep your body and loose clothing away from the blades. Never take your eyes of the Wiff Drone or leave it unatiended while it is turned on. Slop operating mmediately if the Wiff Drone flies out of your view. Once lended, mmediately turn off the Wiff Drone and remote control. Avoid Flying Alone:

Beginners should avoid flying alone when learning flight skills. We recommend flying with an

iced pilot riserby in case younced he p

Before turning on the transmitter, check that the throttle stick is bulled completely backward

- when turning on the tint, aways turn of the term instrument instrument in the viril blobs. power off, elways turn off the Will Drone first and then the transmitter, improper procedure may cause loss of control of the Will Drone.
- Charge the U-Po battery completely before Initial use of the Will Drone for optimal use
- Do not overcharge the battery. When batteries are fully charged the LED indicators light will go out, unplug the battery from the power source immediately.
- When the battery has recently died, wait a few minutes to let the battery cool then begin

# ASSEMBLING THE DRONE

Assembling the Wifi Drone: Use the provided equipment to achieve the Wifi Drone's best use

■ First. nstall the landing skids to the bottom of the Drone (Figure 1), and install the protecting

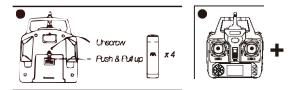

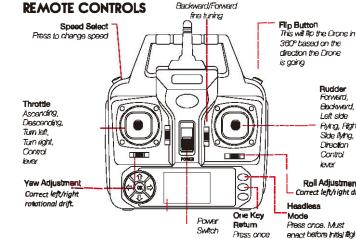

- Second: When replacing damaged blades use the provided ones from the Wifi Drone pscheding. The set will come with 4 replacement propellers, two (A) type and two (B) type. To place the propellers correctly so that the Wifi Drone will fiv you must align the like the Once the propellers have been aligned correctly push them into place.
- Third: The final step in preparing the Wifi Drone for flight s implementing the fully charged LI-Po Battery. On the provided Li-Po battery, connect the Battery and into the Battery lead located on the physical Wifi Drone, as shown in Figure 3. Then alide the Li-Po battery into the alcove of the physical Wifl Drone, so that the battery cords are inside of the Wifl Drone.

Fourth: Turn the controller over, and using the provided screw driver remove the screw to unlock the battery placement compartment. Unhinge the compartments door and push and slide the door off the compartment, follow the "open" arrowand place four (included) AA Batteries into the back of the controller, as shown in Figure 4.

Fifth: Attach the smartphone holder to the control securely, and fit your mobile device with in the grips (Figure 5) to get a live feed of the Drone's cancera.

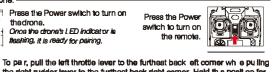

### TIME TO FLY

Please read the instructions carefully to and proficiently ity the Wifi Drone. Reference the above diagram to understand which controls to use when.

⚠ YOU CAN PERFORM FLIPS, ATTEMPT ONLY IF LINDER CONTROL OF THE DRONE. rurning On The Drone:

Prese the Power switch to turn on the drone. Once the drone's LED Indicator is

the right rudder lever to the furthest back right comer. Hold this position for two seconds, the drone has now entered "Auto Hover" and is ready to fly.

"To perform an emergency stop, please turn off the remote to have the drone returned to the und slowly if stopping the drone with the same operation as above, the drone will be drop to the ground quickly '
