Section 15.212 Modular Transmitters							
Request for Modular ApprovalImage: Request for Limited Modular Approval							
	Requirements	EUT Conditions	Comply (Y/N)				
	Single Modular	Approval Requirements					
1	The radio elements of the modular						
	transmitter must have their own						
	shielding. The physical crystal and	Please Refer to EUT photos	YES				
	tuning capacitors may be located						
	external to the shielded radio elements.						
2	The modular transmitter must have						
	buffered modulation/data inputs (if such						
	inputs are provided) to ensure that the	EUT has buffered data inputs, and is	YES				
	module will comply with Part 15	integrated in chip BCM43907					
	requirements under conditions of						
2	excessive data rates or over-modulation.		TATE OF				
3	The modular transmitter must have its	Power in chip BCM43907	YES				
4	own power supply regulation.						
4	The modular transmitter must comply with the antenna and transmission						
	system requirements of Sections 15.203, 15.204(b) and 15.204(c). The antenna	The EUT has both integral antennas and	YES				
	must either be permanently attached or	external antennas with unique coupler	I LO				
	employ a "unique" antenna coupler (at	external antennas with unique coupler					
	all connections between the module and						
	the antenna, including the cable). The						
	"professional installation" provision of						
	Section 15.203 is not applicable to						
	modules but can apply to limited						
	modular approvals under paragraph (b)						
	of this section.						
5	The modular transmitter must be tested						
	in a stand-alone configuration, <i>i.e.</i> , the						
	module must not be inside another						
	device during testing for compliance	The EUT is tested in a stand-alone	YES				
	with Part 15 requirements. Unless the	configuration as seen in test photos					
	transmitter module will be battery						
	powered, it must comply with the AC						
	line conducted requirements found in						
	Section 15.207. AC or DC power lines						
	and data input/output lines connected to						
	the module must not contain ferrites, unless they will be marketed with the						
	module (see Section 15.27(a)). The						
	length of these lines shall be the length						
	typical of actual use or, if that length is						
	unknown, at least 10 centimeters to						
	insure that there is no coupling between						
	the case of the module and supporting						
	The cuse of the mount and supporting		1				

or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). Function of the modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. And, if the FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the hordule. The sector label can use wording such as the following. "Contains FCC identification number, and, if the FCC identification number, is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the neclosed module. The sector label can use wording such as the following: "Contains Transmitter Module is norwating that expresses the same meaning may be used. The Grantee may either provide aced to label, an example of which must be included in the application for equipment antiborization. (B) If the modular transmitter module is installed in the application for equipment and borization or on the device in which the is installed. If the module is not also repring to the electronic display of the CC cleantification number, the information must be readily accessible and visible on the module transmitter module(s)." Any similar wording such as the following: 7 The modular transmitter module(s). The equipment and which as the application for equipment and undiversition must be instructions on how to access the eight entronication. 7 The modular transmitter must comply with any specific rules or operating requirements that		· · · · · · · · · · · · · · · · · · ·		
module during testing shall be unmodified and commercially available (see Section 15.31(i)). For the modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. EUT has permanent label affixed to module PCB. See "Label Placement" photo. External label will also be affixed to any host product to identify the module is installed inside another device, the module is installed inside of the fPCC identification number, and if the FCC identification number, and if the FCC identification number, and if the FCC internal label will also be affixed to any host product to identify the module's presence. Transmitter Module FCC List, XZMODEL1" or "Contains FCC ID: XYEMODEL1" Any similar wording that expresses the same meaning may be used. The Grantee may with the module which explain this requirement. In the latter case, a copy of these instructions on sub to included in the application for equipment authorization, or, must provide adequate instructions subs to included in the application for equipment authorization, must be readily accessible and visible on the modular transmitter or on the device in which it is installed. The module is installed inside another device, then the outside of the device into which the module is installed must alsoft and label referring to the enclosed module. This exterior label can use wording such as the following: "Comains FCC certified transmitter module(b)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic alsyla, A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that		equipment. Any accessories, peripherals,		
unmodified and commercially available (see Section 15.31(i)). • 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. • (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number, and which the module is installed inside another device, then the cousile of the device into which the module is installed inside another device, then the cousile of the device into which the module is installed inside another device, then the cousile of the device into which the module is installed. This exterior label can use wording such as the following: "Contains Transmiter Module FCC ID: XTZMODEL! "or "Contains FTC ID: XTZMODEL! "or "Contains FTC ID: XTZMODEL! "or "Contains FTC ID: XTZMODEL! "or "Contains FTC ID: XTZMODEL! The section clabel can use wording such as the included in the application for equipment authorization. (B) If the modular transmitter suces an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter module(s)." Any similar wording that expresses the same meening may be used. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meening may be used. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording the exploses the electronic display. A copy of these instructions must be included in the				
(see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permamently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permamently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the module is installed inside another device, then the counside of the device into which the module is installed must also display a table referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID: YXTMODEL1." Any similar wording that approximation, (B) If the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. With any sectification number, the information must be readily accessible and wishile on the module transmitter or on the device in which it is installed in suite another, the information must be readily accessible and wishile on the module transmitter or on the device in which it is installed in the application for equipment authorization. (B) If the modular transmitter or on the device in which it is installed in the application for equipment authorization. The modular transmitter or on the device in which it is installed in the application for equipment authorization. (B) If the modular transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that <td></td> <td></td> <td></td> <td></td>				
6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number and if the FCC identification number and if the FCC identification number is not visible when the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmiter Module is installed must also display a label referring to the application for equipment authorization. EUT has permanently affixed label. In module is installed must also display to the wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization. EUT has permanently affixed label. In the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. With its installed for the module is installed mist be readily accessible and visible on the module is installed inside a conter device, then the application for equipment authorization. (B) If the module. Two "Contains FCC ID: XYZMODELI." Any similar wording that expresses the same meaning may be used. The Grante must be included in the application for equipment authorization. With any section number, the information must be readily accessible and visible on the module is installed mist be readily accessible and visible on the module is installed for the exterior is a conset or present escane meaning may be used. This exterior label can use wording such as the following:		unmodified and commercially available		
Provide a sequence of the seque		(see Section 15.31(i)).		
affixed label or must be capable of electronically displaying its FCC identification number. YES (A) if using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID: X7ZMODELI" or tools and electronic display of the FCC identification number is not visible which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter module(s)." Ary sinilar wording that expresses the same meaning may be u	6	The modular transmitter must be		
affixed label or must be capable of electronically displaying its FCC identification number. YES (A) if using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID: X7ZMODELI" or tools and electronic display of the FCC identification number is not visible which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter module(s)." Ary sinilar wording that expresses the same meaning may be u		equipped with either a permanently		
electronically displaying its FCC identification number. YES (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the modular is installed with its own FCC ID: ATAMODELL '' or 'Contains FCC ID: ATAMODELL '' or '' or the date at a and the application for equipment authorization. (B) If the modular transmitter vers an electronic display of the FCC 'identification number is that electronic display as label referring to the enclosed module. This stalled must display a label referring to the enclosed module. This stalled must display a label referring to the enclosed module. This copy of these instructions must be included in the a				
identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmiter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be readily accessible and visible on the module which explain this requirement. In the latter case, a copy of these instructions must be readily accessible and visible on the module transmitter wording such as the following: "Contains FCC identification number, the information must be readily accessible and visible on the module is installed misde another device, then the outside of the device in which it is installed. If the module is installed module transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on the colles can use wording such electronic display. A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter most comply with any specific rules or operating requirements that		-	FUT has permanent label affixed to	VFS
(A) If using a permanently affixed label, the modular transmiter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must alsoly as label regering to the enclosed module. This exterior label can use wording such as the following: "Contains Transmiter Module photo. External label will also be affixed to any host product to identify the module's presence. YZMODEL1." or "Contains FCC ID: XYZMODEL1." or "Contains FCC ID: XYZMODEL1." or "Contains FCC ID: XYZMODEL1." or "Contains FCC ID: XYZMODEL1." or "Contains FCC ID: NYZMODEL1." or the label and the application for equipment authorization. (B) If the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This sectoric label can use wording such as the following: "Contains FCC Cc certified transmitter module(s)." Ary similar wording that expresses the same meening may be used. The user manual m			-	
 modular transmitter must be labeled with its own FCC identification number, is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization, or, must provide adequate instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electrontic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which this installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. The modular transmitter must comply with any specific rules or operating requirements that 				
FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display at label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module module's presence. FCC 1D: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." or "Contains FCC ID: XYZMODEL1." or "contains FCC ID: XYZMODEL1." or "contains FCC ID: The Grantee may ther provide such a label, an example of which must be included in the application for equipment authorization, or, must provide dequate instructions must be included in the application for equipment authorization. module 's presence. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meening may be used. 	with any applicable RF exposure	User's Manual	YES		
	requirements in its final configuration.				
A limited modular approval may be granted for single or split modular transmitters that do not comply with					
all of the above requirements, e.g., shielding, minimum signaling amplitude, buffered modulation/data inputs, or					
power supply regulation, if the manufacturer can demonstrate by alternative means in the application for					
equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the					
operating conditions in which the transmitter will be used. Limited modular approval also may be granted in					
those instances where compliance with RF exposure rules is demonstrated only for particular product					
configura	configurations. The applicant for certification must state how control of the end product into which the module				
will be in	will be installed will be maintained such that full compliance of the end product is always ensured.
