

Description of Permissive Change

The application is prepared for FCC class II permissive change. The differences compared with the original application (FCC ID: 2AH7L-UPSC, Grant Date: 05/24/2022) are:

1. Reducing power setting of all bands, and
2. Re-evaluating antenna gain.

Antenna gain was re-evaluated by the manufacturer for this specific EUT.

The output power is lowered via firmware/software settings only and cannot be changed by end-user or any other third parties.

If have any question, please do not hesitate to contact us, thanks.
