MID Introduction

Battery Charging

If this navigator is first used, please use AV adaptor to fully charge it.

1. Apply the power adaptor to charge for MID.

MID Status and Reminder

Reminder icons

When some remind message appears in your reminder window, please click column and slip the screen to open the reminder list. Choose the menu you need, and confirm the information. Then you can close the reminder window through clicking the column to slide up. Please refer to below status icons:

<u></u>	New email	*	Airplane Mode on
N	USB connected	N	USB debugging connected
Δ	Return button		Downloading
	Display recently-used application	0	Home button
	Current electric volume	•	WIFI connected, internet is available

Reminder board

Reminder icons will work while receiving emails, WIFI is open, you can open the reminder board to view the detailed information.

Open the reminder board

When the reminder column shows new reminder icon, please hold the column and slip down your finger, then the reminder board is opened.

Quick Start Guide

Keys Function

Keys Function Description:

Power button	Short press to sleep/wake up, long press to startup and shutdown.
Volume + (up)	increase the volume
Volume - (down)	decrease the volume
HOME button (home)	Click it in any interface will return to main interface.
Back button (back)	click it in any interface will return to previous menu
Menu button	This button will display in menu interface.
Setting button	display recently browsed history; double click this button, you can switch between the last two applications

Startup

Long press POWER key for three seconds, you can enter into startup picture. The system enters into screen lock status, please unlock it.

Shutdown

1. Long press POWER, it will popup shutdown window.

2. Shutdown window contains reboot mode, airplane mode and power off mode three options.

3. Click power off is the last step.

Open and Close of the Screen

Screen will be closed on its own when no operation happens.

1.Screen will be closed on its own if no operation happens for some time to save battery power

2.When screen is open, press POWER key, the screen will be closed immediately.

Open the screen when it is closed.

If the screen is closed, short press POWER to open the screen. The screen will be locked open it, it will show the picture as below picture, left slide to unlock and enter into camera, right slide the unlock icon and enter into Voice Search, upward slide unlock the screen.

MID operating methods

There are below methods to view the main screen, menu and application procedure in your MID.

Click

When you want to use the screen keyboard typing or choose application in the main interface, you only need to touch it by your finger.

Press on

If you want to open some item(textbox or the link in the webpage), or shortcut and main procedure move, you can press on this item.

Quickly slide or slide indicates

Quickly slide or slide indicates make quick vertical or horizon movement by finger.

Pull

Before you pull, you need to hold the it with strength until you pull it into the position you want.

Rotate

For most pictures, you only need to rotate the MID sidewise to change the screen direction from horizon to vertical. For instance, when you are typing words, and watching movies.

Home Page

Main interface as below picture 3.5-1, long press the blank and it will popup windows to set wallpaper, folder, widgets, and shortcut.

The extended home page

The home page can be extended beyond the wideness of screen to provide more space, which you can put new-added shortcuts and widgets. Click the blank space in home page then slide right or left to extend to the right or left of the screen. In the home page, there are two extended pictures.

The shortcut icons management in desktop application.

Create folder icon in desktop

1.Drag the icons need to be put together on one icon(can also overlay several icons)

2. Then click the overlaid icons, the applications can be folded.

Click the unnamed folder in the black box, it will popup the hidden keyboard, the folder name can be renamed (this is similar with Apple IOS system), the icons position can be changed through long press.

Remove the icons in desktop

1.Long press the icons need to be remove, then on the right above of the screen, it will appear icons.

2.Drag the icon to the above of the remove icon, till the icon become red. then move your finger to delete the icon.

Change the wallpaper of desktop

1. In home page, long press any blank space in main screen, it will popup a window to change the wallpaper.

2 Click the gallery or wallpaper gallery to select the wallpaper.

Visit Application Procedures

Click 🛄 in right top, enter into main interface as Picture 3.6-1, choose the application procedure you want to visit.

Return to home page

USB Connection

MID storage configuration

Before transmitting documents, you have to conduct storage configuration for your MID:

1. Connect the MID and computer by USB cable, the reminder column will show the remind information.

2.Open the reminder board; please view the MID status and reminder to learn how to open the board.

3.In the reminder board, click the "USB for file transfer", it will as below, then click "File transfers".

4.Now the USB is connected successfully.

Copy the document into memory card

1 Connect the MID to computer with USB cable.

As MID storage configuration, it is connected with computer successfully.
 Open the "My computer" in your computer, check the items in "MTP devices".

4.Copy the documents you need into "MTP devices".

5.After copying finishes, unplug the USB can.

Typing words

When you start the procedure or choose the words or numbers edition, it will show the screen keyboard. The keyboard contains below typing options:

1.Android keyboard

Choose the typing method you want

1.Click Setting procedure application.

2.Click Language and Keyboard.

3.In the text setting area will reveal all the installed words-typing methods in your MID.

4. Tick the typing method you want.

Use and switch of input method

1	switch the capital and small letter
2	switch the mode of words input
3	click to insert the space
4	click input to execute
5	delete the character in the left of cursor, click and hold to delete all the characters in the left on the cursor

Operation Technique

Enter widgets interface

In the application interface, click widgets on the above of screen, or slide the screen, it will switch into widgets interface. Long press any widget to create its shortcut, then you can enter into the application through the shortcut icon.

Create application shortcut icons in the desktop

In the application interface or widgets interface, long press any icon to switch into desktop automatically, drag and hold the icon, you can move to any position in the desktop.

Remind: If the target position has no space, the widget won't be add in the main screen.

Quick Setting

Swipe-down gesture from the top of the screen, there are nine shortcuts icons, such as Wi-Fi, Bluetooth, Auto-rotate, and so on. In the full Quick Settings list you can also tap the edit button at the bottom right to rearrange the tiles or replace them with others. The optional extras list is pretty minimal: Just Hotspot, Data saver and Invert colors. But developers are now able to create custom Quick Settings tiles for their apps, which will definitely make things a lot more interesting in the coming mouths.

Basic Setting

Wireless and Internet

Connect Wi-Fi

1) In the main menu or interface, choose setting application procedure.

2) Click WLAN, open wifi, MID will automatically search the available Wifi wireless internet.

3)Choose the Wi-Fi internet you want to connect, if it has password, it will popup the password window, enter password, click connect.

Backup and Reset

Connect WIFI and login your google account, choose backup my data, system will backup your data into google server.

If you need to recovery factory reset, please click reset, if you need to formulate NAND, please click reset tablet.

Date and Time

According to the preset, system will voluntarily apply the date, zone, and time provided by internet.

Manual set date, time and zone

- 1. Click Setting application procedure.
- 2. Slide down the screen, then click date and time.
- 3. Turn off "auto setting of date and time".
- 4. Turn off "auto setting zone".

5. Click Zone Selecting, then choose the zone lists. Slide down the list to view more zones.

6. Click Set date, then click upper or down button to adjust date, month, and year, click setting when you finish selection.

7. Click Set Time, then click upper or down button to adjust hour and minute, click AM or PM to change morning or afternoon (there is no such selection when you se 24-hour format). Click Setting to finish.

8. Click 24-hour format, switch between 12-hour or 24-hour format, the time format you choose will be used on the alarm clock.

9. Click date format setting, then choose the time format you want to show on MID.

Note: If you use the time internet provided, you will not able to set the date

Fixed-time Startup and Shutdown

1. Click Setting application procedure

- 2.Click Schedule power on & off.
- 3 Operate as below

Assistance Function

Font size

Click it to make system font large size

Click power button to end calls

When Click call, press "power" button, call will end but not hold.

Touch and hold delay

Click touch and hold delay to increase time

Install webpage script

It will allow you install webpage scrip when you open system,, but it will increase the risk when you are browsing webpage.

Engineer Selection

1. USB debugging After opening USB bugging, you can use some software to read MID software, but when USB debugging is turned on, USB storage needs to manual adjust.

2.Stay awake If you open stay awake, it will never auto sleep when your MID is charging.

3. Pointer Location

If you open pointer location, it will display touch vertical and horizontal direction.

4. Show taps

If you open display touch screen operation, it will display touch operation on the screen. It is suggested to use with same direction as pointer location.

5. Show surface updates If you open screen refresh, it will display related area when the area is refreshing.

6. Show CPU usage After open CUP usage, in the right top of MID will show CPU usage situation

Drag the progress bar to adjust play progress. Operation of music player button.

Photo Gallery

Photo gallery application can auto search photos and video files in SD card, and photo gallery will classify these photos and videos in folder. You can apply photo gallery to view and edit photos, set the photos as wallpaper and watch the video.

View pictures

1.Click gallery application in main interface.

2.Enter into gallery, click the folder you want to view.

3.Click the picture you want to view, the system will play it in full screen mode automatically.

4. The pictures can be zoom in and zoom out, put two fingers on the screen, the separate the fingers(gather up the fingers, the picture will be zoom in) or double click the screen.

Note: when you browse the pictures, slide left or right to view more pictures.

Edit and set pictures

When check the pictures in full screen mode, click menu key to display menu selection, you can choose the selection you need to edit and setting pictures.

Slide Show

1.Open a picture, use virtual key to click menu key, display menu selection. 2.Click slide show, it will auto loop play

Crop

1.Click menu key to display menu selection.

2 Then click crop, click and drag related area to adjust the cropper.

3.Click cropper and drag it inside and outside to adjust the image.

4.After adjust the size you want, click crop.

5. If you wish to give up to crop, click cancel to return to picture browse.

Edit

1.Click menu key, display the menu selection.

2.Click edit.

3. Adjust the brightness, style, color, ant alias setting in selection.

4.Click save.

5.If you want to give up edit, click return key, click not to return to picture browse.

Camera

In the main interface or desktop, click camera application procedure onter into camera

Operation of camera ,Switch camera: choose Menu key, click switch front/back camera

FM Radio

Click in the main interface or desktop to enter into FM radio interface: Radio button operation instruction.

Save channels: Click button in the main interface to save the channel, and the channel will be saved in channels list.

Note: You need to insert earphone as antenna when using FM radio. If no antenna, your MID can't search any frequency band.

Communication Function	

Phone

1. Click Phone application procedure 2.Operate.

Text Message

- 1 Enter into main menu, choose 驒 application procedure.
- 2 Click "Edit new message"

Contact List

Click Contact list

in the main interface, enter into the contact list.

Search contact: click enter into search function Add contact: click (a) button, enter into add contact interface

Internet

Browser

In case of Wi-Fi or mobile internet is connected well (Please refer to Chapter 4.1 for wireless and internet setting), click IE browser 💿 in the main menu or desktop to enter the IE interface.

Click address bar to input the website, click start, enter into related webpage, then you can browse the website information, and you can click the menu you can refresh, save to bookmarks, share page, bookmarks, history and setting the webpage.

Email

Email application procedure contains email setting guide, you can add the external POP3 OR IMAP email account of normal web email service provider (For instance, Yahoo, Gmail, Hotmail and 163).

a. Email Setting

1. After you click the sending email icon , you can see the email setting guide, which can help you to set.

2. Input your email address and password.

3. Click "Next step" button, choose your email type is POP3 or IMAP.

4. Click "Next Step" button to check whether the email box servicer can receive or send emails

 Input the email account and display the email subject, and click finish.
 If the email box is available, you will enter into your mail box automatically.

b. Delete the email account

You can delete stetted POP3 or IMAP email account from your MID.

1.Enter into your mail box.

- 2 Press Menu key
- 3. Click Account
- 4. Press the account you want to delete.
- 5.Click confirm to remove.

c. Send E-mail

- 1. Click 🔛 to display your mail box.
- 2. Click the inbox, it will refresh the new emails automatically; click it to read new email.
- 3. Press Menu key. Menus will popup.
- 4. Click Edit 🤣 to enter into new email editing interface.
- 5. Input the receiver's email address.
- 6. Input the subject and email content.
- 7. If you want to add attachment, click menu key, the menu popup.
- 8. Click "Attach file" (photo, music, video, contacts).
- 9. Click "send" to send the email out.

File Manager

File manager will copy, cut, delete, rename the documents or the folder in the TF card, it also will share the files, install apk etc.

a. Copy, cut, delete, rename the files and folder: choose the file or folder, long press the file or folder to enter into the interface, you can operate the file or folder.

b. Paste the copy or cut file: choose the file you want to paste, icon to enter into.

C. Share file:choose any file, long press it, it will popup "share", choose the share way you want in the list.

d. Install apk file: Choose the file suffixed .apk in the file manager, you can install the third part software as reminder.

e. Build new folder: Choose the menu you want to build the file, click icon in right top, choose new folder, you can build new folder as reminder.

Recorder

In the main interface or desktop, click recorder icon
to enter into record interface, click record key
to start record. Click Stop key
to stop recording. Click Play key
to play the recorded sound. The system will auto remind you to use or abandon this record, please choose it manually.

Play the record: choose the video player to play the recorded sound, choose the recorded sound in the source manager, and click it to play.

Installation of Procedures

Installation

Install the third party application procedure

1.Click "file manager" application procedure; choose the application procedure you need to install.

2.Hold the application procedure you need to install.

3.It popup install, click install apk.

4. Finish the installation as guide, it will operate.

Note: The third party procedure searched from internet to use on the system are all suffixed with apk.

Uninstall

Uninstall application procedure

1.Click setting icon in main interface.

2.Click apps, list all the application procedures installed in the system.

3. Click the APK you want to uninstall, click uninstall.

4 Click confirm to finish uninstallation.

Skill: The procedure manager installed by system has many convenient methods to uninstall after opening procedure manager, click uninstall, it will list all the application procedures installed by system.

Troubles Shooting

1. The first startup of MID is slow

After the MID system upgraded, the first startup need to install the pre-installed application software, the lead time is around 2-3 minutes, the startup afterwards will be much quicker.

2.MID can't connect Wi-Fi

Make sure the wireless router of internet service can work in normal. Ensure the MID and wireless router in certain distance, and no wall or other barrier between them.

Ensure the user name and password both correct.

3.MID feels hot

When many application procedures are used in meanwhile, or the brightness of screen open to the lightest or under charging, MID may feel fever. It is normal.

4.Email can't be set or Registration of application procedure.

Ensure your internet is well connected. Make sure your email setting way is correct. Keep your system time and local time consistent.

5. The system is abnormal and can't work.

When you install some third party application procedure, it may cause abnormal work, you can press Reset key(next to power port) to reset the system.

6. The webpage can't be opened

Please keep the distance between from route to MID in effective range. Please restart WIFI and try again.

7. MID works terribly slow sometimes

It is normal phenomenon. Please turn off some application you don't need in advanced task management, or uninstall some third party application to release more system resource.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and(2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference ence will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

The product is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted with the product transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the product while operating can be well below the maximum value. This is because the product is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a product model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model product when tested for use worn on the body, as described in this user guide, when properly worn on the body is 1.056W/kg.

(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various product and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model product with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model product is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/ oet/fccid after searching on.

FCC ID: 2AIOHHT1004L16 Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Asso-ciation (CTIA) web-site at https://www.ctia.org/ In the United States and Canada, the SAR limit is 1.6 watts/kg (W/kg) averaged over onegram of tissue. The standard incorporates a sub-stantial margin of safety to give additional protectionfor the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 0mm is used between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
