Material	Plastic; Cast iron hardware

Before Assembly

1. Inspect lamp before beginning assembly. Wire connections have been made at the factory and the lamp is ready for assembly.
2. Remove all packing materials from the lamp.
3. To prevent bad connections, avoid pulling wiring connections when removing contents from package or during installation.
4. Lay out all the parts on a flat surface.
5. The floor lamp consists of seven parts: 1×Lamp Head, 4×Pole, 1×Lamp Base, 1×Electric Wire with Adapter (Refer to illustration).

Assembly Instruction

1. Place the lamp base on flat surface, then screw each two parts clockwise in order.

Note:

- Please take care not to pinch or damage the wires.
- For better installation, please tighten the bottom pole and lamp base firstly.
- Make sure each section of tubes are tightened.

2. Plug adapter into outlet and now the lamp is ready for use.

Adjustment

For best performance, please adjust the lamp position to directly above your area of reading/working.

English

English

30 ° up/ down adjustable

PART One : Download the App

Step A: Smart Life app installation

Please choose either way below to download and install the app.

1. As per your phone system, choose the QR code to scan.

iOS

Android

2. Search keyword 'Smart Life' in Apple Store or Google Play.

Step B: Create an account on Smart Life and login.

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

To comply with FCC RF exposure compliance requirements, this grant is applicable to only mobile configurations. The antennas used for this transmitter must be installed to provide a separation distance of at least 20cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.
