

**Subject:** Request for Class II Permissive Change for single module FCC ID : 2AHIS-VMakerPROW

Dear Examiner,

This letter is to request a Class II Permissive Change for FCC ID : 2AHIS-VMakerPROW.

The newly models VMPRO19EB4BAT and VMPRO19EB4WREP differs from the VMPRO19CB4BAT and VMPRO19CB4WREP models (which was certified under FCC-ID : 2AHIS-VMakerPROW) only by a minor layout modification in the supply network. In addition, modified USB component and updated matching network of the ESP2 IC. The models are equivalent in terms of their RF characteristics, as tuned by calibration procedure and validated by the testing, therefore the differences are minor enough to count as permissive-change, and described in the technical description attached.

**The reason for the modification of the module, is due to a worldwide supply chain shortage**

**Some of the components used in VMPRO19EB4BAT and VMPRO19EB4WREP have critical availability issue, that dramatically affects lead time and cost. Vayyar imaging Ltd. was required to do the needed component adaptations, to continue and provide the product to the customers.**

Sincerely,

Naftali Chayat
