1. Left Button
2. Right Button
3. Scroll Wheel

4. Switch
5. USB Receiver (Stored in battery compartment)

Features

1. **Stable Wireless Connection:** With 2.4GHz wireless technology, this mouse can be stably connected to use within 10m.
2. **More Power-saving:** Equipped with the first-rate chip, the mouse is 5 times power-saving than normal mouse. The standby time can reach up to 24 months.
3. **Mute Button Design:** Adopted independent micro mute switch, this mouse can reduce noise by 90% above. You don't need to worry about disturbing about others.

Instructions

1. Take a AA dry battery into mouse with correct polarity direction, and turn on its bottom switch.
2. Take out USB receiver and plug it into computer.
3. It's workable after its driver is installed on computer automatically.

Warning:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF exposure compliance statement:

This device has been evaluated to meet the general RF exposure requirement
