

In the Box

Wireless Lantern Speaker

Micro-USB
Charging Cable

Location of Controls

(Underneath Protective Seal)

1. 3.5mm Auxiliary Audio Input Jack
2. LED Indicator
3. DC 5V Micro-USB Charging Port
4. [🔊] Button: Cycle through 7 light modes
5. [POWER] Switch

Pairing the Speaker

1. Turn the speaker ON by moving the [POWER] switch to the ON position. A tone will be heard indicating the speaker has power and the LED indicator will flash **BLUE**.
2. Set your mobile device to search for Bluetooth devices. When it appears, select **PBT643** from the list of found devices.
3. Once successfully paired, a tone will be heard and the LED indicator will slowly flash **BLUE**.

On iOS or Android Devices

- Go to **Settings -> Bluetooth**
(Make sure Bluetooth is turned ON)

The screenshots above are typical of many Bluetooth-enabled devices in the market today and are used to assist in the explanation of the pairing process. Your Bluetooth-enabled device's interface and interaction with the speaker may differ slightly from the illustrations above.

Using the Speaker

Powering ON/OFF

- Slide the [POWER] switch to the ON/OFF position to turn the speaker ON/OFF.

Using the Lights

- Quick press the [🔊] button to cycle through the 7 light modes.

NOTE: For best response from reactive light modes, increase the volume of your paired Bluetooth device.

Playing Music

To enjoy music wirelessly on your speaker, make sure you are paired to a Bluetooth-enabled device or connected via the auxiliary input jack to a media-playing device. Once paired or connected, you can control the media playback and volume adjustment with the controls on your paired or connected device.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
