

Homido - BTGP-3

Homido - BTGP-3

Instructions Manual

Product introduction:
Homido Gampead is a Bluetooth (2.1+EDR) connected Game controller for use with Android devices (4.0 version or above).

Disclaimer:
The Gampead works only with dedicated games.
When the Gampead is plugged in, the LED will flash on the unit. When the Gampead is fully charged the LED will stop flashing.
The button mapping may differ depending on the game. Please check settings or help section in each game.

Product Specifications:

Size	159 x 103 x 68 mm
Weight	Bluetooth 2.1±EDR
Wireless distance	2 ~ 10 m
Compatibility	Android smartphones
Battery	Lithium 3.7V 600mAh
Autonomy of the battery	10 hours

Charging
To charge the device, plug in the USB cable and connect to the Gampead. When the Gampead is fully charged the LED will stop flashing.
The Gampead has a Sleep function to conserve battery power. The Gampead enters sleep mode after 5 minutes of disconnection, or after 15 minutes without action.

Pairing with Android device:
Once pairing has been set up to Bluetooth settings and turn on Bluetooth (Please consult the manual that accompanied your device for further information).
When the Gampead is powered on, the B button and then press the Home button at the same time until the LED blinks (hold approx. 3 seconds).
Go to the Bluetooth settings on the smartphone and connect to the Bluetooth controller. Identify the Gampead (name as HOMIDO), and confirm pairing.
Once the Gampead is Paired with the Smartphone the LED light will stay ON.

Power ON/OFF
Press Power Home button for 2 seconds.
Power Off: Press Home button for 5 seconds.
The Gampead has a Sleep function to conserve battery power. The Gampead enters sleep mode after 5 minutes of disconnection, or after 15 minutes without action.

Game Reconnection
Once pairing has been set up to work with your device it is simply to reconnect the Gampead. Turn on the Gampead by Pressing Home for 2 seconds. The Gampead will connect automatically. (Make sure Homido is ON on your smartphone before trying to connect the Gampead)

Homido - BTGP-3

Konfigurationsanleitung

Präsentation des produit:
Homido Gampead se connecte en Bluetooth (2.1+EDR), et est compatible avec les appareils Android (4.0 et version suivantes).

Avertissement:
La manette fonctionne uniquement avec des jeux dédiés. Pour trouver des jeux compatibles, veuillez utiliser l'application Homido Center et sélectionner la catégorie Gampead. La correspondance des boutons peut varier en fonction du jeu. Veuillez vérifier les paramètres de chaque jeu.

Caractéristiques du produit:

Taille	159 x 103 x 68 mm
Poids	Bluetooth 2.1±EDR
Distance sans fil	2 ~ 10 m
Compatibilité	Android smartphones
Batterie	Lithium 3.7V 600mAh
Autonomie de la batterie	10 heures

Chargement
Pour charger l'appareil, branchez le câble USB fourni et connectez-le à la manette. Lorsque la manette est complètement chargée, l'LED s'arrête de clignoter.
La manette dispose d'une fonction Sleep pour économiser l'énergie de la batterie. La manette passe en mode veille après 15 minutes de déconnexion, ou après 15 minutes sans utilisation.

Connexion avec un appareil Android:
Sur votre téléphone, activez le Bluetooth dans les réglages (Veuillez consulter le manuel d'utilisation de votre smartphone pour plus d'informations).
Une fois la manette allumée, appuyez sur la touche Home pendant 2 secondes.
3. Sur votre smartphone, allez dans les paramètres Bluetooth et connectez-vous à la manette (nom de la manette: HOMIDO) et confirmez la connexion.
4. Une fois que la manette est connectée avec le Smartphone le voyant restera allumé pendant 2 secondes.

Allumer / Éteindre la manette
Allumer: Appuyez sur la touche Accueil pendant 2 secondes.
Éteindre: Appuyez sur la touche Accueil pendant 5 secondes.
La manette dispose d'une fonction de mise en veille pour économiser l'énergie de la batterie. La manette passe en mode veille après 15 minutes de déconnexion, ou après 15 minutes sans utilisation.

Reconnexion de la manette
Une fois que la connexion a été configurée pour fonctionner avec votre appareil, il est simple de reconnecter la manette. Allumez la manette en appuyant sur la touche Accueil pendant 2 secondes, et elle se connectera automatiquement. (Assurez-vous que Bluetooth soit activé sur votre smartphone avant d'essayer de connecter la manette.)

Homido - BTGP-3

Product Manual

Produktbeschreibung:
Das Gampead ist ein Bluetooth (2.1+EDR) mit Android-Systemen (Version 4.0 oder höher) verknüpft.
Das Gampead ist nur mit speziellen Spielen kompatibel. Sie Sie auf dem Homido Center in der Kategorie Gampead.

Wartungsausschuss
Das Gampead funktioniert nur mit speziellen Spielen. Sie Sie auf dem Homido Center in der Kategorie Gampead.
Das Gampead hat eine Sleep-Funktion, um den Strom zu sparen. Das Gampead geht in den Schlafmodus, wenn es 5 Minuten ohne Aktion ist.

Produktmerkmale:
Größe: 159 x 103 x 68 mm
Gewicht: Bluetooth 2.1±EDR
Drahtlose Reichweite: 2 ~ 10 m
Kompatibilität: Android Smartphones
Batterie: Lithium 3.7V 600mAh
Reichweite der Ladung: 10 Stunden
