LIMITED MODULAR APPROVAL REQUEST

Date: 05/08/2016

RE: FCC Limited Modular Approval
FCC ID: 2AHNOW2-RDO-9X

To Whom It May Concern:

Please be advised that the manufacturer requests limited modular approval for the transmitter concerned as the module does not contain on-board power supply regulation and features a standard RF connector for an external antenna. It is for these reasons that the manufacturer will apply for limited modular approval and have control over the installation of the module.

The manufacturer will have full control of the installation and use of the module as it will only be installed into Ramtech Electronics Ltd. products including but not limited to:

Product Code	Product Description
W2-ECP-CSS-N-9X	Emergency Call Point with Combined Siren and Strobe
W2-SEN-HTS-N-9X	Heat Sensor
W2-SEN-SMK-N-9X	Smoke Sensor
W2-SEN-SMP-N-9X	Dust Proof Smoke Sensor
W2-LNK-NNN-N-9X	Radio Link
W2-INF-I2O-N-9X	Interface
W2-SCU-STD-U-9X	Emergency System Control Unit

The manufacturer's products will provide the required power supply to correctly power the module and also feature a fixed antenna that is internally secured and not interchangeable by the end user. The fixed antenna model shall be the antenna model used during compliance testing and will not increase the gain of the module above regulation limits.

Thank you for your attention to this matter.

Yours faithfully

Richard Fletcher
