Reliability Test Report

安特微智能通讯(深圳)有限公司
 ATWE Intelligent Communications (Shenzhen) Co., Ltd.

Constant temperature and humidity, ink adhesion test report

Custom	Guilin Feiyu	Date	2023-01-06	specifications	FPC
Product name	VCAM3S-GAntenna	number	2PCS	Test time	280min

Test purpose: To test the reliability of the product and the adhesion of the coating, as well as the oxidation and corrosion resistance of the coating.

Equipment name: High and low temperature test box

Testing Parameters

temperature	high temperature	70℃	low temperature		Temperature tolerance	1℃		
time	constant temperature	high temperature	24h	High temperature rise	10min	notes		
		low temperature		Low temperature cooling				
Number of cycles	0	other	relative humidity	95%	±1%			
Visual inspection	lamination	ACC	fold	ACC	bubble	ACC	Ink detachment	ACC

The judgment result ACC is passed and NG is unqualified.

Local diaphaneity Test

Tools:	Baige knife, 3M600 tape	Conclusion :	Perform three 90 ° tensile tests on the 100 grid area using 3M600, and the ink shedding area is less than 5%, which meets the testing requirements.

Packaging specifications

ATWE product Packaging specifications			
Development department		:	Engineering department
formulate Date: January 6, 2023			
Product name	VCAM3S-GAntenna	Customer Name	Guilin Feiyu
Specification and model	25.6*13.1mm Single panel FPC	Product part number	ATWE-01-0388-010

一、 PE self sealing bag, 100PCS/bag。

(Refer to the diagram)

2、 Load a large box. (The quantity is based on the actual order and packaging quantity) III. Seal the box, and attach our production label and ROHS label to the outer box

Note: The above packaging methods are for reference. After formal mass production, the specific packaging quantity may vary depending on the product form. If you have any objections to the above packaging methods, please raise them before our company receives the first order, so that our company can comply with your packaging requirements and avoid product quality issues caused by insufficient communication.
