

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (Electronic Under Test) assembly. The assembly consists of a dark red plastic housing and a green printed circuit board (PCB). The PCB is populated with various electronic components, including a large white rectangular component, a yellow component, and several smaller components. The assembly is placed on a blue surface next to a black ruler with white markings for scale.
Solder Board-Component View 1	 A photograph showing a close-up view of the solder board-component assembly. The assembly consists of a green printed circuit board (PCB) and a white rectangular component. The PCB is populated with various electronic components, including a large white rectangular component, a yellow component, and several smaller components. The assembly is placed on a blue surface next to a black ruler with white markings for scale.

Solder Board-Component View 2	 A photograph showing a green printed circuit board (PCB) with various electronic components, including a USB connector, integrated circuits, and capacitors. The board is connected to a large, rectangular, multi-layered coil component via several thin wires. A black ruler with white markings is placed horizontally below the components for scale. The background is a blue textured surface.
Solder Board-Component View 3	 A photograph showing the same green PCB and large rectangular coil component as in View 2. In addition, a smaller, circular, multi-layered coil component is visible, connected to the main board by two thin wires. The same black ruler and blue background are present.

Solder Board-Component View 4	 A photograph showing the soldered components of the device. A green printed circuit board (PCB) is visible, with various electronic components soldered onto it. A white, rectangular component is connected to the PCB by several thin wires. A black, circular component is also connected to the PCB. The components are placed on a blue surface, and a ruler is visible in the background for scale.
Antenna View	 A photograph showing the antenna components of the device. Two circular antennas are visible, labeled "Wireless 2 Charging Antenna" and "Wireless 1 Charging Antenna". The "Wireless 2 Charging Antenna" is a small, circular antenna with a yellow center. The "Wireless 1 Charging Antenna" is a larger, circular antenna with a yellow center. Both antennas are connected to the green PCB by thin wires. The PCB is placed on a blue surface, and a ruler is visible in the background for scale.
