Add-on LCD

- Remove the side cap from the camera.
- Insert the USB-C port from the LCD Screen into the USB-C port of the camera, make sure to fully insert the connection.
- Press and hold the "OK" button for 2-3 seconds to rotate the display 180° as needed.

Caution

The USB-C Port under this side cap is for LCD screen connection ONLY.
Do NOT insert any USB-C cable, otherwise the camera may be damaged.

Backup Battery

Take out the backup-battery from the box, face the connector to the back of the camera, the magnetic force will help you to put them together.

Bluetooth Remote

Connecting the Remote

Pair the camera and remote when you use the remote for the first time. Turn on the switch of remote, click the M button and enter the setting menu, then enter "Bluetooth Pair" in the menu, the camera will search and pair the remote automatically. The LCD will show "Bluetooth Pairing". The remote will be connected automatically next time after the pairing.

(The light will flash red when the Remote is turned on or the Pairing succeed. If the Remote is disconnected, the light will also flash red for once when you click the button. When the Remote is connected, the light will flash blue on all the operation.)

Filming with Remote and Switch Mode

Press and hold the Shutter Button to switch the mode

Photo/Video: Under photo mode, click once to take a photo. Under video mode, click the remote to start video film, click again to stop filming.

Connecting the APP

AEE Mokacam
iOS / Android

Search and download the "MokacamAlpha" mobile application for your respective platform (Apple AppStore, Google Play Store), you can also download the APP from www.mokacam.com website link.

- Power the camera on
- Press and hold the WiFi / Setting Button for 2-3 seconds to turn on WiFi, you can also turn on WiFi through the settings menu of the camera. "WiFi ON" will display on the LCD screen.
- Turn on the WiFi function on your mobile device and connect to Mokacam's WiFi hotspot "Alpha*****" and input the password "1234567890". Open the "MokacamAlpha" mobile application on your device.

Offloading the Contents

Windows

Connect the camera to your Windows PC using a Micro USB cable, your computer will automatically detect the camera named "Mokacam". Follow the onscreen instructions to access the camera contents.

Mac OS

Connect the camera to your MacOS PC using a Micro USB cable, your computer will automatically detect the camera and create a folder titled "Mokacam" onto your desktop. Open the folder with your Finder to access the camera contents.

Waterproof Case

Open and insert the camera into the waterproof case according to the instructions below.

Caution

The waterproof case's element resistance might decrease as a result of normal wear and tear. Please check the waterproof case for cracks and damaged seals before use. We recommend to test it with paper first before using for water activities, if any liquid leaks please contact customer service. Liquid damage to the camera and its electronic accessories are not covered under the manufacturer's warranty. Do not turn on or charge the camera if it becomes wet.

Charging the Battery

Connect the camera to the included USB charger, use the included micro USB cable to charge the camera and included accessories.

Caution

The Mokacam / LCD Screen / Backup Battery all need to be charged individually as they all feature separate batteries. Only use the included USB charging cable or a comparable charging cable with output of 5V 1A, failure to do so could damage the camera and its accessories.

1/4" Adapter Mount

The included 1/4" adapter mount will increase the range of compatible accessories for your Mokacam camera.
