

GET TO KNOW YOUR ATMOTUBE PLUS

Atmotube Plus was created to raise awareness about both indoor and outdoor air quality, so you can make the right choices every day and live healthier.

AIRFLOW MESH

This is where Atmotube Plus gets the Air from

USB TYPE-C

At last - anyside works

CARABINER MOUNT

Elegant and functional solution for carabiner clip

RGB LED

Multicolor LED shows different statuses of Atmotube Plus

BUTTON

The button gives you an opportunity to see current Air Quality Score indication on the LED light

SETTING UP THE ATMOTUBE PLUS

Charge your device

Make sure your device is charged. To charge Atmotube, connect it to a power supply with the USB type-C cable from the box for at least 1 hour. The LED light will change its color from orange to green once the Atmotube is fully charged.

INSTALLING THE ATMOTUBE APPLICATION

IOS devices

1. Browse atmotube.com/app in iOS browser.
2. Tap on Apple App Store™ icon.
3. Tap **GET**.
4. After the App was downloaded and installed, launch it and follow the setup instructions.

Android devices

1. Type atmotube.com/app in Android browser.
2. Tap Android Google play™ icon.
3. Tap **INSTALL**.
4. After the App was downloaded and installed, launch it and follow the setup instructions.

INDICATION ON DEVICE

The LED light color represents the current Air Quality Score, from Red (severely polluted) to Blue (clean). When you press the button, the LED will light up to show the current AQS level.

- GOOD
- MODERATE
- POLLUTED
- VERY POLLUTED
- SEVERELY POLLUTED

ATMOTUBE PLUS AT A GLANCE

- **Real time detection of**
 - Volatile Organic Compounds presence
 - Built in barometer
 - Temperature and relative humidity
- **500 mAh rechargeable Li-ion battery**
- **Bluetooth 5.0 LE**
- **USB Type-C slot for charging**

FIRST POWER ON

You can turn the Atmotube on by either holding the power button for 3 seconds or connecting Atmotube to 5V power source via USB cable.

After first switch on (or after prolonged inactivity period) sensor is being pre-heated

for around three minutes. In pre-heating mode, LED blinks in orange color; during this period of time, measurements can not be performed and device will not react on the button presses.

MEASUREMENTS

Atmotube Plus takes air measurements every few seconds, while it's on. The measurement mode is displayed on the main screen of your mobile App.

Please note that when the device has been switched on for the first time or has been off for more than few hours, it will require about 12 hours after the switch on to get to the high accuracy measurement mode.

AUTOMATIC RE-CALIBRATION

Atmotube Plus would automatically re-calibrate itself, ensuring measurement accuracy over time.

HELP

Troubleshooting and assistance can be found at atmotube.com/faq

PAIRING/UNPAIRING THE ATMOTUBE

Please, follow in-app instructions to pair the Atmotube with your smartphone. Atmotube would only be able to connect to a single device it has been paired to. To unpair the Atmotube, quickly press it's button five times - If unpairing was performed successfully, device LED will blink in blue 10 times.

SERVICE AND MAINTENANCE

Important!

! Do not try to modify or repair the Atmotube Plus. All procedures, related to Service and Maintenance should be performed by professional technicians.

COMPATIBLE DEVICES

iPhone 4S with iOS 9.0 or higher
iPod Touch 5th Generation
iPad 3rd Generation with iOS 9.0 and higher
Android OS 4.3 and higher with Bluetooth 4.0 low energy (BLE) support

REGULATORY INFORMATION

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, or more is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.

— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

FCC ID: 2AHGD-ATMO-PL1

This device complies with R&TTE Directive.
A copy of the EU Declaration of Conformity is available online at atmotube.com/regulatory

The symbol on the product or its packaging signifies that this product must be disposed of separately from ordinary household wastes at its end of life. Please kindly be aware that it is your responsibility to dispose of electronic equipment at recycling centers to help conserve natural resources.

Each country should have its collection centers for electrical/electronic equipment recycling. For detailed information about your recycling drop off point, contact the retailer where you bought the product or your local recycling authority.

- Do not dispose your product with household waste.
- Disposal of the packaging and your product should be done in accordance with local regulations.
