

Labels Smarthalo V2

September 22, 2020

Labels

In the picture to the right, a prototype label can be seen on the bottom of the plastics casing as used during the NPI phase of the product design. This is not a final label, but rather used as a an example of location on the bottom of the plastic casing. See below for label specifications

Two labels using successive serial numbers side by side. The two top QR codes are used during manufacturing only and do not appear on the final product. Size in document is not to scale, see below for dimensions.
