

# CLAPTRAP 4 PORT USB HUB

## USER MANUAL

Interface: USB 2.0

Transfer speed: 480Mbps

Number of ports: 4

Cable length: 100cm

Working Voltage: 250mA each port, with 4 items plugged in max output is 1A each port

Dimension: 12cmL\*13cmW\*17cmH

Operating System Compatibility: Windows: Windows 7, 8 and 10

Apple: OS X 10.8 or later

### FUNCTION:

1. Plug in the attached USB cable to a USB port, this will power the unit. The LED eye of Claptrap will illuminate blue and stay solid on indicating power to the USB Hub. A Clap Trap sound phrase will be activated when the USB Hub is plugged in.
2. There are 4 USB ports on the back of the device. Each USB port has a specific phrase associated. When a USB cable is plugged in or out of an available port, a Claptrap sound phrase will be activated and the his eye will blink.
3. Multiple devices: you can plug up to 4 devices into the hub and they will be able to charge and transmit data at the same time or be used for example a keyboard or mouse for pc or mac.
4. Mute Switch: If you wish to mute all audio sounds coming from Claptrap, there is a silver mute button on the top front left corner of Claptrap. Pushing this in will allow audio from Claptrap, pushing it again to the out position will mute all audio from Claptrap.

*\* Note: The antenna does not serve any function.*

**NOTE:** The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
