

Circuit described

1.Wireless recharging 1 circuit description:

TYPE-C-5V Power supply input to XPM7105 wireless charger IC, through XPM7105 internal processing, tie-in transmitter coil charge their phone (emission frequency range 110 kHz to 205 kHz)

2.Wireless recharging 2 circuit description:

TYPE-C-5V Power supply input to XPM7105 wireless charger IC, through XPM7105 internal processing, tie-in transmitter coil charge their phone (emission frequency range 110 kHz to 205 kHz)
