

FCC ID Labeling

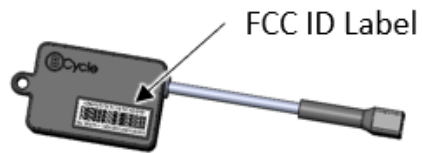

Labeling for the FCC ID will be dependent on the application in which the module is used. In the Peripheral application on the e-bike, the module is housed in an enclosure that will have the FCC ID label factory-applied by our manufacturer.

In the Central applications, the device will be provided to the customer along with a permanent adhesive label stating "CONTAINS FCC ID 2AHXD-5267706." The installation instructions for the product will instruct the customers to apply the FCC ID label to the outside of the kiosk or bike share dock in a visible location.

Application 5273582 in stand-alone bike docks

Application 5273581 on e-bikes

Application 5273583 in station-based kiosks
