

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph of a laboratory setup for conducted emission testing. On the left, a piece of electronic equipment with a screen is placed on a white cabinet. A power cord runs from the equipment to a power strip on the wall. Another power cord runs from the power strip to a small device on the floor, which is marked with yellow and black hazard tape. To the right, a wooden table holds a small white camera or sensor. The background shows a glass partition and a wall with a power outlet and a red fire alarm button.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a laboratory setup for radiation emission testing. The room is lined with white, square-shaped electromagnetic interference (EMI) shields. In the center, a piece of electronic equipment is placed on a white stand. The stand is supported by a metal frame. The floor is marked with yellow and black hazard tape. The background shows a glass partition and a wall with a power outlet and a red fire alarm button.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
