- 5 Specifications
Product size:252*119.5*116.5mm
Material:ABS
Chipset: V2.1+EDR,
Frequency : 100HZ-20KHZ
Speaker: 4Ω 5W*1+4Ω 3W*2
Charging Time : 2 hours
Working Time : 4-5 hours
Weight: 1 Kg
Bluetooth working range≤10M).

II Operation

Turn on speaker via the switch located on the side of the device.
Speaker will default to Bluetooth mode when switched on without the 3.5mm cable connected. The LED indicator light will flash blue indicating the device is pairing mode.

A. Bluetooth Mode - Pair to “BS0091-1”:

1. The blue flashing LED indicator indicates pairing mode. Once a connection with media device is established, the flash will slow, remaining blue.
2. “⏮” Button: Shorting click skips to previous track. Press and hold to decrease volume.
3. “⏸” Button: Pause/play music with a short click.
4. “⏭” Button: Single click to next song. Hold on to turn up the volume.

B. 3.5mm Line-in mode:

1. Insert one of included 3.5mm cable to AUX port, connecting other end to device's AUX port.(LED is stable blue light. Line-in function does not support answering of incoming calls).

FCC Notice

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
