Tablet PC

User Manual

Please read this manual before operating your device and keep it for future reference.

Tablet PC

Assembly Tab

- Pass the USB cable (2) in the tab rubber (18) .

- Connect the USB cable (2) to the tab (19) .

- To assemble the tab (19) in the tab rubber (18) and assembling in the HMI structure (1)

- Connect the pass cable (7) to the tab (19) .

Assemble the component (20) and screw the screws TB torx M3x20 (21)

The device is on a beauty instrument, which is used at 20cm from your body. And this device cannot use alone or on some other equipment.

This equipment is embedded in the beauty equipment, installed, the beauty instrument will output a 12V voltage to the flat, so that flat panel and beauty equipment connected together, open the instrument switch, the tablet will boot, and then on the tablet security app , By opening APP to control the various beauty equipment debugging and use

Before you begin using your new tablet

Included in the box with your tablet are separate information leaflets. These leaflets provide you with important information regarding your new device. Please read all of the information provided. This information will help you to get the most out of your tablet, reduce the risk of injury, avoid damage to your device, and make you aware of legal regulations regarding the use of this device.

It's important to review the Product Safety and Warranty Information guide before you begin using your new tablet. Please follow all of the product safety and operating instructions and retain them for future reference. Observe all warnings to reduce the risk of injury, damage, and legal liabilities.

Please read and observe the following information for safe and proper use of your tablet and to prevent damage.

● Do not disassemble or open, crush, bend or deform, puncture or shred.

● Repairs under warranty, may include replacement parts or boards that are either new or reconditioned, provided that they have functionality equal to that of the parts being replaced.

- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion, or other hazard.

- Only use the battery for the system for which it is specified.

- Only use the battery with a charging system that has been qualified with the system per CTIA Certification Require- ments for Battery System Compliance to IEEE1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.

- Do not short circuit a battery or allow metallic conductive objects to contact the battery terminals.

- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard. Only authorized service providers shall replace battery (If the battery is non-user replaceable).

- Battery usage by children should be supervised.

- Avoid dropping the tablet or battery. If the tablet or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center

for inspection.

- Improper battery use may result in a fire, explosion, or other hazard.

- For those host devices that utilize a USB port as a charging source, the host device's user manual shall include a state- ment that the device shall only be connected to products that bear the USB-IF logo or have completed the USB-IF compliance program.

- Always unplug the charger from the wall socket after the tablet is fully charged to save unnecessary power consumption of the charger.

- Do not place any heavy items on the power cord. Do not damage the power cord by bending, twisting, or heating and do not allow the power cord to be crimped because it may cause an electric shock or fire. Using a power cord with a loose plug may also cause an electric shock or fire.

- If you put your tablet in a bag or briefcase without covering the power port (Charger/USB port), metallic articles (such as a coin, paperclip, pen, etc.) that come into contact with the power plug pin may short-circuit your tablet's battery terminals. This may damage the battery and could cause an explosion. Always cover the power port when not in use.

- Keep the tablet away from babies and small children.

If children are allowed to use the tablet, their parents or legal guardians are responsible for supervising and teaching them how to use it safely according to the manual's safety precautions.

- If liquid from the battery in the tablet comes in contact with skin or clothing, wash the area with fresh water. The battery fluid may cause skin inflammation. If the tablet shows any indication of battery leakage, do not use it. Take it to the nearest service center or dealer for assistance. Be careful that children do not swallow any parts (such as earphone, connection parts of the device, etc.). This could cause asphyxiation or suffocation resulting in serious injury or death.

- Do not handle the tablet with wet hands while it is being charged. It may cause an electric shock or seriously damage your tablet.

- Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your tablet. This could cause a fire.

Parts list

Parts	Quantity
