Front

Left Side

Note: Liquid-tight flex conduit fitting is included

Right Side

Note: A watertight cord grip feed-through fitting is provided for the DAS and Donor coaxial jumper cables. These cables connect to the N-Female connectors on the BDA panel inside the enclosure. In some applications, fan hoods may be added to both sides of the enclosure.

Top and Bottom

Back of the Enclosure

Note: Watertight NEMA-4 enclosure mounting tabs are provided. The tabs are bolted through the 4 corner holes shown in the picture.
