## **SMT TELECOMM HK LIMITED**

## WIFI Channel 12 and 13Declaration Letter

We declare the equipment identified below with regards to Channel 12 and 13 capabilities for FCC ID: 2AIMEX325A

| Declaration                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|
| Product hardware does not have the capability to operate on Channel 12 and 13.                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |
| Product hardware has the capability to operate on Channel 12 and 13. However, these two channels will be disabled via software and will not be accessible to user.                                                                                                                                                                                                                                                                                                            |  |  |  |
| Product hardware has the capability to operate on WiFi Channel 12 and 13, and meets the requirements of KDB 594280 D01 v02r01. Please note:  1.) By default, this device operates in a mode that is compliant with the U.S. requirements.  2.) This device will also use supplemental information such as geo-location data to determine that it is operating outside the U.S., if necessary, to change its power. Such supplemental data will be derived from the following: |  |  |  |
| ☐ Global Navigation Satellite System (GNSS)7 sensors in the device                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |
| Mobile Country Code (MCC),8 or MCC with a Mobile Network code (MNC), received from a CMRS9 carrier and received directly by a receiver on the device                                                                                                                                                                                                                                                                                                                          |  |  |  |
| Country information derived from multiple adjacent access points (for example using IEEE Std 802.11d provisions) may be permitted on case-by-case basis                                                                                                                                                                                                                                                                                                                       |  |  |  |
| ☐ Other suitable geo-location data based on IP addresses or other reliable source.                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |
