# **About This Manual**

Thank you for choosing the Akuvox IT82A indoor monitor. This manual is intended for the administrators who need to properly configure the indoor monitor. This manual applies to the 82.228.2.533 version, and it provides all the configurations for the functions and features of the IT82A indoor monitor. Please visit the Akuvox forum or consult technical support for any new information or the latest firmware.

# **Introduction of Icons and Symbols**

Warning:

• Always abide by this information in order to prevent the persons from injury.

Caution

• Always abide by this information in order to prevent the damages to the device.

Note:

• Informative information and advice from the efficient use of the device.

) Tip:

• Useful information for the quick and efficient use of the device.

# **Related Documentation**

You are advised to refer to the related documents for more technical information via the link below:

## **FCC** Caution:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment .

This transmitter must not be co - located or operating in conjunction with any other antenna or transmitter.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

1. Product Overview

IT82A is an Android SIP-based with a smooth

touch-screen indoor monitor. It can be connected with the Akuvox door phone for audio/video communication, unlocking, and monitoring. Residents can communicate with visitors via audio/video call, and it supports unlocking the door remotely. It is more convenient and safer for residents to check the visitor's identity through its video preview function. IT82A are often applied to scenarios such as villas, apartments, and buildings.

Change Log

The change log will be updated here along with the changes in the new software version

**Status:** This section gives you basic information such as product information, Network Information, and account information, etc.

**Account**: This section concerns SIP account, SIP server, proxy server, transport protocol type, audio&video codec, DTMF, session timer, etc.

**Network**: This section mainly deals with DHCP&Static IP setting, RTP port setting, and device deployment, etc.

**Phone**: This section includes Time&language, call feature, dial management, data import&export, door log, web relay.

**Contacts:** This section allows the user to configure the local contact list store in the device.

**Upgrade**: This section covers Firmware upgrade, device reset&reboot, configuration file auto-provisioning, PCAP.

**Security**: This section is for password modification, account status & session time out configuration, as well as service location switching.

Settings: This section is including the RTSPD & voice assistance setup.

**Arming**: This section covers the configuration including, arming zone setting, arming mode, disarm code, and alarm action.

• Mode selection:

**Discovery mode**: It is a plug and play configuration mode. Akuvox devices will configure themselves automatically when users power on the devices and connect them to the network. It is super time-saving mode and it will greatly bring users convenience by reducing manual operations. This mode requires no prior configurations previously by the administrator.

**Cloud mode:** Akuvox SmartPlus is an all-in-one management system. Akuvox Cloud is the mobile service that allows audio, video, remote access control between smartphones and Akuvox intercoms. All configurations in the device will be issued automatically from the cloud. If users decide to use

# AKUVOX Smart Intercom Android Indoor Monitor Administrator Guide

Akuvox SmartPlus, please contact Akuvox technical support, and they will help you configure the related settings before using them.

SDMC mode: SDMC (SIP Device Management Controller) is a simple and comprehensive software for building management. It provides a topography for a community while offering you a graphical configuration interface for the door access, intercom, monitoring, alarm, etc. It is a convenient tool for property managers to manage, operate, and maintain the community.

Tool selection

Akuvox has many configuration tools for you to set up devices more conveniently. Here we list some common tools, please contact your administrator to get the tool if you need them.

- 1. **SDMC**: SDMC is suitable for the management of Akuvox devices in large communities, including access control, resident information, remote device control. etc.
- 2. Akuvox Upgrade tool: upgrade Akuvox devices in batch on a LAN (Local Area Network)
- 3. Akuvox PC Manager: distribute all configuration items in batch on a LAN.
- 4. **IP scanner**: it is used to search Akuvox device IP addresses on a LAN.
- 5. **FacePro**: manage face data in batch for the door phone on a LAN.

Access the Device

Akuvox indoor monitor system settings can be either accessed on the device 11 AKUVOX SMART INTERCOM www.akuvox.com

# 1.1. Device Start-up Network Selection

Akuvox indoor monitor system settings can be either accessed on the device directly or on the device's web interface. After the device boots up initially, you are required to select the network connection for the device. You can either select ethernet or wireless network connection according to your need.

Ð	07:48 AM	Tue	20-04-2021
	Set network first please.

#### Parameter Set-up:

- Automatic Date: automatic Date is switched on by default, which allows the date& time to be automatically set up and synchronized with the default time zone and the NTP server (Network Time Protocol). You can also set it up manually by ticking the check box and then enter the time and date you want and press the Save tab to save the setting.
- **Time Zone:** select the specific time zone depending on where the device is used. The default time zone is GMT+0.00.
- **Date Format:** select the date format as you like among the three format options. The six formal options are Y-M-D, Y/M/D, D-M-Y, D/M/Y, M-D-Y, M/D/Y.
- Time Format: select 12 hour or 24 hour time format as you like.
- **NTP Server:** enter the NTP server you obtained in the NTP server field.

#### **1.6.2.Time Setting on the Device Web Interface**

Time setting on the web **Phone > Time** interface also allows you to set up the NTP server address that you obtained to automatically synchronize your time and date. And when your time zone is selected, the device will automatically notify the NTP server of its time zone so that the NTP server can synchronize the time zone setting in your device.

	Screen Clean	
	Font Size Normal V	

Parameter Set-up:

• Brightness: press on the brightness setting and move the yellow dots to

Android Indoor Monitor Administrator Guide

adjust the screen brightness. The default brightness is "145".

Akuvox Smart

- Sleep: set the timing for the device screen to be turned off. You can select the timing among eight options: 30 seconds, 1 minute, 2 minutes, 5 minutes, 10 minutes, 30 minutes, 1 hour. For example, if you set it as 1 minute then the screen will be turned off if there is no operation on the device for 1 minute. However, if you turn on the function, then the device screen will not be turned off until screen saver display reaches its configured time duration.
- Screen Saver Lock Time: set the time duration for the screen saver among 4 options: 30 minutes, 1 hour, 2 hours, Never. for example if select Never then the screen saver will stay permanently on.
- Screen Saver: tick the square box to enable the screen saver function.
- Screen Saver Type: select screen saver type among seven options: SDMC Pictures, Local Pictures, SDMC+Local Pictures, SDMC Videos, Local Videos, SDMC+Local Videos, Clock. Details for the screen saver types are shown below:

NO	Screen Saver Type	Type Description
1	SDMC Pictures	Display pictures from SDMC as the screen saver.
2	Local Pictures	Display picture uploaded to the indoor monitor as the screen saver.

3	SDMC+Loca l Pictures	Display pictures from SDMC and the indoor monitor in rotation as the screen saver.
4	SDMC Videos	Display videos from SDMC as the screen saver.
5	Local Videos	Display videos from the indoor monitor as the screen saver
6	SDMC+Loca I Videos	Display videos from SDMC and the door phone in rotation as the screen saver.
7	Clock	Display the clock as the screen saver.

- Screen Lock: tick the screen lock if you want to lock the screen after the screen is turned off (turn dark). You are required to enter the system code to unlock the screen or you can unlock the screen by facial recognition.
- Screen Clean: press on Screen clean feature first before you start wiping the screen clean. And this helps you avoid unwanted changes in the settings incurred while you are wiping the screen.
- Font Size: select the font size among four options "Small", "Normal"," Large"," Huge" according to your need.

#### **1.8.** Screen Display Setting on the Web Interface

IT82A indoor monitor allows you to enjoy a variety of screen displays to enrich your visual and operational experience through the customized setting to your preference.

# **1.9. Screensaver Configuration**

#### **1.9.1.Configure Screensaver on the Device**

To configure screensaver on device **Setting > Display** screen.

Ъ	08:36	AM	Fri 16-04-2021
←	Display Setting		$\bigotimes$
	Brightness	145	
	Sleep	1 minute $\vee$	
	Screen Saver Lock Time	30 minutes $\vee$	
	Screen Saver		
	Screen Saver Type	Local Pictures $\vee$	
	Screen Lock		
	Screen Clean		
	Font Size	Normal 🗸	

Parameter Set-up:

 Screen Saver Lock Time: set the time duration for the screensaver among 4 options: "30 minutes", "1 hour", "2 hours", "Never". for example if select "Never" then the screen saver will stay permanently on.

AKUVOX SMART INTERCOM www.akuvox.com

- Screen Saver: Slide the switch to enable the screensaver function.
- Screen Saver Type: select screen saver type among seven options: SDMC Pictures, Local Pictures, SDMC+Local Pictures, SDMC Videos, Local Videos, SDMC+Local Videos, Clock.

#### 1.9.2. Upload ScreenSaver

You can upload screen saver pictures/videos separately to the device and to the device web interface for a public purpose or for a greater visual experience.

Screen Saver Setting				
Screen Saver Pictures	Not selected any files	Select File	→ Import	X Cancel
(Support size:2M; form	at:jpg,jpeg,png)			
Screen Saver Videos	Not selected any files	Select File	→ Import	X Cancel
(Support total size 500)	۲; format: mp4,wmv,avi ;7	20P/1080P)		
Picture Files	Daydream1.jpg 🔻		Delete 🛅	
Video Files			Delete 🛅	
Screen Saver Type	Local Pictures			

# Note: The previous pictures with a specific ID order will be overwritten when repetitive designation of pictures to the same ID order occurred. The pictures uploaded should be in JPG format with 2M maximum.

#### 1.10.Upload Wall Paper

You can customize your screen background picture on device web **Phone > Display Setting > Wallpaper** interface in order to achieve the visual effect and experience you need for your personalized screen background display.

Wallpaper	Not selected any files	Select File	➔ Import	X Cancel
Support size 2M.	Formate: ing ineg png: Resolut	tion: 1280v800)		

# 1.11.Status Bar

Status bar setting is for you to customize the device status bar color according to your scenarios. You can do this configuration on web **Phone > Display Setting > Status** Bar interface. Choose Custom mode then adjust RGB value for the status bar.

ground Color Custor	n 💌

Area 6	N/A	•		Not selected any files Select File Delete 💼
Area 7	N/A	•		Not selected any files Select File Delete 📾
Area 8	N/A	•		Not selected any files Select File Delete 📾

#### Parameter Set-up:

- Type: click to select among sixteen icon options: "DND", "Message"," Contact", "Call", "Display", "System info", "Setting", "Sound", "Arming", "SOS", "Browser"," Motion Detection", "Custom APK", "Relays", "Unlock", "N/A" is selected, the icon display in the corresponding area will disappear.
- Value: enter the value if you select the icon type "Custom APK" and "Browser". For example, when you select "Custom APK", you are required to enter its package name and class name in the corresponding Value field before the APK icon can be displayed on the home screen. If "Browser" is selected, you are required to enter the URL of the browser before the browser icon can be displayed. while the value is not applicable to other icon types.
- Label: click to rename the icon if need, while DND icon can not be renamed.
- **Icons:** click to select the picture to be uploaded as the icon to be displayed.

Note:

• You can configure 4 icons in area 1,2,3, and 4 on the home screen.

#### Note:

• You can configure 6 icons on the **More** screen.

Sound and Volume Configuration

AKUVOX SMART INTERCOM www.akuvox.com

Akuvox IT82A indoor monitors provide you with

various types of ringtone and volume configuration ranging from Mic volume, Ring volume, Talk volume, Tone volume and Media volume. You can configure them on the device directly or on the web interface.

## **1.14.Volume Configuration**

#### **1.14.1.** Configure Volume on the Device

To set up the volumes on the device **Setting > Sound** screen.

Ð	08:	37 AM	Fri	16-04-2021
←	Sound			$\oslash$
	Ring Volume	10		
	Talk Volume	10		
	Mic Volume	11		
	Tone Volume	10		
	Ringtone	Flutey Phone		
	Notification Sound	Pixie Dust		

Parameter Set-up:

- Ring Volume: adjust the incoming call ringtone volume.
- Talk Volume: adjust the speaker volume during the call.
- Mic Volume: adjust the volume of your voice to be heard.
- **Tone Volume:** adjust the dial tone volume.

- Akuvox Smart Android Indoor Monitor Administrator Guide
   Ringtone: select ringtone for incoming calls.
- Notification Sound: select ringtone for the incoming messages.

#### 1.14.1.1. Configure Volume on the Web Interface

You can configure the volumes and tones and customize your doorbell sound and alarm ringtone by uploading the audio file to your preference on device web Phone > Audio interface.

Volume	10	(0~15)		
Talk Volume				
Volume	10	(0~15)		
Mic Volume				
Volume	11	(1~15)		
Tone Volume				
Volume	10	(1~15)

# Note: If you want to remove the contact from the blocklist on the web interface, you can change the group to the "Default" when editing the contact.

## 1.16.4. Contact Display

You can configure the contact display order and control whether to display the discovery device on the device.

Contacts List Setting				
Contacts Sort By	ASCII Code	Show Local Contacts	Disabled	•

#### Parameters Set-up:

- **Contacts Sort By:** There are three modes Default, ASCII code and Created time mode for showing the contact list.
- Show Local Contacts Only: if enable the function, the contact on device

ARUVOX Smart Android Indoor Monitor Administrator Guide will only show local phonebook, the contact for discovery mode will be hidden.

## 1.16.5. Contacts Import and Export on the Web Interface

When the contact becomes so many that you can not afford to manage each contact one by one manually, you can import and export the contacts in batch on the device web **Contacts > Local Contacts** interface.

Contacts	Not selected any	files Select File			
	→ Import	Export	X Cancel	(.XML)	
	→ Import	Export	× Cancel	(.CSV)	
	- Import	E Export		(10-1)	

The contact file can only be imported or exportd in .xml or .csv format.

Network Setting & Other Connection

## **1.17.Device Network Configuration**

You can check for the door phone's network connection info and configure the default DHCP mode (**Dynamic Host Configuration Protocol**) and static IP connection for the device either on the device or on the device web interface.

## **1.17.1. Configuring Network Connection on the Device**

To check and configure the network connection on the device **Advance Settings > Network** screen.

Ð	08:40 AM		Fri 16-04-2021
← Network			
DHCP		2	
LAN IP	192.168.31.6		
Subnet Mask	255.255.255.0	Э	0
Gateway	192.168.31.1	8	9
	100 160 01 1	0	
Pri DNS Server	192.108.31.1	U	
Sec DNS Server		ок	
Set As DHCP Server	Disabled 🗸		

#### Parameter Set-up:

 DHCP: select the DHCP mode by moving the toggle switch to the right. DHCP mode is the default network connection. If the DHCP mode is turned on, then the door phone will be assigned by the DHCP server with IP address, subnet mask,default gateway,and DNS server address automatically.

- Static IP: select the static IP mode by ticking the DHCP check box. When static IP mode is selected, then the IP address, subnet mask, default gateway, and DNS servers address have to be manually configured according to your actual network environment.
- IP Address: set up the IP Address if the static IP mode is selected.
- Subnet Mask: set up the subnet Mask according to your actual network environment.
- **Default Gateway**: set up the correct gateway default gateway according to the IP address of the default gateway.
- LAN DNS 1/2: set up preferred or alternate DNS Server (Domain Name Server) according to your actual network environment. Preferred DNS server is the primary DNS server address while the alternate DNS server is the secondary server address and the door phone will connects to the alternate server when the primary DNS server is unavailable.

#### Note:

- You can press **System Info** icon and then press **Network** tab on the Settings screen to check the device network status.
- The default system code is "123456".

## 1.17.2. Configuring Device Network Connection on the Web Interface

To check the network on the web Status > Network information interface.

Network Informati	on		
LAN Port Type	DHCP Auto	LAN Link Status	Connected
LAN IP Address	192.168.31.6	LAN Subnet Mask	255.255.255.0
LAN Gateway	192.168.31.1	LAN DNS1	192.168.31.1
LAN DNS2			
LAN DN52			

AKUVOX SMART INTERCOM www.akuvox.com

To check and configure network connection on the device web **Network > Basic** interface.

	☑ DHCP	Static IP	
IP Address	192.168.31.6	Subnet Mask	255.255.255.0
Default Gateway	192.168.31.1	LAN DNS1	192.168.31.1
LAN DNS2			

#### Parameter Set-up:

- **DHCP**: select the **DHCP** mode by checking the DHCP box. DHCP mode is the default network connection. If the DHCP mode is selected, then the indoor monitor will be assigned by the DHCP server with IP address, subnet mask, default gateway, and DNS servers address automatically.
- Static IP: select the Static IP mode by checking off the DHCP square box. When static IP mode is selected, then the IP address, subnet mask, default gateway, and DNS servers address have to be manually configured according to your actual network environment.
- IP Address: set up the IP address if the static IP mode is selected.
- **Subnet Mask**: set up the subnet mask according to your actual network environment.
- **Default Gateway**: set up the correct gateway default gateway according to the IP address of the default gateway.
- LAN DNS1/2 Server: set up DNS (Domain Name Server) according to your actual network environment. Preferred DNS Server is the primary DNS server address while the Alternate DNS Server is the secondary server address and the door phone connects to the alternate DNS server when the preferred DNS server is unavailable.

## **1.18.Device Deployment in Network**

Akuvox IT82A indoor monitors should be deployed

before they can be properly configured in the network environment in terms of their location, operation mode, address and extension numbers as opposed to other devices for device control and the convenience of the management. To deploy the device in the network on web **Network > Advanced > Connect Setting** interface.

Connect Type	SDMC		Discovery Mode	E	nabled 🔹
Device Address	1	1	1	1	1
Device Extension	1		Device Location	Indo	or Monitor

#### Parameter Set-up:

- Connect Mode: It is automatically set up according to the actual device connection with a specific server in the network such as SDMC or Cloud and None. None is the default factory setting indicating the device is not in any server type, therefore you are allowed to choose Cloud, SDMC in discovery mode.
- **Discovery Mode:** to turn on the discovery mode of the device so that it can be discovered by other devices in the network, and disable if you want to conceal the device so as not to be discovered by other devices.
- **Device Node:** specify the device address by entering device location info from the left to the right: **Community, Unit, Stair, Floor, Room** in sequence.
- **Device extension**: enter the device extension number for the device you installed.
- **Device Location**: enter the location in which the device is installed and used.

## 1.19. Device NAT Setting

Akuvox Smart Intercom

NAT (**Network Address Translation**) allows hosts in an organization's private intranet to transparently connect to hosts in the public domain.

There is no need for internal hosts to have registered Internet addresses. It is a way to translate the internal private network IP address into a legal network IP address technology. To set up NAT, you can do it on web **Account > Advanced > NAT** interface.

TAI			
UDP Keep Alive Mes	Enabled	•	
UDP Alive Msg Inter	30		(5~60s)
RPort	Disabled		

#### Parameter Set-up:

- UDP Keep Alive Messages: if enable NAT, the device will send out the message to the SIP server so that SIP server will recognize if the device is in online status.
- **UDP Alive Msg Interval**: set the message sending time interval from 5-60 seconds, the default is 30 seconds.
- **RPort**: check the RPort when the SIP server is in WAN (Wide Area Network).

## **1.20.** Device Bluetooth Setting

## 1.20.1. Device Bluetooth Pairing

AKUVOX SMART INTERCOM www.akuvox.com

After IT82A indoor monitors turn on the Bluetooth on the device **Setting > Bluetooth** screen, it can be paired with other device via Bluetooth.

## 1.21.Device Wi-Fi Setting

In addition to wired connection, the device also supports Wi-Fi connection. You can set the Wi-Fi on device **Advance Settings > WLAN** screen.

Intercom Call Configuration

## **1.22.IP call & IP Call Configuration**

IP calls and SIP calls can be made directly on the intercom device by entering the IP number on the device. And you can also disable the direct IP call if you allow no IP call to be made on the device. To configure the IP call feature and port on the device web **Phone > Call Feature > Others** interface.

Return Code When	486(Busy Here)	•		
Auto Answer Delay	0		(0~30s)	
Answer Mode	Video	•	Busy Tone	Enabled 🔹
Indoor Auto Answer	Disabled	•	Answer Tone	Enabled 🔹
Direct IP	Enabled	•		
Direct IP Port	5060		(1~65535)	

#### Parameter Set-up:

- **Direct IP Call**: tick the check box to enable the direct IP call. For example, if you do not allow direct IP call to be made on the device, you can untick the check box to terminate the function.
- **Direct IP Call Port**: the direct IP Call Port is "**5060**" by default with the port range from **1-65535**. And you enter any values within the range other than the 5060, you are required to check if the value entered is consistent with the corresponding value on the device you wish to establish a data transmission with.

## 1.23.SIP Call & SIP Call Configuration

You can make SIP call ( Session Initiation Protocol ) in the same way as you

AKUVOX SMART INTERCOM www.akuvox.com

do for making the IP calls on the device. However, SIP call parameters related to its account, server, and transport type need to configured first before you can make calls on the device.

## **1.24.SIP Account Registration**

Akuvox IT82A indoor monitors support two SIP

accounts that can all be registered according to your applications. For example, you can switch between the two SIP accounts. The SIP account can be configured on the device and on the device interface. To configure the SIP account on the device **Advance Settings > Account** screen.

Ð		
←	Account	$\bigotimes$
	Account1	Account2
	Active	
	Label	Sean
	Display Name	Sean
	Register Name	1004
	User Name	1004
	Password	

The parameter settings for SIP account registration can be configured on the Account setting screen and they can also be configured on the device web interface. To perform the SIP account setting on the Web **Account > Basic > SIP Account** Interface.

IP Account			
Status	Disabled	Account	Account 1
Account Active	Disabled	Display Label	
Display Name		Register Name	
User Name		Password	

#### Parameter Set-up:

- Status: check to see if the SIP account is registered or not.
- Account: select Account1 or Account2.
- Account Enabled: check to active the registered SIP account.
- **Display Label**: configure the device label to be shown on the device screen.
- **Display Name**: configure the name, for example, the device's name to be shown on the device being called to.
- **Register Name**: enter the SIP account register Name obtained from the SIP account administrator.
- Username: enter the user name obtained from SIP account administrator.
- **Password**: enter the password obtained from the SIP server.

## **1.25.SIP Server Configuration**

SIP server can be set up for device in order to achieve call session through SIP server between intercom devices. To perform the SIP account setting on the Web **Account > Basic > SIP Account** Interface.

Server IP		Port	5060
Registration Period	1800	(30~65535s)	

Parameter Set-up:

- Server IP: enter the Server's IP address number or its URL.
- **Port:** set up SIP server port for data transmission.
- Registration Period: set up SIP account registration time pan. SIP re-registration will start automatically if the account registration fails during the registration time span. The default registration period is "1800", ranging from 30-65535s.

## **1.26.Outbound Proxy Server configuration**

An outbound proxy server is used to receive all initiating request messages and route them to the designated SIP server in order to establish call session via port-based data transmission. To configure outbound Proxy server on **Account > Basic > Outbound Proxy Server** interface.

Enable Outbound	Disabled	•		
Server IP			Port	5060
Backup Server IP			Port	5060

#### Parameter Set-up:

• **Outbound Enable**: enable or disable to turn on or turn off the outbound proxy server.

- Preferred Outbound Proxy Server: enter the SIP address of the outbound proxy server.
- Preferred Outbound Proxy Port: Enter the Port number for establish call session via the outbound proxy server.
- Alternate Outbound Proxy Server: set up Backup Server IP for the backup outbound proxy server.
- Alternate Outbound Proxy Port: enter the Port number for establish call session via the backup outbound proxy server.

## 1.27.SIP Call DND & Return Code Configuration

DND (**Do not disturb**) setting allows you not to be disturbed by any unwanted incoming SIP calls. You can set up DND related parameters properly on the device web Phone > Call Feature > DND interface to block SIP calls you do not intend to answer. In the mean time, you can also define the code to be sent to the SIP server when you want to reject the call.

Whole Day	Disabled	-	Return Code When	486(Busy Here) 🔻
Schedule	Disabled	•	DND Start Time	00:00
DND End Time	00:00		Next Day	

#### Parameter Set-up:

- DND: check Whole Day or Schedule to enable the DND function. DND function is disabled by default.
- **Return Code When DND**: select what code should be sent to the calling device via SIP server. 404 for "Not found"; 480 for " Temporary unavailable"; 486 for "busy here".
- Schedule: enable DND schedule for your indoor monitor. To configure a specific time to enable DND feature. If you choose Schedule for DND, the Whole Day tab is available.

#### AKUVOX SMART INTERCOM www.akuvox.com

- **DND Start Time:** the start time for DND schedule.
- **DND End Time:** the end time for DND schedule.

## **1.28.Device Local RTP configuration**

For the device network data transmission purpose, device needs to be set up with a range of RTP port (**Real-time Transport Protocol**) for establishing an exclusive range of data transmission in the network. To set up device local RTP on web **Network > Advanced > Local RTP** interface.

Local RTP			
	Starting RTP Port	11800	(1024~65535)
	Max RTP Port	12000	(1024~65535)
	Max RTP Port	12000	

Parameter Set-up:

- **Starting RTP Port**: enter the Port value in order to establish the start point for the exclusive data transmission range.
- **Max RTP port**: enter the Port value in order to establish the end point for the exclusive data transmission range.

## **1.29.Data Transmission Type Configuration**

SIP message can be transmitted in three data transmission protocols: UDP (User Datagram Protocol), TCP(Transmission Control Protocol),TLS (Transport Layer Security) and DNS-SRV. In the meantime, you can also identify the server from which the data come from. To do this configuration on web Account > Basic > Transport Type interface.

sport Type	UDP	-	
	UDP		
	TCP		Cancel
	TLS		Cancer
	DNS-SRV		

#### Parameter Set-up:

- **UDP**:select **"UDP"** for unreliable but very efficient transport layer protocol. UDP is the default transport protocol.
- **TCP**: select **"TCP**" for Reliable but less-efficient transport layer protocol.
- **TLS**: select "**TLS**" for Secured and Reliable transport layer protocol.
- **DNS-SRV:** select "**DNS-SRV**" to obtain DNS record for specifying the location of services. And **SRV** not only records the server address but also the server port. Moreover, SRV can also be used to configure the priority and the weight of the server address.

## 1.30.Call Setting

IT83/IT82A/C317/C315 will auto answer all incoming calls if call auto-answer is enabled and receive live stream if live stream is enabled.

## **1.30.1.** Call Auto-answer Configuration

IT83/IT82A/C317/C315 will auto answer all incoming calls if call auto-answer is enabled and receive live stream if live stream is enabled. To enable or disable on web **Account > Advanced > Call > Auto Answer** interface. And set up the corresponding auto answer parameters on web **Phone > Call Feature > Others** interface.

Android Indoor Monitor Administrator Guide

Pthers Return Code When Auto Answer Delay Answer Mode Indoor Auto Answer Direct IP	486(Busy Here) 0 Video Disabled Enabled	•	<b>(0~30s)</b> Busy Tone Answer Tone	Enabled Enabled	•

#### Parameter Set-up:

- **Auto Answer:** turn on the the Auto Answer function by ticking the square box .
- Auto Answer Delay: set up the delay time (from 0-30 sec.) before the call can be answered automatically. For example, if you set the delay time as 1 second, then the call will be answered in 1 second automatically.
- **Answer Mode:** set up the video or audio mode you preferred for answering the call automatically.
- Indoor Auto Answer Mode: turn on the the Auto Answer function for call from other indoor monitors by ticking the check box .

#### 1.30.2. Auto-answer Allow List setting

Auto answered can only be applicable to the SIP or IP numbers that are already added in the auto-answer allow list of your indoor monitor. Therefore,

you are required to configure or edit the numbers in the white-list on web Phone > Call Feature > Auto Answer AllowList interface.

uto Answer All	owList	
Index	Device Location	SIP/IP
1	door phone 1	1123
2

SIP/IP numbers can be imported to or exported out of the indoor monitor in batch on web Phone > Call Feature > Allowlist Import/Export interface.

elected any files	Select File	→ Import	∃ Export	-
	elected any files	selected any files Select File	selected any files Select File 🕣 Import	selected any files Select File 于 Import 🕞 Export

## 1.30.3. Live Stream Setting

Receive Live Stream on the indoor monitor allows you to see the the video image (one way video stream) from the calling device such as a door phone whether or not you answered the call in audio or video mode, while the video image from your indoor monitor will not be sent to the calling devices in order to protect your privacy. To do the configuration on web **Phone > Call Feature >Audio Call Settings** interface.

Audio Call Setting		
Receive Live Stream	Disabled	-
Receive Live Stream	Disabled	•

When the feature is enabled, once a caller require a video call:

- Receive the incoming calls in video call mode so that both side can see each while talking in the two-way video conversation.
- Receive the incoming calls in audio call so that you can see the caller in the one-way video conversation while the call can not see you.

) Note:

• Only device with camera module will have this feature.

## 1.31. Intercom Call Configuration

If you want to see the image at the door station before answering the incoming call, you can enable the intercom preview function on web **Phone > Call Feature > Intercom** interface.

ntercom					
Active	Enabled		Intercom Mute	Disabled	•
Intercom Preview	Disabled	•			

#### Parameter Set-up:

- Intercom Active: tick the check box to enabled or disabled intercom function.
- **Intercom Mute:** tick the check box to enable mute the voice from the callee side and vice versa.
- **Intercom Preview:** tick the check box to enable the incoming call preview function.

## **1.32.PTime Configuration**

Ptime gives the length of time in milliseconds represented by the media in a packet. The SDP in the INVITE request sent by the calling party carries the ptime attribute, which indicates that the packing duration of the calling party's media is the value carried by ptime. After receiving the request message, the server replies with the ptime attribute in the SDP in 200 OK, indicating that the server-side support for the packaging time of the media is the value carried by ptime. The caller negotiates according to the ptime attribute carried in the SDP in the 200 OK, and finally sends the media package time, that is, the ptime value.

Max Local SIP Port	5062	(1024~65535)	
Min Local SIP Port	5062	(1024~65535)	
Auto Answer	Disabled	• PTime	20 💌
Prevent SIP Hacking	Disabled	•	

#### Parameter Set-up:

• **PTime:** you can disable the PTime feature. Or set up it from 10 to 60 seconds.

## Akuvox Smart

## **1.33.SIP Hacking Protection**

Internet phone eavesdropping is a kind of network attack, which aims to eavesdrop on the communication sessions of others in an unauthorized way. Attackers can use this malicious activity to capture and read content containing sensitive and confidential information. SIP hacking prevents SIP call from hacking in the Internet.

Max Local SIP Port	5062	(1024~65535)	
Min Local SIP Port	5062	(1024~65535)	
Auto Answer	Disabled 🔹	PTime	20 💌

#### Parameters Set-up:

• **Prevent SIP Hacking:** enable to active this feature during using sip call. This feature is only available for SIP call, not IP call.

## **1.34.Emergency Call Setting**

Emergency call is used to call out three emergency contacts when you are in urgent status. Especially for the elders and children. Press SOS key, the phone will automatically initiate the target SOS numbers.

## 1.34.1. SOS Number Display

To display SOS softkey on web **Phone > Key/Display > Home Page Display** interface. The icon will show in the main interface or more interface after configured.

Area 1	SOS 🔹	SOS	Not selected any files Select File Delete
Area 2	Message 💌		Not selected any files Select File Delete
lore Page Di	splay Example		

## 1.34.2. SOS Number Settings

To set up SOS numbers on device web **Phone > Intercom**.

Call Number 01			Call Number 02		
Call Number 03			Call Timeout	60s	
oop Time	3	-			

#### Parameter Set-up:

- Call Number: to set up 3 SOS numbers. Once users press SOS key on the home screen (SOS display key shall be set on the web manually), indoor monitors will call out the number in order.
- Call Timeout: set up the timeout for each number. Once users call out, if the other side will not answer within the timeout, indoor monitors will continue to call the next number.
- Loop Times: to setup the call loop times.

## 1.35.RF Setting (Optional)

IT82A supports RF(Radio Frequency) module to

connect a pendent to trigger some actions, like unlocking or making a emergency call. After pairing pendents and indoor monitors, then setup different RF actions on device **Advance Settings > RF Settings**. After power on the pendent, click **Learning** and press pendent one time, they will be paired. The green indicator means pairing successfully.

#### Parameters Set-up:

- Short Press When Idle: if you choose Assistance Call for short pressing which means when you pressing the pendent about 1s, the indoor monitor will make the pre-configured emergency call. No Action is default.
- Long Press: if you choose Unlock1/2/3 for long pressing which means when you pressing the pendent about 3s, it will send out a unlocking signal to the door phone during a call.

## **1.36.Multicast Configuration**

IT82A allows you to conduct one-to-many broadcasting via multicast function on web **Phone > Multicast** interface.

Iulticast Group	Disabled	-		
ulticast List				
Multicast G	Group		Multicast Address	
Multicast G	Group			
Multicast G	Group			
Multicast 0	Group			
sten List				
Listen Group	Listen	ing Address	Label	
Listen Group				
Listen Group				

#### Parameter Set-up:

- Multicast Setting: to set the indoor monitor in one of the groups or disable this function.
- **Multicast List:** to fill in the parameters of multicast group. Indoor monitor will establish multicast calls to other indoor monitors which are set in multicast group.
- Listen List: to fill in the parameters of listen group. Indoor monitor will receive multicast calls if some indoor monitors call the listen group.

• Label: To show the label name on the calling interface if users establish all call.

## **1.37.Call Forwarding Setting**

Call Forward is a feature used to redirect an incoming call to the specific third party. Users can redirect the incoming call based on different scenarios. Typically, call forward has three modes: **Always Forward/ No Answer Forward/Busy Forward**.

## **1.37.1.** Call Forwarding Configuration on the Device

To do the configuration on the Device **Settings > Call Feature** interface.

#### Akuvox Smart Intercom

#### Android Indoor Monitor Administrator Guide

£			
←	Call Feature		$\bigotimes$
	Account	Account 1	
	Always Forwarding		
	Forwarding Number	1002	
	Always On Code	*78	
	Always Off Code	*79	
	Call Forwarding Busy		
	Forwarding Number		
	Busy On Code		
	Busy Off Code		
	No Answer Forwarding		

#### Parameter Set-up:

- Account: to choose which account to implement call forwarding feature.
- Always Forwarding: to enable always forwarding function; all incoming calls will be automatically forwarded to a specific number.
- **Busy Forwarding:** To enable busy forwarding function; incoming calls will be forwarded to a specific number if phone is busy.
- **No Answer Forwarding**: To enable no answer forwarding function; incoming calls will be forwarded to a specific number if phone is not picked within no answer ring time.

## **1.37.2.** Call Forwarding Configuration on the Web

#### Interface

To set up forward function on web **Phone > Call Feature > Forward Transfer** interface.

Always Forward	Disabled	•	Target Number		
Busy Forward	Disabled		Target Number		
lo Answer Forward	Disabled	-	No Answer Ring Time	30	-

#### Parameter Set-up:

- Always Transfer: To enable always forwarding function; all incoming calls will be automatically forward to a specific number.
- **Busy Transfer:** To enable busy forwarding function; incoming calls will be forwarded to a specific number if phone is busy.**No Answer Transfer:** To enable no answer forwarding function; incoming calls will be forwarded to a specific number if phone is not picked within no answer ring time.

• No Answer Call Transfer Duration (Sec) : to set the no answer time

interval from 0-120 seconds before the call is transferred to a designated number.

You can read, create, and delete messages on the **Message** screen.

## 1.38.Manage Messages

You can check, create and clear messages as needed on the indoor monitor **Messages** screen. Click New to create a new text message and **Delete** icon to delete the existed messages.

ð		08:41 AM	Fri	16-04-2021
←	Text MSG			
			Notification	
			Text MSG	
			Owner MSG	
			Visitor MSG	
			Family MSG	
	H New			

Parameter Set-up:

- New: press this icon to create a new message
- **Delete:** press this icon to clear the messages that have been selected.
- **Cancel:** press this icon to cancel the action you do.

## 1.39. Configure Voice Message (MWI)

MWI (Message Waiting Indicator) is a notification that notifies you when you have a new voice mail message. To do the configuration on web Account >Advanced >Subscribe interface.

ubscribe			
MWI Subscribe	Disabled	•	
MWI Subscribe Period	1800		(120~65535s)
Voice Mail Number			

#### Parameter Set-up:

- **MWI Subscribe:** tick the check box to enable MWI function. •
- MWI Subscribe Period : set up interval between the MWI Subscribe messages.
- Voice Mail Number: enter the voice mail number for accessing your voice mail messages.

Audio& Video Codec Configuration for SIP Calls

## **1.40.Audio Codec Configuration**

Akuvox indoor monitor supports seven types of Codec (iLBC\_13\_3, iLBC\_15\_2, L16, PCMU, PCMA, G729, G722) for encoding and decoding the audio data during the call session. Each type of Codec varies in terms of sound quality. You can select the specific codec with different bandwidth and sample rate flexibly according to the actual network environment. To do the configuration on web **Account> Advanced > Audio Codecs** interface.

	Account Acc	ount 1 🔻	
udio Codecs			
Disabled	Codecs	Enabled C	Codecs
iLBC_13_3 iLBC_15_2 L16	~ >>	PCMU PCMA G729	*

Please refers to the bandwidth consumption and sample rate for the four codecs types below:

Codec Type	Bandwidth	Sample Rate
	Consumption	
РСМА	64 kbit/s	8kHZ
PCMU	64 kbit/s	8kHZ
G729	8 kbit/s	8kHZ
G722	64 kbit/s	16kHZ
iLBC_13_3	8,16 kbit/s	13.3kHZ
iLBC_15_2	8,16 kbit/s	15.2kHZ
L16	128 kbit/s	variable

## 1.41.Video Codec Configuration

IT82A supports VP8, H263, H264, H265 codec that

provides a better video quality at a much lower bit rate with different video quality and payload. To do the configuration on web **Account > Advanced > Video Codecs** interface. Choose an available video codecs and setup the codecs parameters.

	Disabled Codecs		Enabled Co	decs
F \	1265 /P8		H264 H263	r L
eo Codec	H263	¥	H264	VP8
	CIE	-	CIF	CIF
odec Resolution	CIF			
odec Resolution odec Bitrate	320	▼	320 💌	320 🔻

#### Parameter Set-up:

- **Name**: check to select the H264 video codec format for the door phone video stream. H264 is the video codec by default.
- **Resolution:** select the code resolution for the video quality among four options:"QCIF", "CIF", "VGA", "4CIF" and "720P" according to your actual network environment. The default code resolution is 4CIF.
- **Bitrate:** select the video stream bit rate (Ranging from 320-2048). The greater the bitrate, the data transmitted in every second is greater in amount therefore the video will be clearer. While the default code bitrate is 2048.
- **Payload:** select the payload type (ranging from 90-118) to configure audio/video configuration file. The default payload is 104.Security

To capture video image by pressing **Capture** during monitor or a video call.

# Akuvox Smart

Android Indoor Monitor Administrator Guide

## 1.43. Alarm and Arming Configuration

Alarm feature is used to connect some alarm detection devices to protect your home safety. Akuvox indoor monitors support 8 alarm connectors which means you can connect 8 different alarm sensors in different rooms of your house. For example, connecting a smoker sensor in your kitchen to detect if the gas is leaking, the indoor monitor will ring and send the alarm message to the target, like community property. Before checking Alarm feature on the device screen, you need to setup the Arming icon on the home page or more page on device web **Phone > Key/Display** interface.

# 1.43.2. Configure Alarm and Arming on the Web Interface

To set up a location-based alarm sensor on the device web **Arming> Zone Setting > Zone Setting** interface.

Zone Setting				
Zone	Location	Zone Type	Trigger Mode	Status
Zone1	Bedroom 💌	Infrared 💌	NC 🔻	Disabled 🔻
Zone2	Bedroom 🔻	Infrared <	NC 🔻	Disabled 🔻
Zone3	Bedroom 🔻	Infrared 🔻	NC 🔻	Disabled 🔻

### Parameter Set-up:

• Location: set up the location according to where the alarm sensor is stalled. You can select among ten location types: "Bedroom", "Gate",

AKUVOX SMART INTERCOM www.akuvox.com

Android Indoor Monitor Administrator Guide

" **Door**" " Guest room" ," Hall" ,"Window", " Balcony" ,"Kitchen", " Study" and "**Bathroom**".

- **Zone Type:** set up the alarm sensor types. You can select among four sensor types: "**Infrared**", "**Drmagnet**", "**Smoke**", "**Gas**", "**Urgency**".
- Trigger Mode: set sensor trigger mode between "NC" and "NO" according to your need.
- Status: set the alarm sensor status among three options: "Enable", "Disable","24H". Select "Enable" if you want to enable to the alarm, however you are required to set the alarm again after an alarm is disarmed. Select " Disable" if you want to disable the alarm, and select "24H" if you want alarm sensor to stay enabled for 24 hours without needing to set up the alarm manually again after the alarm is disarmed.

## 1.43.3. Configure Location-based Alarm

đ		1	2:55 AM		Sat 16-02-2019
←	Arming Mode				$\bigotimes$
Home			Night		y
Zon	e Location	Zone Type	Defence delay	Alarm Delay	
Zone	1 Bedroom	Infrared	0s delay	0s delay	
Zone	2 Bedroom	Infrared	90s delay	90s delay	
Zone	3 Bedroom	Infrared	90s delay	90s delay	
Zone	4 Bedroom	Infrared	90s delay	90s delay	
Zone	5 Bedroom	Infrared	90s delay	90s delay	
Zone	6 Bedroom	Infrared	90s delay	90s delay	
Zone	7 Bedroom	Infrared	90s delay	90s delay	
Zone	8 Bedroom	Infrared	90s delav	90s delav	

Configure the alarm sensor in the same way you do on the web interface.

#### Parameters set up:

- Location: to select which location the detection device is located, including Bedroom, Guest room, Hall, Window, Balcony, Kitchen, Study and Bathroom.
- **Zone type**: to select the type of detection device, including Infrared, Drmagnet, Smoke, Gas, and Urgency.
- **Defence delay**: it means when users enable the arming mode, there will be 90 seconds delay time for the alarm mode to be activated.
- Alarm delay: it means when the sensor triggered, there will be 90 seconds delay time to announce the notification.
- **Status**: To enable or disable Arming mode on the corresponding Zone.

## 1.43.4. Configure Alarm Text

After the alarm sensor is set up, you are allowed to customize your alarm text shown on the screen when an alarm is triggered on web **Arming> Zone Setting > Customized Alarm** interface. Enter the alarm text for the alarm at each location according to your need.

	Screen Saver Lock Time	30 minutes 🗸	
	Screen Saver		
	Screen Saver Type	Local Pictures $\vee$	
	Screen Lock		
	Screen Clean		
	Font Size	Normal 🗸	

## 1.44.1. Screen Unlock by Face ID

You can unlock device screen by scanning the pre-configured face. To register the face on device **Advance Settig > Face ID**. Click Add and agree the privacy agreement. Then looking the camera to put your face into the frame on the screen to register.

# 1.44.2. Screen Unlock by PIN Code

You can unlock device screen by entering the pre-configured PIN code when the screen is locked.

Note:

• Default unlock PIN is 123456.

# 1.45.Voice Encryption

The encryption function provides you with greater security for the intercom call. And Akuvox indoor monitors support three modes of voice encryption: SRTP(compulsory), SRTP(Optional), ZRTP(Optional) on web **Account > Advanced > Encryption** interface.

Encryption		
Voice Encryption	Disabled	

Parameter Set-up:

• Voice Encryption: select encryption mode from four options. If you select to Disable it, the call will not be encrypted. SRTP(Compulsory), all audio signals (technically speaking it is RTP streams) will be encrypted to improve security. SRTP(Optional), encrypts voice from the called party, if the called party also enables SRTP, the voice signals will also be encrypted. ZRTP(Optional) is the protocol that the two parties use to negotiate the SRTP session key.

## 1.46.Remote Control

Remote control function supports configuring a specific server to send HTTP commands or request to the indoor monitor to do some specific action on web **Phone > Call Feature > Remote Control** interface.

Remote Control			
Allowed Access IP List			

# 1.47. Relay Switch Setting

## 1.47.1. Local Relay Setting

Local relays in Akuvox indoor monitor can be used to trigger relay for the door access and trigger Chime bell as needed in different scenarios. You can do this configuration on web **Phone > Relay > Relay Setting > Local Relay** interface.

Relay Setting			
Local Relay1			
Relay Delay (Sec)	3 🔻	Relay Type	Open Door
Remote Control	Disabled 🔹	DTMF	
Local Relay2			
Relay Delay (Sec)	3 🔻	Relay Type	Open Door
Remote Control 2	Disabled 🔹	DTMF 2	

### Parameter set-up:

- **Relay Delay:** set the relay delay time after the relay is triggered.
- **Relay Type:** set relay action type. There are two types of relay, chime bell and open door. **Chime Bell**, when there is a call, the chime bell will ring. **Open door**, when press the unlock icon, the local relay will be opened.
- **Remote Control:** enable it to trigger local relay by DTMF and vice versa.

## 1.47.2. Remote Relay Switch Setting

You can use the unlock tab during the call to open the door on web Phone > Relay > Relay Setting > Remote Relay interface. You are required to set up the same DTMF code in the door phone and indoor monitor.

Remote Relay	
DTMF Code1	#
DTMF Code2	#
DTMF Code3	#

### Parameter Set-up:

**DTMF Code:** To set DTMF code for the remote relay, which is "#" by ۲ default.

# 1.48.Web Relay Setting

In addition to the relay that is connected to indoor monitor, you can also control the door access using the network-based web relay. To do this configuration on web Phone > Relay > Web Relay interface.

Android Indoor Monitor Administrator Guide

P Address		UserName	e		
Password	••••••				
eb Relay Action Set	ting				
Action ID	IP	SIP		Web Relay Action	
Action ID 01					
Action ID 02					

#### Parameter Set-up:

- IP address: enter the web relay IP address.
- User Name: enter the User name provided by the web relay manufacturer.
- **Password:** enter the password provided by the web relay manufacturer. The passwords is authenticated via HTTP and you can define the passwords using "http get" in Action.
- Web Relay Action: enter the specific web relay action command provided by the web manufacturer for different actions by the web relay.
- IP/SIP: enter the relay extension information, which can be a IP address or SIP account of an intercom device such as an indoor monitor, so that the specific action command will be sent when unlock is performed on the intercom device, while this setting is optional. And please refer to the example below:

http://admin:admin@192.168.1.2/state.xml?relayState=2.

## **1.49.Door Unlock Configuration**

## 1.49.1. Door Unlock by DTMF Code

AKUVOX SMART INTERCOM www.akuvox.com

DTMF codes can be configured on the web **Account > Advanced > DTMF** interface where you can set up identical DTMF code on the corresponding intercom devices, which allows residents to enter the DTMF code on the soft keypad or press DTMF code attached unlock tab on the screen to unlock the door for visitors etc., during a call.

e	RFC2833 🔻	How To Notify DTMF	Disabled	
AE Devileed	101	(06, 127)		

#### Parameter Set-up:

- **Type**: select DTMF type among four options: " **Inband**", " **RFC2833**", " **Info+Inband**" and "**Info+RFC2833**" according to your need.
- How to Notify DTMF: select among four options: "Disable" " DTMF"
   "DTMF-Relay" "Telephone-Event" according to your need.
- **DTMF Payload**: select the payload 96-127 for data transmission identification.

Note:

 Please refer to the chapter Relay Switch Setting for the specific DTMF code setting. Intercom devices involved must be consistent in the DTMF type, otherwise DTMF code cannot be applied.

## 1.49.2. Door Unlock via HTTP Command

You can unlock the door remotely without approaching the device physically for the door access by typing the created the HTTP command (URL) on the web browser to trigger the relay when you are not available by the door for

AKUVOX SMART INTERCOM www.akuvox.com

 
 Access

Auto-provisioning via Configuration File

# 1.52. Provisioning Principle

Akuvox Smart Intercom

Auto-provisioning is a feature used to configure or upgrade the devices in batch via third party servers. **DHCP, PNP, TFTP, FTP, HTTPS** are the protocols used by the Akuvox intercom devices to access the URL of the address of the third party server which stores configuration files and firmwares, which will then be used to to update the firmware and the corresponding parameters on the door phone.

## Please see the flow chart below:

# 1.53.Introduction to the Configuration Files for Auto-Provisioning

Configuration files have two formats for the auto-provisioning. one is the general configuration files used for the general provisioning and other one is the MAC-based configuration provisioning.

The difference between the two types of configuration files is shown as below:

- General configuration provisioning: a general file is stored in a server from which all the related devices will be able to download the same configuration file to update parameters on the devices. For example : cfq.
- MAC-based configuration provisioning: MAC-based configuration files is used for the auto-provisioning on a specific device as distinguished by its unique MAC number. And the configuration files named with device MAC number will be matched automatically with the device MAC number before being downloaded for the provisioning on the specific device.

## Note:

If a server has these two types of configuration files, then IP devices will first access the general configuration files before accessing the MAC-based configuration files.

# 1.54. Autop Schedule

Akuvox provides you with different Autop methods that enable the indoor monitor to perform provisioning for itself in a specific time according to your

schedule. To set up the schedule on device web Upgrade > Advanced > Automatic Autop interface.

#### Please see the picture below:

Mode	Power On	]
Schedule	Sunday 🔻	
	22 Hour(0~23) 0	Min(0~59)
Clear MD5	Submit	
Export Autop Templ	Export	

#### Parameter Set-up:

- **Power On:** select "**Power on**", if you want the device to perform Autop every time it boots up.
- Repeatedly: select " Repeatedly", if you want the device to perform autop according to the schedule you set up.
- Power On + Repeatedly: select "Power On + Repeatedly" if you want to combine Power On Mode and Repeatedly mode that will enable the device to perform Autop every time it boots up or according to the schedule you set up.
- Hourly Repeat: select "Hourly Repeat" if you want the device to perform Autop every hour.

# **1.55.DHCP Provisioning Configuration**

Auto-provisioning URL can also be obtained using DHCP option which allows device to send a request to a DHCP server for a specific DHCP option code. If you wan to use **Custom Option** as defined by users with option code range

AKUVOX SMART INTERCOM www.akuvox.com

ARCUYOX Smart Android Indoor Monitor Administrator Guide from 128-255), you are required to configure DHCP Custom Option on the web Upgrade > Advanced > Automatic Autop interface.

MANAN	NECOM Android Indoor M	Monitor Administrator Guid
Note:		
• The custom Option	n type must be a string. The v	value is the URL of
TFTP server.	(128~254)	

- **Custom Option**: enter the DHCP code that matched with corresponding URL so that device will find the configuration file server for the configuration or upgrading.
- DHCP Option 66: If none of the above is set, the device will automatically use DHCP Option 66 for getting the upgrade server URL. This is done within the software and the user does not need to specify this. To make it work, you need to configure the DHCP server for the option 66 with the update server URL in it.
- **DHCP Option 43:** If the device does not get an URL from DHCP Option 66, it will automatically use DHCP Option 43. This is done within the software and the user does not need to specify this. To make it work, you need to configure the DHCP server for the option 43 with the update server URL in it.

# 1.56.Static Provisioning Configuration

You can manually set up a specific server URL for downloading the firmware or configuration file on device web **Upgrade > Advanced > Automatic Autop** interface. If an autop schedule is set up, the indoor monitor will perform the auto provisioning on a specific timing according to autop schedule you set up. In addition,TFTP, FTP, HTTP, and HTTPS are the protocols that can be used for upgrading the device firmware and configuration.
