

## Quick Start Guide

1. Plug the Smart Outlet into a desired outlet. When the green Wi-Fi connection LED indicator is flashing slowly, the Smart Outlet is ready for network setup.
2. Make sure your iPhone or iPad (iOS 8.1 or later) is connected to a 2.4GHz Wi-Fi network. Using the router utility software, shutdown 5GHz Wi-Fi networks.
3. Download and open the free Koogeek Home app from the App Store.
4. Log in or sign up for a Koogeek account or simply tap Skip.

5. Tap "+" on the top right corner and follow the on-screen directions to complete network setup.

Note: To add more outlets (or repeat the outlet setup process), tap "+" and you will see the accessory list. Each accessory has an identification code, e.g., Koogeek-XXXX-XXXXXX. Make sure the last 6 characters of the identification code is consistent with the last 6 characters of MAC on the back of your Smart Outlet.

6. When prompted, scan the setup code or manually enter the setup code, and then follow the step to add the device to the Home and Room. Please keep the setup code for future use.

7. You can assign a name to any of the three outlets and use this name when speaking to Siri. For example, you can name Outlet 1 "Printer", then launch Siri and speak "Turn on the Printer".

8. Set up customized scenes to control multiple devices with a single command. For example, if you assign the "I'm going to bed" command to the scene of turning off bedroom light and turning on the fan, when you speak "I'm going to bed" to Siri, everything is done.

### Note:

The use of a HomeKit-enabled accessory need the follow permissions:  
Settings > iCloud > iCloud Drive > Turn On  
Settings > iCloud > Keychain > Turn On  
Settings > Privacy > HomeKit > Koogeek Home > Turn On

## Smart Outlet Overview

- |  |                               |
|--|-------------------------------|
| 1 Power indicator (Wi-Fi connection indicator) | 2 Power button (Reset button) |
| 3 Power button                                 | 4 Power indicator             |
| 5 Outlet 1                                     | 6 Outlet 2                    |
| 7 Outlet 3                                     | 8 USB port 1 (5V⇒1A Max.)     |
| 9 USB port 2 (5V⇒1A Max.)                      | 10 USB port 3 (5V⇒2.1A Max.)  |

### Power Button

Turn on or off any outlet manually by pressing its respective power button on the Smart Outlet.

### Restore Factory Settings

Press and hold the reset button for about 10 seconds. When the Wi-Fi connection indicator light flashes green slowly, it indicates that you have restored the device to factory settings.

### Wi-Fi Connection Indicator

Green LED flashes slowly: Smart Outlet is waiting for a Wi-Fi network configuration.  
Green LED flashes quickly: Smart Outlet is disconnected from a Wi-Fi network.

### Power Indicator (after configuring Wi-Fi)

Green LED stays lit: A given outlet is "On".  
Green LED is off: A given outlet is "Off".

## Electrical Ratings

Input: 120V AC, 60Hz  
Rated current: 15A  
Rated power: 1800W  
General use

## Specifications

Number of power outlets: 3 \* AC outlets  
Number of USB ports: 3 \* USB ports  
Total USB output: 5V⇒4.1A (Max.)  
USB output 1: 5V⇒1A (Max.)  
USB output 2: 5V⇒1A (Max.)  
USB output 3: 5V⇒2.1A (Max.)  
Wi-Fi: 802.11b/g/n, 2.4 GHz ONLY  
Power cord length: Approx. 1.5m

## Safety Warnings

- Plug directly into electric outlet (not into extension cord)
- For indoor use only
- Remove Smart Outlet from outlet before cleaning
- DO NOT clean with liquid
- DO NOT remove ground pin (middle pin)
- DO NOT use in wet or damp areas
- Keep children away from Smart Outlet
- DO NOT exceed the recommended electrical ratings
- DO NOT use in precision timing applications where inaccurate timing could be dangerous (sunlamps, saunas, etc.)
- DO NOT use with devices that should not be operated unattended.
